 Since the first Earth Summit held in Rio de Janeiro in 1992 many states have been looking for a new concept of economic and social progress The environmental crises of the last years as well as the global economic and financial crisis require an even more profound shift in thinking toward a policy committed to sustainability and intergenerational equity But how can this goal be achieved The publication for the Reinhard Mohn Prize 2013 *Winning Strategies for a Sustainable Future* presents pioneering approaches from different continents Bhutan Costa Rica Finland Ghana and Tasmania are examples that show sustainability is feasible These principles also open up new perspectives for Germany Today we know that sustainability is the great challenge of the 21st century The guiding principle of sustainable development implies taking economic social and environmental concerns into account in a balanced manner Our focus in this regard must be improving the quality of life for all people 2015 Polestar Planner Ruth Porter,2014 *Nature-First Cities* Cam Brewer,Herb Hammond,Sean Markey,2024-09-03 Nature belongs in cities but how do we put nature first without pushing people aside *Nature First Cities* reveals the false dichotomy of that question by recognizing that people and nature are indivisible Western urbanization has meant the ongoing expulsion of nature which is engendering biodiversity loss and inequality thwarting economic potential and affecting health This volume instead applies the science and practice of nature directed stewardship to cities Tested through case studies this methodology for urban ecosystem restoration is uniquely effective at revitalizing our strained cities Nature is woven into networks distributed equitably across neighbourhoods and partnered with the urban density that is essential for addressing the climate crisis *Nature First Cities* offers a practical framework for urban planning that reinforces our place in nature both physically by ensuring that cities are replete with biodiversity and intact ecosystems and conceptually by rebalancing our relationships with the planet and with one another **A Procedural Framework for Transboundary Water Management in the Mekong River Basin** Qi Gao,2014-03-13 In *A Procedural Framework for Transboundary Water Management in the Mekong River Basin* Shared Mekong for a Common Future Qi Gao explores procedural implications of integrated water resources management and its application in the Mekong River Basin As a problem based study enlightening conclusions are made based on the increasingly polycentric nature of transboundary cooperation in the Mekong region The procedural requirements in the Mekong context both the ideal and practical scenarios are considered combined with selected case studies Qi Gao convincingly asserts the necessity to enhance decision making processes and suggests procedural legal mechanisms to institutionalize sustainability concepts in transboundary cooperation

Literature and the Glocal City Ana María Fraile-Marcos,2014-07-17 The modern city is a space that can simultaneously represent the principles of its homeland alongside its own unique blend of the cultures that intermingle within its city limits This book makes an intervention in Canadian literary criticism by foregrounding both globalism which is increasingly perceived as the state of the art literary paradigm and the city These are two significant axes of contemporary

culture and identity that were previously disregarded by a critical tradition built around the importance of space and place in Canadian writing Yet as relevant as the turn to the city and to globalism may be this collection s most notable contribution lies in linking the notion of glocality that is the intermeshing of local and global forces to representations of subjectivity in the material and figurative space of the Canadian city Dealing with oppositional discourses as multiculturalism postcolonialism feminism diaspora and environmentalism this book is an essential reference for any scholar with an interest in these areas

Finanzmarktstabilisierung und Anlegereigentum Michael W. Müller,2019-07-05 Während der globalen Finanzkrise sahen sich Hoheitsträger in vielen Staaten veranlasst, zur Wiederherstellung der Finanzmarktstabilität in individuelle Rechtspositionen von Eigen- und Fremdkapitalgebern sowie Staatsgläubigern einzugreifen. Einen zentralen Prüfstein der gerichtlichen und schiedsgerichtlichen Aufarbeitung dieser Eingriffe bilden in allen untersuchten Rechtsordnungen verfassungs- und völkerrechtliche Garantien des Privateigentums. Auf dieser Grundlage erschließt Michael W. Müller die strukturbildende Funktion des Eigentums für das öffentliche Finanzmarktrecht. Dabei zeigt er, dass das Institut Grund- und menschenrechtlichen Eigentumsschutzes in der Lage ist, den Konflikt individueller Anlage- und kollektiver Stabilitätsinteressen theoretisch abzubilden. Durch seine rechtsvergleichende Analyse gewinnt der Autor Prinzipien für den hoheitlichen Umgang mit Finanzkrisen, die Gegenstand einer internationalen Verständigung sein könnten.
