

History of Environmental Literature and Criticism

Environmental literature and criticism have evolved significantly over time, reflecting changing perspectives on the relationship between humans and the natural world. This section explores the historical context and key figures in the field.

The history of environmental literature and criticism is deeply rooted in the Romantic era, where writers like William Wordsworth and John Keats emphasized the beauty and power of the natural world. In the 19th century, Henry David Thoreau's *Walden* became a seminal work, advocating for a deeper connection with nature. The 20th century saw the rise of environmentalism, with writers like Rachel Carson's *Silent Spring* highlighting the dangers of industrialization and pollution. Modern environmental criticism often focuses on the intersection of nature, culture, and politics, exploring issues like climate change and environmental justice.

Atlas of Endoscopic Ultrasonography Frank G. Gress, Thomas J. Savides, Brenna C. Bounds, John C.

Deutsch, 2011-11-07 Endoscopic ultrasonography EUS is now an established technique for the diagnosis of GI disease. In addition, therapeutic indications for EUS have recently been developed and it is included in the training programs for gastroenterology. The Atlas of Endoscopic Ultrasonography provides a large collection of excellent images obtained from both diagnostic and therapeutic procedures to give readers a preview of practice. It includes a DVD with video clips and a searchable database of images. This package presents a first class collection of images to give a highly integrated introduction to endoscopic ultrasonography. *Clinical Ultrasound, 2-Volume Set E-Book* Paul L. Allan, Grant M.

Baxter, Michael J. Weston, 2011-03-07 Clinical Ultrasound has been thoroughly revised and updated by a brand new editorial team in order to incorporate the latest scanning technologies and their clinical applications in both adult and paediatric patients. With over 4 000 high quality illustrations, the book covers the entire gamut of organ systems and body parts where this modality is useful. It provides the ultrasound practitioner with a comprehensive authoritative guide to image diagnosis and interpretation. Colour is now incorporated extensively throughout this edition in order to reflect the advances in clinical Doppler power Doppler contrast agents. Each chapter now follows a consistent organizational structure and now contains numerous summary boxes and charts in order to make the diagnostic process practical and easy to follow. Covering all of the core knowledge, skills and experience as recommended by the Royal College of Radiologists, it provides the Fellow with a knowledge base sufficient to pass professional certification examinations and provides the practitioner with a quick reference on all currently available diagnostic and therapeutic ultrasound imaging procedures. Individual chapters organized around a common template, therefore establishing a consistent diagnostic approach throughout the text and making the information easier to retrieve. Access the full text online and download images via Expert Consult. Three brand new editors and many new contributing authors bring a fresh perspective on the content. Authoritative coverage of the most recent advances and latest developments in cutting edge technologies such as colour Doppler power Doppler 3D and 4D applications, harmonic imaging, high intensity focused ultrasound (HIFU), microbubble contrast agents, interventional ultrasound, laparoscopic ultrasound brings this edition right up to date in terms of the changes in technology and the increasing capabilities and applications of ultrasound equipment. New sections on musculoskeletal imaging. Addition of coloured text tables and charts throughout will facilitate quick review and enhance comprehension. The Transcervical Approach in Thoracic Surgery Marcin

Zieliński, Ramón Rami-Porta, 2014-07-01 Use of the transcervical approach in thoracic surgery has advanced significantly during the past 60 years, owing primarily to advances in technology. Nevertheless, the possibilities of this approach have never been compiled in a systematic way. This book aims to rectify the situation by describing in a structured way all the thoracic procedures that can be performed using the transcervical approach. Indications and contraindications, surgical techniques

complications and results are all covered based on the authors experience and published reports The contents encompass diverse surgical endoscopic procedures for diagnosis and staging use of the transcervical approach for surgery to the thymus and mediastinum lungs and bronchi trachea and esophagus and miscellaneous items including the role of robotic surgery
