Doctors and Torture Wanda Teays, 2019-07-22 This book brings into sharp relief the extent to which the medical profession has enabled or participated in actions that are at moral crossroads Physical and psychological abuse and violations of medical codes have already been brought to light by concerned bioethicists responding to ethical lapses of the war on terror This book goes to the next level by looking at three areas that also merit our attention and call us to speak out against abuses These are 1 dehumanization such as forced nudity hooding sensory deprivation exploitation of phobias waterboarding and environmental manipulation 2 non consensual forced feeding and 3 solitary confinement Each area raises important questions for the medical profession Author Wanda Teays calls upon doctors and nurses to reflect on the role they play in the unethical treatment of prisoners and detainees by crossing moral boundaries around each of these areas In the process we are reminded that bioethics is global not local and the concerns of the discipline encompass issues with a wider scope

André de Palma, Luc Leruth, 2025-04-08 What could movies as diverse as The Last Samurai Cl o from 5 to 7 or Dr Strangelove have in common Filmonomics has a simple yet intriguing answer economics as the main driving force of the plot or as the main motivation of the characters actions This book analyses how movie makers use economic and financial motives in their plots or to build their characters Have they done it in line with economic theory Or are they proposing a new angle a new perspective that economists should take note of The authors here do not discuss wages in the film industry or the economics of movies What interests them is the economic motivations underpinning the behaviour of fictional characters in their favourite films They argue that credible movie characters can behave in irrational ways and movie makers occasionally introduce new ideas that economists should take note of A unique contribution this book will be of interest to readers eager to discover what economists have to say about films and film directors It will be indispensable for students and researchers of economics media studies film studies and cultural studies Bitcoin: Ayn Rand was wrong, Atlas never shrugged: A 50 year old dream

SAADETTİN KONUKSEVEN, TUNA ÖZEN, 2018-07-17 In Ayn Rand s Atlas Shrugged all the people who work contribute and produce start disappearing one by one as a result of the government attempting to take over all lines of work These people are convinced to disappear by a man called John Galt The whole country asks the same question which also happens to be the motto for the book Who is John Galt Due to Bitcoin becoming so well known and having regular appearances on headlines everyone started looking for the creator of Bitcoin who is still a mystery Just like Atlas Shrugged a

similar question gnawed at the minds of people and made headlines Who is Satoshi Nakamoto Why did we start with such a prologue Because you cannot understand Bitcoin without reading Ayn Rand and understanding Friedrich Hayek Because every revolution has an ideal foundation Even though Bitcoin is a software revolution it is also an ideal one A revolution with roots reaching to the first days of humanity A revolution that will take humans back to their essence A revolution that may bring Capitalism The Unknown Ideal as Ayn Rand calls it Bitcoin is a revolution against all third parties whom we believe to be trustworthy It is a revolution against governments banks land registry offices notaries and all intermediaries It may very well be the foundation of a new world where only those who produce will rise where borders will disappear the utopia founded by John Galt for the hard working people The media did not say that a revolution has happened when the French Revolution occurred in 1789 People didn't start thinking the concept of nation state is born and a new era has begun Only after 100 150 years it was understood that this movement was a revolution that marked the end of an era and the beginning of a new one Ayn Rand was wrong Atlas never shrugged

Transformative Education for the Second Renaissance John P. W. Hudson, 2019-06-01 Transformative Education for the Second Renaissance follows educator John PW Hudson through a personal and professional journey that led him to respond to what he sees as underlying fissures in the bedrock of educational practice At the height of his career he was seconded by the Richmond BC Canada school district to teach a demonstration class in the Nanashan Xian Middle School in Shenzhen China at the request of the school and philanthropists Joe and Margaret Li initiators of the project and sponsors His assignment was to demonstrate and explain Western teaching methods to educators and other interested parties including university students and their professors from various parts of China local and national education officials teachers at the Nanshan Xian middle school where he lived and taught for two years and civic officials as well Most days a television camera was in the room and several adults sitting watching Throughout his career Hudson was intensely interested in how children learn how and why they thrive or fail educational philosophy and how educational infrastructures and practices impact learners and professionals alike After teaching Music English and business education for twenty years at the junior high school level Hudson turned his sights to the elementary level and taught intermediate classroom for the last thirteen years before going to China All of these experiences left him with lingering questions which came into sharp focus in China where traditional practices are entrenched Primarily Transformative Education for the Second Renaissance explores history philosophy research politics and real human stories to encapsulate the driving forces of education that need adjustment particularly assessment Hudson describes the transition from analog to digital as the Second Renaissance and how findings in brain research characterize how our understanding of learning has changed in modern practice from transmissive to transformative Not a traditional academic treatise Hudson's book reads more like a coffee shop discussion but the reasoning and conclusions will resonate with experienced educators Hudson's goal is to kick start discussion about the changes he proposes and frame a narrative to move education into our
