Isambard Kingdom Brunel Engineering Knight Errant By Adrian Vaughan:

Isambard Kingdom Brunel Adrian Vaughan,1991 This text chronicles the life of engineer Isambard Kingdom Brunel and diverges from Rolt's classic study of Brunel which largely omitted the more unsavoury aspects of his character Alongside his great achievements this book describes a man who was obstinate dictatorial and in the end paranoid **Brunel** Annabel Gillings,2006-05-01 Isambard Kingdom Brunel was the outstanding entrepreneurial Victorian engineer He helped construct the Thames Tunnel build the Great Western Railway and its terminus Paddington Station but his boldest endeavours were three gigantic ships Brunel R. Angus Buchanan,2024-06-27 This book traces the life of Isambard Kingdom Brunel 1806 1859 who is rightly revered as one of the greatest of all engineers His leading role in the transport revolution of the nineteenth century and especially in the building of the Great Western Railway left an indelible mark on the British landscape His achievements captured the imagination of his contemporaries and subsequent generations whilst his colossal energy and determination to carry out projects on the largest scale and to an extremely high standard set him apart from his rivals Brunel tells the story both of the engineer who followed his father Marc into what was then a new profession and of the man It explores his successes and failures at home and abroad including both the broad gauge GWR and the SS Great Eastern as R Angus Buchanan expertly brings out Brunel's imagination drive and inventiveness Above all it sets him in the context of his times showing both what made him who he was and how he made the most of the great opportunities offered to him 'a hole world of things very memorable' Martin Henig,Nigel Ramsay,2024-06-27 Julian Munby has gained a reputation over half a century in many branches of archaeological and historical knowledge His lively and warm character and sense of fun has made him many friends who also in some sense feel they are his pupils and this collection of papers has been assembled as a tribute in honour of his 70th birthday **Isambard Kingdom Brunel** Isambard Kingdom Brunel,2000 The Impact of Technological Change John Armstrong,David M. Williams,2017-10-18 This book presents an in depth study of the impact of the steamship on Britain during its first forty years roughly between 1810 and 1850 It relates the early steamship to several industrial themes including diffusion construction modernisation the role of government particularly the difficult attempt to align laissez faire politics with the greater need for public safety measures due to technological advance business and finance plus public reaction and tourism The aim is to establish the significance of the steamship as a conduit of modernisation and societal change It consists of a foreword introduction and fourteen chapters devoted to specific themes structured to ensure each chapters build on the preceding chapter's progress Collectively they demonstrate that the development of both experience and enterprise with steam power both gained and refined during this period made the mid century expansion of steamship technology across Britain possible Ultimately it establishes that steamship services began to adapt to oceanic routes steam began to integrate into the world economy and the age of sail began to draw to a close The Life of LTC Rolt Victoria Owens,2024-07-30 In 1926 Tom Rolt who was then sixteen years old abandoned his public school education Having

taken a job with a small firm of agricultural engineers he realized that he had found his life's calling. But the way ahead was neither smooth nor easy. Having secured a premium apprenticeship the firm which took him on foundered and although he eventually qualified as a mechanical engineer the 1930s depression made it almost impossible to find regular employment. Nothing daunted with the encouragement of his mysterious companion Cara he turned to writing. His literary career flourished alongside his association with the Vintage Sports Car Club the Inland Waterways Association and the Talylyn Railway. Between his Inland Waterways Association and Talylyn phases Angela his first wife left him to join Billy Smart's Circus and Sonia an actress turned boatwoman would become his second wife. Over the course of his life he produced over thirty books their subject matters ranging from canals and railways to engineering biography company histories a collection of accomplished ghost stories and a topographical survey of Worcestershire. He also wrote polemics about the plight of the craftsman in a world which relied increasingly upon mass production. In this book the first full length biography of Tom Rolt and a complement to his auto biographical Landscape trilogy Victoria Owens draws upon his surviving letters and unpublished manuscripts to tell the story of the engineer turned writer who made Britain's industrial past the stuff of enduring literature.

The Oxford Encyclopedia of Economic History Joel Mokyr, 2003. What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope and depth become fully evident in the Encyclopedia. Due to the interdisciplinary nature of the field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation. The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history.
