Up Through an Empty House of Stars David Langford, 2003-08-01 At last *Up Through an Empty House of Stars* brings together the best of the never before collected SF reviews and articles that helped build David Langford's towering reputation since 1980 Complementing the review columns collected in *The Complete Critical Assembly* and the knockabout essays and squibs in *The Silence of the Langford* this volume's 100 glittering selections mix serious critical insight with the inimitable Langford wit In 2002 David Langford won his sixteenth Hugo award as Best Fan Writer for critical and humorous commentary on SF In the same year his occasionally scandalous SF newsletter *Ansible* won its fifth Hugo Langford also received the 2001 Hugo for best short story and the 2002 Skylark Award Here he shines a unique light on classics like Ernest Bramah G K Chesterton Robert Heinlein and Jack Vance and analyses major SF and major clunkers and minor eccentrics of the 1980s 1990s and early 2000s continuing to the latest by such current stars as Gene Wolfe and China Miéville Plus witty asides on crime fiction and its SF links gleeful examination of writing so bad it's almost good and even at his most serious turns of phrase to make you laugh aloud

The Time Machine Hypothesis Damien Broderick, 2019-07-12 Every age has characteristic inventions that change the world In the 19th century it was the steam engine and the train For the 20th electric and gasoline power aircraft nuclear weapons even ventures into space Today the planet is awash with electronic business chatter and virtual reality entertainment so brilliant that the division between real and simulated is hard to discern But one new idea from the 19th century has failed so far to enter reality time travel using machines to turn the time dimension into a two way highway Will it come true as foreseen in science fiction Might we expect visits to and from the future sooner than from space That is the Time Machine Hypothesis examined here by futurist Damien Broderick an award winning writer and theorist of the genre of the future Broderick homes in on the topic through the lens of science as well as fiction exploring some fifty different time travel scenarios and conundrums found in the science fiction literature and film

The Stars of Heaven Clifford A. Pickover, 2004-05-06 Do a little armchair space travel rub elbows with alien life forms and stretch your mind to the furthest corners of our uncharted universe With this astonishing guidebook you don't have to be an astronomer to explore the mysteries of stars and their profound meaning for human existence Clifford A Pickover tackles a range of topics from stellar evolution to the fundamental reasons why the universe permits life to flourish He alternates sections that explain the mysteries of the cosmos with sections that dramatize mind expanding concepts through a fictional dialog between futuristic

humans and their alien peers who embark on a journey beyond the reader's wildest imagination. This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. Told in Pickover's inimitable blend of fascinating state-of-the-art science and whimsical science fiction and packed with numerous diagrams and illustrations, *The Stars of Heaven* unfolds a world of paradox and mystery, one that will intrigue anyone who has ever pondered the night sky with wonder.

Shades of Freedom A. Leon Higginbotham, 1998-06-11 A magisterial account of the interaction between the law and racial oppression in America from colonial times to the present, this book demonstrates how the one agent that should have guaranteed equal treatment before the law, the judicial system, instead played a dominant role in enforcing the inferior position of blacks. 43 photos.

The Long Mars Terry Pratchett, Stephen Baxter, 2015-04-01 2040-2045 In the years after the cataclysmic Yellowstone eruption, there is massive economic dislocation as populations flee Earth to myriad Long Earth worlds. Sally Joshua and Lobsang are all involved in this perilous work when, out of the blue, Sally is contacted by her long-vanished father and inventor of the original Stepper device, Willis Linsay. He tells her he is planning a fantastic voyage across the Long Mars and wants her to accompany him. But Sally soon learns that Willis has ulterior motives. Meanwhile, U.S. Navy Commander Maggie Kauffman has embarked on an incredible journey of her own, leading an expedition to the outer limits of the far Long Earth. For Joshua, the crisis he faces is much closer to home. He becomes embroiled in the plight of the Next, the super-bright post-humans who are beginning to emerge from their long childhood in the community called Happy Landings, located deep in the Long Earth. Ignorance and fear are causing normal human society to turn against the Next, and a dramatic showdown seems inevitable.

The Long War Terry Pratchett, Stephen Baxter, 2013 A new America called Valhalla grows restless under the controlling long arm of the Datum government, while all of the Long Earth is infused by the song of the trolls who are starting to react to humanity's thoughtless exploitation, bringing humankind to the brink of war.

An Informal History of the Hugos Jo Walton, 2018-08-07 Engaged, passionate, and consistently entertaining, *An Informal History of the Hugos* is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com, the Locus Award-winning *What Makes This Book So Great*. The Hugo Awards, named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society, have been presented since 1953. They are widely considered the most prestigious awards in science fiction. Between 2010 and 2013, Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000. Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time. Walton's cheerfully opinionated and

vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to *Among Others* It's very good It's great New York Times bestselling author Cory Doctorow *Being Boing on What Makes This Book So Great* The Long Earth Terry Pratchett, Stephen Baxter, 2013-12-16 The stepper enables a person using it to step sideways into another America another wherever that person happened to be another Earth And if the person using it keeps on stepping they keep on entering even more Earths This is the Long Earth And the further away a stepper travels the stranger and sometimes more dangerous the Earths become International Who's Who of Authors and Writers 2004 Europa Publications, 2003 Accurate and reliable biographical information essential to anyone interested in the world of literature The *International Who's Who of Authors and Writers* offers invaluable information on the personalities and organizations of the literary world including many up and coming writers as well as established names With over 8 000 entries this updated edition features Concise biographical information on novelists authors playwrights columnists journalists editors and critics Biographical details of established writers as well as those who have recently risen to prominence Entries detailing career works published literary awards and prizes membership and contact addresses where available An extensive listing of major international literary awards and prizes and winners of those prizes A directory of major literary organizations and literary agents A listing of members of the American Academy of Arts and Letters **The Long Cosmos** Terry Pratchett, Stephen Baxter, 2016-06-30 THE EXTRAORDINARY FINAL INSTALMENT OF THE BESTSELLING LONG EARTH SERIES Intricately described gently immersive Guardian Enthralling and thought provoking in equal measure Daily Mail A love letter to science fiction itself SFX 2070 71 Nearly six decades after *Step Day* and in the Long Earth the new Next post human society continues to evolve For Joshua Valient now in his late sixties it is time to take one last solo journey into the High Meggers an adventure that turns into a disaster Alone and facing death his only hope of salvation lies with a group of trolls But as Joshua confronts his mortality the Long Earth receives a signal from the stars A signal that is picked up by radio astronomers but also in more abstract ways by the trolls and by the Great Traversers Its message is simple but its implications are enormous JOIN US The super smart Next realise that the Message contains instructions on how to develop an immense artificial intelligence but to build it they have to seek help from throughout the industrious worlds of mankind Bit by bit byte by byte they assemble a computer the size of a continent a device that will alter the Long Earth's place within the cosmos and reveal the ultimate life affirming goal of those who sent the Message Its impact will be felt by and resonate with all mankind and other species young and old communities and individuals who inhabit the Long Earths _____ The Long Cosmos is the fifth and final novel in the Long Earth series The Long Earth series deserves a place on the bookshelves of hardcore SF fans and general readers alike Independent on Sunday Damn You, Entropy! universe of the Sumerians More recently from Alice's adventures in Wonderland to contemporary science fiction's obsession with black holes and quantum paradoxes counter intuitive spaces are a prominent feature of modern and postmodern narrative With the rise and popularization of science fiction the inventiveness and variety of impossible narrative spaces explodes The author analyses the narrative techniques used to represent such spaces alongside their cultural significance Each chapter connects narrative deformation of space with historical problematic of time and demonstrates the cognitive and perceptual primacy of narrative in representing imagining and apprehending new forms of space and time This book offers a comprehensive analysis of the connection between narratology cultural theory science fiction and studies of place
