Archimedes and the Door of Science Jeanne Bendick, 2022-07-25 Many of the things you know about science began with Archimedes What was so unusual about a man who spent almost his whole life on one small island more than two thousand years ago Many things about Archimedes were unusual His mind was never still but was always searching for something that could be added to the sum of things that were known in the world No fact was unimportant no problem was dull Archimedes worked not only in his mind but he also performed scientific experiments to gain knowledge and prove his ideas

Archimedes and the Door of Science Jeanne Bendick, 2022-07-25 Archimedes and the Door of Science is a child friendly biography of ancient Greek mathematician and scientist Archimedes Through her simple explanation and charming illustrations author Jeanne Bendick describes the life of this great man as well as the enormous impact his discoveries have had on the world in the 2 200 years since his death Author and artist Jeanne Bendick b 1919 d 2014 wrote and illustrated over 100 children s books over her long career primarily in the field of science She was particularly adept at reducing complex scientific principles into simple language that children could understand helping to pique their interest in science and the people who made these early discoveries Bendick was taught to draw by her maternal grandfather who was himself an artist He took her to the American Museum of Natural History on Sundays as a child which helped to foster her interest in science and history After earning her Bachelor of Arts degree at the Parsons School of Design in New York City in 1939 she and her television and film producer husband put their work on hold to devote themselves to the World War II effort After the war the couple returned to their creative endeavors and Bendick began writing and illustrating her own books Archimedes and the Door of Science 1962 is light and easy to understand for the young reader Part biography and part science primer the book turns the life of a man who lived thousands of years ago into a source of interest and inspiration The book begins by painting a picture of life in ancient Greece and explaining how young Archimedes would have fit within it Focusing on the day to day home and school life of the boy readers are able to compare the similarities and differences to their own lives Bendick explains many of Archimedes inventions and discoveries in a way that both children and adults will be able to understand From the Archimedes screw which is still used today for irrigation purposes to a simple pulley that could move an entire ship she tells the stories behind these inventions to the best of modern knowledge and why they work illustrated with charming line drawings These help to clarify some of the more complex ideas and aid in the storytelling of the great man s life She also includes some simple experiments that kids can replicate themselves to demonstrate the great mathematician s discoveries such as using a pencil stub as a hydrometer to test the density of liquids Bendick is also honest about Archimedes shortcomings In the field of astronomy for example he thought that the distance to the furthest star in the sky was so short that it would have been within our own solar system He estimated the earth s circumference to be ten times larger than it is And he stated that the sun was at least thirty times larger than the moon While he was technically correct the sun is in fact

over 1 300 000 times larger than the moon Most of the things you know about science would have dazzled and bewildered him writes Bendick But many of the things you know about science begin with Archimedes Other books by Jeanne Bendick include Galen and the Gateway to Medicine The First Book of Space Travel and her final children s book Herodotus and the Road to History published when she was 91 If I were a fairy godmother she said my gift to every child would be curiosity

Mirror, Mirror Mark Pendergrast,2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness As our first technology for contemplation of the self the mirror is arguably as important an invention as the wheel Mirror Mirror is the fascinating story of the mirror s invention refinement and use in an astonishing range of human activities from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror s key role in the use and understanding of light Pendergrast spins tales of the 2 500year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three days the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices and George Ellery Hale the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century s largest ground based telescope Like mirrors themselves Mirror Mirror is a book of endless wonder and fascination **100**
