### **Kirinyaga A Fable Of Utopia 1 By Mike Resnick:**

*Race and Utopian Desire in American Literature and Society* Patricia Ventura, Edward K. Chan, 2019-10-12 Bringing together a variety of scholarly voices this book argues for the necessity of understanding the important role literature plays in crystallizing the ideologies of the oppressed while exploring the necessarily racialized character of utopian thought in American culture and society Utopia in everyday usage designates an idealized fantasy place but within the interdisciplinary field of utopian studies the term often describes the worldviews of non dominant groups when they challenge the ruling order In a time when white supremacy is reasserting itself in the US and around the world there is a growing need to understand the vital relationship between race and utopia as a resource for resistance Utopian literature opens up that relationship by envisioning and negotiating the prospect of a better future while acknowledging the brutal past The collection fills a critical gap in both literary studies which has largely ignored the issue of race and utopia and utopian studies which has said too little about race

**The Utopian Fantastic** Martha A. Bartter, 2004-04-30 Utopia forms a major aspect of human desire one that is as important as religion Understanding utopia and the ways in which it can collapse into dystopia is crucial in many disciplines Fantastic literature including science fiction and fantasy is the only form of literature that takes utopia dystopia seriously Therefore analysis of these works provides a basis for serious experimentation in social science In this volume critics analyze contemporary literary thought experiments such as 1984 and We They show how utopian experiments can easily slide into dystopia Exploring these fictional sociocultural political experiments gives us new ways to think about our lives and culture While literature history and political science professors may find this book useful it can also serve as a call to arms to anyone dedicated to maintaining freedom and humane living in the world today

**A Companion to Science Fiction** David Seed, 2008-04-15 A Companion to Science Fiction assembles essays by an international range of scholars which discuss the contexts themes and methods used by science fiction writers This Companion conveys the scale and variety of science fiction Shows how science fiction has been used as a means of debating cultural issues Essays by an international range of scholars discuss the contexts themes and methods used by science fiction writers Addresses general topics such as the history and origins of the genre its engagement with science and gender and national variations of science fiction around the English speaking world Maps out connections between science fiction television the cinema virtual reality technology and other aspects of the culture Includes a section focusing on major figures such as H G Wells Arthur C Clarke and Ursula Le Guin Offers close readings of particular novels from Mary Shelley's *Frankenstein* to Margaret Atwood's *The Handmaid's Tale*

**The Postnational Fantasy** Masood Ashraf Raja, Jason W. Ellis, Swaralipi Nandi, 2014-01-10 In twelve critical and interdisciplinary essays this text examines the relationship between the fantastic in novels movies and video games and real world debates about nationalism globalization and cosmopolitanism Topics covered include science fiction and postcolonialism issues of ethnicity nation and transnational discourse Altogether these essays chart a new discursive space

where postcolonial theory and science fiction and fantasy studies work cooperatively to expand our understanding of the fantastic while simultaneously expanding the scope of postcolonial discussions

**Kirinyaga** Michael D. Resnick, 1998 The Kikuyus of Kenya emigrate en masse to a planet in space in a revolt against modern life Ruled by a witch doctor they pursue their tribal customs killing unwanted babies as well as the old and the infirm but ultimately progress begins to encroach there too

**Edging Into the Future** Veronica Hollinger, Joan Gordon, 2002-04 The savvy critical essays in this provocative collection investigate the interface between science fiction and postmodern culture Highly recommended for readers at all levels Choice

**Mutopia** Istvan Csicsery-Ronay Jr, 2022-06-15 The Enlightenment's project of establishing scientific proof for the unity of the universe led instead to the fragmentation of knowledge The culture of certainty mutated into a culture of conjecture and speculative supplements as the image of a unified cosmos mutated into a patchwork totality In the process the pursuit of knowledge developed a symbiotic association with science fiction While sf has often provided concrete ideas adopted by the knowledge faculties equally important is the way science fictional counterfactual world building science fiction's fantastic knowledge has intersected with rational speculation in all fields of knowledge As a result the dream of a completed rationally engineered utopia has evolved into the image of mutopia in which the objects of knowledge the process of knowing and the science fictional imagination itself are expected to undergo constant transformation The essays in Mutopia address the science fictional imagination's relevance for scientific modeling critical theory the deconstruction of the future the future of religion the future of nations the imagination of empire the construction of aliens the future of science fiction itself and the transformation of utopia into mutopia Written over many years by a leading scholar of science fiction the essays are revised and expanded for republication in this collection alongside new commentary that places them in an updated context

**African Climate Futures** Carl Death, 2025-06-10 African Climate Futures shows how climate changed futures are imagined in Africa and by Africans and how these future visions shape political debates and struggles in the present Scientific climate scenarios forecast bleak futures with increased droughts floods lethal heatwaves sea level rises declining crop yields and greater exposure to vector borne diseases Yet African climate futures could also encompass energy transitions and socio economic revolutions transformed political agency and human subjectivities and radically reparative more than human climate politics At the heart of the book is an original and interdisciplinary approach It studies official climate policy strategies and fictional texts side by side as ecopolitical imaginaries that envision low carbon climate changed futures and narrate pathways from here to there It discusses net zero strategies from Ethiopia The Gambia Nigeria South Africa and Zimbabwe and draws on postcolonial feminist and queer theory arguing that Africanfuturist climate fiction can inspire more radical reparative more than human ecopolitical imaginaries These stories can help us to understand the debts we all owe imagine what reparations might entail and explore the contours of living convivially alongside more than human others in heterotopian climate changed futures Stories can help explore how we might feel in climate changed futures and

can help us to narrate a path through them This book uses Africanfuturist climate fiction to inspire new ways of challenging and enriching theoretical debates in global climate change politics including how we understand the places temporalities ecologies and politics of climate futures If we want to survive to tell new stories in liveable futures then we need to urgently and radically transform carboniferous capitalism Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization gender and political representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent's engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest Series Editors Nic Cheeseman University of Birmingham Peace Medie University of Bristol and Ricardo Soares de Oliveira University of Oxford Analog Science Fiction & Fact ,1998 **Book Review Digest** ,2000 **American Book Publishing Record** ,1998 **Braille Book Review** ,2002 The Cumulative Book Index ,1999 *Braille Books* Library of Congress. National Library Service for the Blind and Physically Handicapped,1999

*Children's Book Review Index* Gary C. Tarbert,1999 **Anthropocene Fictions** Adam Trexler,2015-04-20 Since the Industrial Revolution humans have transformed the Earth's atmosphere committing our planet to more extreme weather rising sea levels melting polar ice caps and mass extinction This period of observable human impact on the Earth's ecosystems has been called the Anthropocene Age The anthropogenic climate change that has impacted the Earth has also affected our literature but criticism of the contemporary novel has not adequately recognized the literary response to this level of environmental crisis Ecocriticism's theories of place and planet meanwhile are troubled by a climate that is neither natural nor under human control Anthropocene Fictions is the first systematic examination of the hundreds of novels that have been written about anthropogenic climate change Drawing on climatology the sociology and philosophy of science geography and environmental economics Adam Trexler argues that the novel has become an essential tool to construct meaning in an age of climate change The novel expands the reach of climate science beyond the laboratory or model turning abstract predictions into subjectively tangible experiences of place identity and culture Political and economic organizations are also being transformed by their struggle for sustainability In turn the novel has been forced to adapt to new boundaries between truth and fabrication nature and economies and individual choice and larger systems of natural phenomena Anthropocene Fictions argues that new modes of inhabiting climate are of the utmost critical and political importance when unprecedented scientific consensus has failed to lead to action Under the Sign of Nature Explorations in Ecocriticism

**The Publishers Weekly** ,1998      *Cumulated Index to the Books* ,1999      *Kilimanjaro* Mike Resnick,Michael D.
