

FOUR NEW FEATURES!

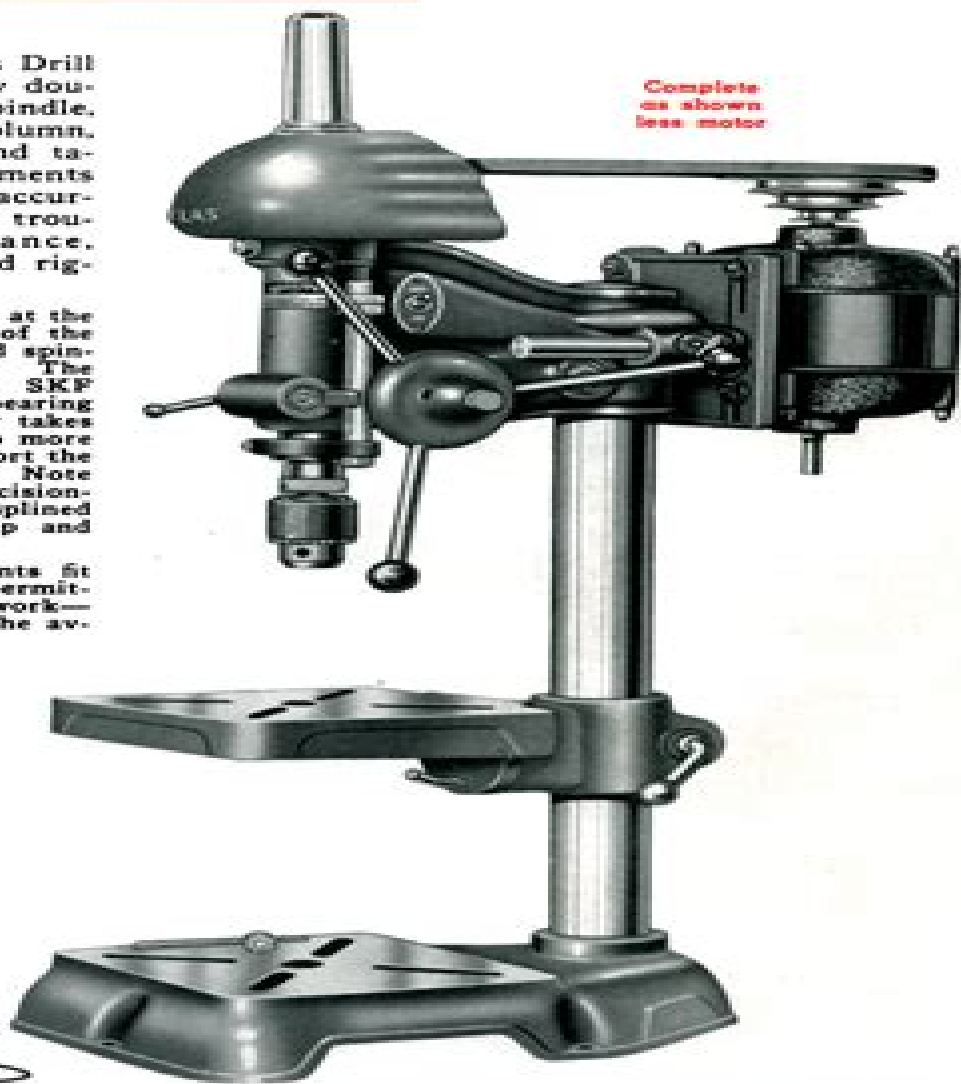

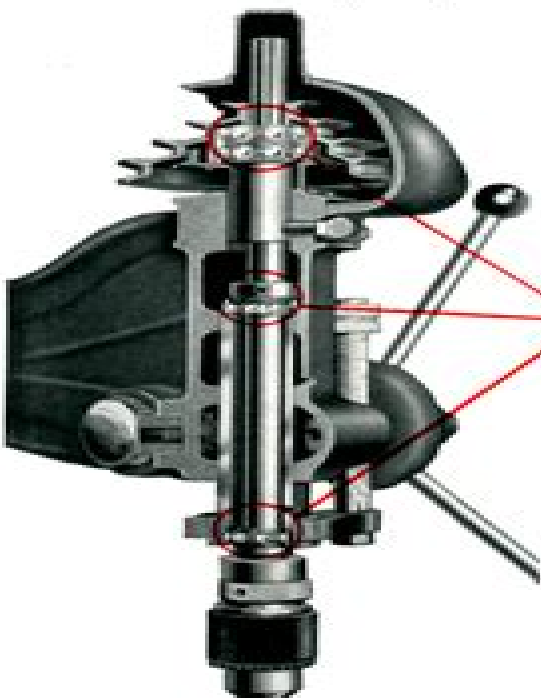

Four new features of the higher priced Atlas Drill Presses have been built into the Atlas 52: new double-row bearing design, fully enclosed splined spindle, larger heavier column, and machine-ground tables. These improvements mean permanent accuracy, vibrationless, trouble-free performance, greater strength and rigidity.

The cutaway view at the left shows details of the new 52 bearing and spindle construction. The large, double-row SKF deep-grooved ball bearing in the drive pulley takes the belt pull. Two more SKF bearings support the spindle in the quill. Note also the three precision-bored quill guides, splined spindle, spindle cap and pulley guard.

All Atlas Attachments fit the 52 Drill Press, permitting a wide range of work—an ideal machine for the average shop.
