

2-3 Study Guide and Intervention

Extrema and End Behavior

End Behavior of Graphs of Functions The behavior of a graph at its ends is its **end behavior**. When the values of x are increasing toward infinity, this is denoted as $x \rightarrow +\infty$. When the values of x are decreasing toward negative infinity, this is denoted as $x \rightarrow -\infty$. The end behavior of a linear graph and the end behavior of a non-linear graph can be found. Even when two functions have very different graphic representations, they can have the same end behavior.

Example: Describe the end behavior of the graph.

Study the behavior on the left side of the graph.

The arrow on the left of the graph is pointing down. This means the values are decreasing.

When the values of x are decreasing, the values of $f(x)$ are decreasing.

So, the end behavior at the left end of the graph is “as $x \rightarrow -\infty$, $f(x) \rightarrow -\infty$.”

Study the behavior on the right side of the graph.

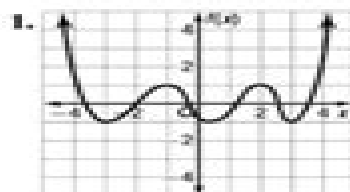

The arrow on the right of the graph is pointing up. This means the values are increasing.

When the values of x are increasing, the values of $f(x)$ are increasing.

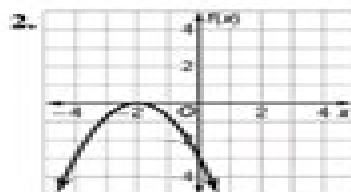

So, the end behavior at the right end of the graph is “as $x \rightarrow +\infty$, $f(x) \rightarrow +\infty$.”

Exercises

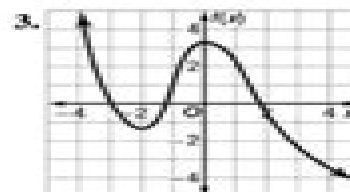

Describe the end behavior of the graph.

as $x \rightarrow -\infty$, $f(x) \rightarrow +\infty$;
as $x \rightarrow +\infty$, $f(x) \rightarrow +\infty$.

as $x \rightarrow -\infty$, $f(x) \rightarrow -\infty$;
as $x \rightarrow +\infty$, $f(x) \rightarrow -\infty$.

as $x \rightarrow -\infty$, $f(x) \rightarrow +\infty$;
as $x \rightarrow +\infty$, $f(x) \rightarrow -\infty$.
