Foot and Mouth Disease A.J. van der Zijpp, M.J.E. Braker, C.H.A.M. Eilers, H. Kieft, T.A. Vogelzang, S.J. Oosting, 2023-08-28 A Foot and Mouth Disease outbreak is not by definition similar to a Foot and Mouth Disease crisis Why then did the 2001 outbreak result in a crisis situation in the Netherlands It was not because nobody was prepared for it The Ministry of Agriculture Nature Management and Fisheries had a scenario in stock The scenario was applied as intended The scenario did what it was supposed to do it prevented the spreading of the disease it resulted in a relatively soon eradication of the disease and it minimised damage to agricultural exports Nevertheless the crisis was there Foot and Mouth Disease new values innovative research agenda s and policies reports a process in which individuals and groups involved in the crisis participated in a joint analysis of what caused the crisis and in the making of a policy and research agenda The conclusion was that ignorance of the societal function of animals and countryside was the cause of the crisis the scenario focussed on Foot and Mouth Disease control in a production oriented environment In reality many people perceived that the scenario and its rigid application threatened nonproduction values such as the companion role of animals and the recreation function of the landscape Inevitably a next outbreak of Foot and Mouth Disease will occur However research and policy makers should seriously take up this perception of animals and countryside to prevent an outbreak of becoming a deep crisis again

The New Dimensions of the European Landscapes R.H.G. Jongman, 2005-05-09 The European Landscape is under stress of changing land use and a changing attitude of its users Globalization the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity The rural and cultural heritage of Europe has to be adapted to cope with this change However its landscape is worth to be conserved as well because it represents the European history in the same way as castles and churches It even more represents the history of the common people because it has been the tradition of the rural population that made these landscapes It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world We in Europe have to define what we think is important and

what must be conserved what can be adapted to be used for new functions and what can be abolished because it has no value
 These decisions will determine the new dimensions of the European landscapes The Frontis Workshop on the New
 Dimensions of the European Landscape was held on 10-12 June 2002 Wageningen University and Research Centre organized
 this workshop aiming to develop visions on the landscape in Europe its development and design in the future and to
