Team Dynamics was a revolutionary book in the field of trauma care. The second edition of this text expands greatly on the initial CRM topics covered in the opening section of the book. Hot topics in CRM training including the concepts of followership and conflict resolution and highlights strategies such as mindfulness and others to manage stress and reduce burnout are discussed. The text also expands into novel areas of trauma care including less invasive bedside endovascular treatments such as REBOA (Resuscitative Endovascular Balloon Occlusion of the Aorta) and a more in depth discussion of teleresuscitation and trauma care in austere environments. Featuring 28 new chapters, the second edition of Trauma Team Dynamics is written by experts in trauma, critical care, emergency medicine, nursing, respiratory therapy and pre hospital care and include NASA and United States military affiliated experts. It is intended for use as both a day to day clinical resource and a reference text and includes self assessment questions as well as guidance on CRM curriculum design and implementation.
