**Scientific and Technical Aerospace Reports**, 1993 *Acoustic Waves* Marco G. Beghi, 2011-11-14 The concept of acoustic wave is a pervasive one which emerges in any type of medium from solids to plasmas at length and time scales ranging from sub micrometric layers in microdevices to seismic waves in the Sun s interior This book presents several aspects of the active research ongoing in this field Theoretical efforts are leading to a deeper understanding of phenomena also in complicated environments like the solar surface boundary Acoustic waves are a flexible probe to investigate the properties of very different systems from thin inorganic layers to ripening cheese to biological systems Acoustic waves are also a tool to manipulate matter from the delicate evaporation of biomolecules to be analysed to the phase transitions induced by intense shock waves And a whole class of widespread microdevices including filters and sensors is based on the behaviour of acoustic waves propagating in thin layers The search for better performances is driving to new materials for these devices and to more refined tools for their analysis *Apollo Program Pace and Progress* United States. Congress. House. Committee on Science and Astronautics, United States. Congress. House. Committee on Science and Astronautics. Subcommittee on NASA Oversight, 1967 This report is a summary of the status completed in December 1966 of the Apollo lunar landing program prior to the tragic deaths of Astronauts Grissom White and Chaffee preparing for the first manned Apollo flight This tragic accident will undoubtedly affect to some extent both the schedule and cost of the Apollo program However it does not alter the basic conclusions contained in this report nor the analysis provided **Materials Challenges and Testing for Supply of Energy and Resources** Thomas Böllinghaus, Jürgen Lexow, Teruo Kishi, Masaki Kitagawa, 2012-01-10 One major goal of the World Materials Research Institute Forum WMRIF is to promote young scientists in the field of materials science and engineering To enhance the international knowledge exchange between young postdoctoral scientists all over the world WMRIF meanwhile regularly organizes joint workshops among the member institutes These workshops also represent an increasingly appreciated platform to get known to each other and to build co operations For such workshops various topics are selected pointing to future perspectives and challenges in the field of Materials Science and Engineering This time the presentations of the workshop focused on the four subjects Challenges in conclusive realistic and system oriented materials testing Materials challenges for water supply Materials challenges in the extraction and recovery of scarce elements and minerals Materials challenges for nuclear fission and fusion This book comprises the peer reviewed contributions during the 2nd International Workshop for Young Materials Scientists at BAM Federal Institute for Materials Research and Testing Berlin Germany It also provides a very informative overview of recent results for all materials scientists *Entering the Race to the Moon* John P. Hornung, 2015 This is the autobiography of John P Hornung a rocket scientist during the early years of NASA s Apollo Mission to the moon The writing describes four chapters in his life Three of them were selected for their significance in U S history early school integration in the deep south

a period of brutality in the US Marine Corps and landing a man on the moon A fourth chapter includes short stories of John's Sea Scout adventures Chapter 1 The Silent Aftermath In the mid 1950s a battle bubbled to the surface between a group of Catholic intellectuals intent on removing segregation in New Orleans Catholic schools and their formidable segregationist foes In the battle's aftermath was a wake of difficult challenges my family had to face This is the account of the attempt to understand the consequences of this epic struggle The story begins with the description of the Hornung sibling's unusual childhood and the puzzles that surrounded it More than fifty years later the Silent Aftermath unraveled shocking discoveries of the mystery behind the difficulties we siblings encountered and the battle to integrate New Orleans Catholic schools Chapter 2 Abandon Ship Here is a collection of short stories of my teenage adventures in the Sea Scouts The stories include a harrowing attempt to survive a severe storm at sea an unusual way of winning first place in a Boy Scout District Camporee an encounter with the US Army and what it was like to attend a colorful Boy Scout World Jamboree While being adventurous and fun loving we took our seamanship seriously and met challenges in a responsible manner These stories are filled with wit and humor Every time I read these adventures I laugh out loud Maybe you will too Chapter 3 Private 1543868 I enlisted in the U S Marine Corps in my junior year of high school While I found my platoon's experiences during Marine Corps boot camp to be brutal at times I learned a half century later they were the dark side of Marine Corps life Although recruits experienced the blunt force of the dark side they and the public were not aware how entrenched it was from the 1950s thru the mid 1970s This came to light only after I read the book see Parris and Die Brutality in the U S Marines while researching material for this chapter This is the story of my encounter with the dark side and my attempts to survive it Chapter 4 To the Moon without Me After I graduated from college in 1963 I was hired by the Chrysler Corporation Space Division The company constructed the first stage of NASA's Saturn IB Space Launch Vehicle at NASA's Michoud Rocket Plant in New Orleans Louisiana Eventually I became a Reliability Engineer working in an organization that was the first to develop the mathematics and techniques of Artificial Intelligence This technology was applied to deciphering the weak points in the Saturn IB rocket's design The Saturn IB was critical to achieving the goal of landing a man on the moon and returning him to earth because it was NASA's workhorse in testing components of the giant Saturn V and its payload to the moon It launched and tested the Saturn V's third stage the Saturn IV B the Apollo spacecraft the Saturn's brain and the lunar lander The testing culminated with the Saturn IB's launch of Apollo 7 the first manned Apollo spacecraft With the very next mission Apollo 8 the Saturn V headed to the moon In this chapter I write of what I did after discovering that imaginary numbers were missing of an incident that may have led to my arrest of my attempt to discover what went wrong during a critical test of the Saturn IB's superstructure of the little known facts surrounding the fire atop Saturn IB 204 which killed three astronauts and of the unseen test flights of the Saturn IB This is the story of my exciting and demanding career in the race between the United States and the Russians to be the first to
