unresolved technical and policy challenges that are being inherited by today's assessment specialists and psychometricians. Going beyond core descriptions of psychometric and assessment development procedures and operational best practices in testing, this book exposes graduate students and scholars of educational measurement and policy as well as testing industry professionals to real life pressures faced by those charged with designing, implementing and maintaining a large scale state assessment program. Standard setting, test design, score reporting, validation and more are approached critically and with authentic context.
