France Since 193:

France Since the Liberation Gino Raymond, 2024-02-20 This book focuses on the tension between the modernising thrust that places France on a trajectory of convergence with comparable liberal democracies and the defence of a national specificity that can act as a brake complicating France's relationship with its neighbours its present and its past This ambivalence in French political and social life stems from the conscious attempt to rebuild the nation after the trauma of Occupation during World War II and the new beginning provided by the Liberation The government of the Fourth Republic embraced the pursuit of a modernisation that would enable it to regain its place among the world's leading democratic states However this modernising ambition co-exists with the belief in a specific destiny and a unique sense of mission that are intrinsic to the emergence of a sense of nationhood after the revolution of 1789 Raymond defines a critical perspective that draws together historical economic social and political issues into a coherent understanding of what makes France the way it is today Written with both academic rigour and a highly accessible clarity of style this volume is a valuable resource for students educators and researchers in French and European Studies

Royal Commission on Historical Manuscripts, 1899 **The Influence of Sea Power Upon History, 1660-1783** Alfred Thayer Mahan, 1891 **France in the South Pacific** Denise Fisher, 2013-05-23 France is a Pacific power with three territories a military presence and extensive investments Once seen by many as a colonial interloper in the South Pacific by the early 2000s after it ended nuclear testing in French Polynesia and negotiated transitional Accords responding to independence demands in New Caledonia France seems to have become generally accepted as a regional partner even if its efforts concentrate on its own territories rather than the independent island states But Frances future in the region has yet to be secured By 2014 it is to have handed over a set of agreed autonomies to the New Caledonian government before an independence referendum process begins Past experience suggests that a final resolution of the status of New Caledonia will be divisive and could lead once again to violent confrontations In French Polynesia calls continue for independence and for treatment under UN decolonisation procedures which France opposes Other island leaders are watching so far putting faith in the Noumea Accord but wary of the final stages The issues and possible solutions are more complex than the French Pacific island population of 515 000 would suggest Combining historical background with political and economic analysis this comprehensive study offers vital insight into the intricate history and problematic future of several of Australias key neighbours in the Pacific and to the priorities and options of the European country that still rules them It is aimed at policy makers scholars journalists businesspeople and others who want to familiarise themselves with the issues as Frances role in the region is redefined in the years to come Charities of France in 1866 William Richards Lawrence, 1867 *The Influence of Sea Power Upon History 1660-1783* Alfred Thayer Mahan, 2003-08-31 The timeless classic on naval history strategy and principles one of the most influential works of military theory in the modern era Captain Mahan has written distinctively the best and most important and also by far the most interesting book on naval history which has been produced on either side of the water for many a long year The Atlantic Monthly October 1890 First published over a century ago this classic text on the history and tactics of naval warfare by the then president of the Naval War College had a profound effect on the training of officers and the deployment of naval resources around the globe It continues to be a primary reference for naval students and historians The Influence of Sea Power upon History 1660 1783 presents the argument that despite great

changes and scientific advances in naval weaponry certain principles of naval strategy remain constant Beginning in the time of Alexander the Great those nations with strong commercial and military command of the seas were the nations of greatest strength wealth and power Though the determinants of military supremacy and the global balance of power have changed due to tremendous advances in technology the principles and strategies discussed in the book remain creditable The extensive presentation of the history of high seas navigation alone makes this book an invaluable resource as it has been credited with stimulating the growth of modern navies in leading countries of the world Alfred Thayer Mahan demonstrates through historical examples that the rise and fall of sea power and the wealth of nations have always been linked with commercial and military command of the sea Mahan describes successful naval strategies employed in the past from Greek and Roman times through the Napoleonic Wars with an intense focus on England's rise as a sea power in the eighteenth century This book provides not only an overview of naval tactics but also a lucid exposition of geographic economic and social factors governing the maintenance of sea power
