Measuring The World By Daniel Kehlmann:

Die Vermessung der Welt Daniel Kehlmann, 2009-10-05 Eine literarische Sensation Guardian Mit hintergründigem Humor schildert Daniel Kehlmann das Leben zweier Genies Alexander von Humboldt und Carl Friedrich Gauß Er beschreibt ihre Sehnsüchte und Schwächen ihre Gratwanderung zwischen Leichterlichkeit und Größem Scheitern und Erfolg Ein philosophischer Abenteuerroman von seltener Phantasie Kraft und Brillanz Ein großes Buch ein genialer Streich Frankfurter Rundschau Urkomisch und herzerregend Time Magazine Ein wahrhaft reicher und bahnbrechender Roman Nouvel Observateur Daniel Kehlmanns Roman über Gauß und den Naturforscher Alexander von Humboldt ist die leichtfüßig ineinander verwobene Doppelbiographie zweier großer Gelehrter so unterhaltsam und humorvoll und auf schwerelose Weise tiefgründig und intelligent wie man es hierzulande kaum für möglich hält Frankfurter Allgemeine Zeitung

Measuring the World Daniel Kehlmann, 2010-10-04 Measuring the World recreates the parallel but contrasting lives of two geniuses of the German Enlightenment the naturalist and explorer Alexander von Humboldt and the mathematician and physicist Carl Friedrich Gauss Towards the end of the 18th century these two brilliant young Germans set out to measure the world Humboldt a Prussian aristocrat schooled for greatness negotiates savannah and jungle climbs the highest mountain then known to man counts head lice on the heads of the natives and explores every hole in the ground Gauss a man born in poverty who will be recognised as the greatest mathematician since Newton does not even need to leave his home in Göttingen to know that space is curved He can run prime numbers in his head cannot imagine a life without women and yet jumps out of bed on his wedding night to jot down a mathematical formula Measuring the World is a novel of rare charm and readability distinguished by its sly humour and unforgettable characterization It brings the two eccentric geniuses to life their longings and their weaknesses their balancing act between loneliness and love absurdity and greatness failure and success

Measuring the World Proof Daniel Kehlmann, 2006-10-08 *Space, Time and the Limits of Human Understanding* Shyam Wuppuluri, Giancarlo Ghirardi, 2016-12-01 In this compendium of essays some of the world's leading thinkers discuss their conceptions of space and time as viewed through the lens of their own discipline With an epilogue on the limits of human understanding this volume hosts contributions from six or more diverse fields It presumes only rudimentary background knowledge on the part of the reader Time and again through the prism of intellect humans have tried to diffract reality into various distinct yet seamless atomic yet holistic independent yet interrelated disciplines and have attempted to study it contextually Philosophers debate the paradoxes or engage in meditations dialogues and reflections on the content and nature of space and time Physicists too have been trying to mold space and time to fit their notions concerning micro and macro worlds Mathematicians focus on the abstract aspects of space time and measurement While cognitive scientists ponder over the perceptual and experiential facets of our consciousness of space and time computer scientists theoretically and practically try to optimize the space time complexities in storing and retrieving data information The list is never ending

Linguists logicians artists evolutionary biologists geographers etc all are trying to weave a web of understanding around the same duo However our endeavour into a world of such endless imagination is restrained by intellectual dilemmas such as Can humans comprehend everything Are there any limits Can finite thought fathom infinity We have sought far and wide among the best minds to furnish articles that provide an overview of the above topics We hope that through this journey a symphony of patterns and tapestry of intuitions will emerge providing the reader with insights into the questions What is Space What is Time Chapter 15 of this book is available open access under a CC BY 4 0 license

Spatial Turns Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies

Metabiography Caitríona Ní Dhúill, 2020-03-09 This book explores the contradictions of biography It charts shifting approaches to the writing and reading of biographies from post hagiographical attitudes of the Enlightenment heroic biographies of Romanticism and irreverent modernist portraits through to contemporary experiments in politically committed and hybrid forms of life writing The book shows how biographical texts in fact destabilise the models of historical visibility cultural prominence and narrative coherence that the genre itself seems to uphold Addressing the fraught relationships between genre and gender private and public image and text life and narrative that play out in the modern biographical tradition Metabiography suggests new possibilities for reading writing and thinking about this enduringly popular genre

Topophrenia Robert T. Tally, 2018-11-09 What is our place in the world and how do we inhabit understand and represent this place to others Topophrenia gathers essays by Robert Tally that explore the relationship between space place and mapping on the one hand and literary criticism history and theory on the other The book provides an introduction to spatial literary studies exploring in detail the theory and practice of geocriticism literary cartography and the spatial humanities more generally The spatial anxiety of disorientation and the need to know one's location even if only subconsciously is a deeply felt and shared human experience Building on Yi Fu Tuan's topophilia or love of place Tally instead considers the notion of topophrenia as a

simultaneous sense of place consciousness coupled with a feeling of disorder anxiety and dis ease He argues that no effective geography could be complete without also incorporating an awareness of the lonely loathsome or frightening spaces that condition our understanding of that space Tally considers the tension between the objective ordering of a space and the subjective ways in which narrative worlds are constructed Narrative maps present a way of understanding that seems realistic but is completely figurative So how can these maps be used to not only understand the real world but also to put up an alternative vision of what that world might otherwise be From Tolkien to Cervantes Borges to More Topophrenia provides a clear and compelling explanation of how geocriticism the spatial humanities and literary cartography help us to narrate represent and understand our place in a constantly changing world

The Palgrave Handbook of Literature and Mathematics Robert Tubbs,Alice Jenkins,Nina Engelhardt,2020-12-30 This handbook features essays written by both literary scholars and mathematicians that examine multiple facets of the connections between literature and mathematics These connections range from mathematics and poetic meter to mathematics and modernism to mathematics as literature Some chapters focus on a single author such as mathematics and Ezra Pound Gertrude Stein or Charles Dickens while others consider a mathematical topic common to two or more authors such as squaring the circle chaos theory Newton s calculus or stochastic processes With appeal for scholars and students in literature mathematics cultural history and history of mathematics this important volume aims to introduce the range fertility and complexity of the connections between mathematics literature and literary theory Chapter 1 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](http://link.springer.com) [http link.springer.com](http://link.springer.com)

Narrative Ethics Jakob Lothe,2013-09-01 While Plato recommended expelling poets from the ideal society W H Auden famously declared that poetry makes nothing happen The 19 contributions to the present book avoid such polarized views and responding in different ways to the ethical turn in narrative theory explore the varied ways in which narratives encourage readers to ponder matters of right and wrong All work from the premise that the analysis of narrative ethics needs to be linked to a sensitivity to esthetic narrative form The ethical issues are accordingly located on different levels Some are clearly presented as thematic concerns within the text s considered while others emerge through or are generated by the presentation of character and event by means of particular narrative techniques The objects of analysis include such well known or canonical texts as Biblical Old Testament stories Mark Twain s Huckleberry Finn J R R Tolkien s The Lord of the Rings Vladimir Nabokov s Lolita Jonathan Littell s The Kindly Ones Ann Radcliffe s The Italian and Matthew Lewis s The Monk Others concentrate on less well known texts written in languages other than English There are also contributions that investigate theoretical issues in relation to a range of different examples

State of Affairs Richard J Coleman,2015-03-26 The last sixty years have witnessed a virtual explosion of interest in how modern science and traditional Christianity intersect This new rapprochement with science has irrevocably altered how Christians think of God providing a foundation from which we cannot retreat but from which we also cannot

move forward until we examine the presumptions on which it is based For the first time Richard J Coleman interprets in a clear and meaningful way the themes and practitioners that make this rapprochement different and what it has achieved But this book is more than description it is an inquiry into whether Christian theology has lost its authentic voice by its singular focus on accommodating modern science **Alexander von Humboldt** Andreas W. Daum,2024-10-22 An engaging account of the life and work of the legendary polymath Alexander von Humboldt In this lucid biography Andreas Daum offers a succinct and novel interpretation of the life and oeuvre of Alexander von Humboldt 1769 1859 A Prussian nobleman born into the age of European Enlightenment Humboldt was a contemporary of Napoleon Sim n Bol var and Charles Darwin As a naturalist and scholar he traveled the world from the Americas to Central Asia and recorded his observations in multiple volumes Humboldt is still admired today for his interdisciplinary outreach and ecological awareness Moving beyond the conventional views of Humboldt as either intellectual superhero or gentleman colonizer Daum s incisive account focuses on Humboldt in the context of the tumultuous period of history in which he lived Humboldt embodied the contradictions that marked the age of Atlantic Revolutions He became a critic of slavery and embraced the emerging civil society but remained close to authoritarian rulers He dedicated his life to scientific research yet was driven by emotional impulses and pleaded for an aesthetic appreciation of nature Daum introduces a man passionately striving to establish a cosmic understanding of nature while grappling with the era s explosion of knowledge This book provides the first concise biography of Humboldt covering all periods of his life exploring his personality the vast range of his works and his intellectual networks Daum helps us understand Humboldt as a seminal historical figure and illuminates the role of science at the dawn of the global world

Alexander von Humboldt's Transatlantic Personae Vera Kutzinski,2014-06-11 Who was Alexander von Humboldt Was he really a lone genius Was he another European apologist for colonialism in the Americas or the father of Latin American independence Was he a roving Romanticist or did his sensibilities belong to the Enlightenment Naturalist philosopher historian and proto sociologist to name just some of the fields to which he contributed Humboldt is impossible to contain in a single identity or definition His voluminous writings range across so many different fields of knowledge that his scholarly scientific personae multiplied even during his lifetime and they have continued to proliferate since his death in 1859 A household word throughout the nineteenth century Humboldt was eventually eclipsed by Charles Darwin whose own travels had been motivated by Humboldt s and disappeared from view for much of the twentieth century notably in the United States The essays in this collection testify to the renewed interest that Alexander von Humboldt s multi faceted work is inspiring in the twenty first century especially among cultural and literary historians from both sides of the Atlantic This book was originally published as a special issue of Atlantic Studies **The German Puzzle** Paul Drexler,2010-09-23 More Americans claim ancestry from Germany than from any other nation We speak a Germanic language and from fairy tales to Freud were surrounded by German influences Yet America has lost touch with its German heritage We simply cant fathom

how the land of Beethoven and Goethe could have been responsible for WW II and the Holocaust In *The German Puzzle* the author recounts his own journey of rediscovery Drawing on a unique mix of personal and family experience ranging from schoolyard fisticuffs to the exuberance of the New Berlin he offers us a fresh perspective on the German world and how it shaped America *The Novel in German since 1990* Stuart Taberner, 2011-09-01 Diversity is one of the defining characteristics of contemporary German language literature not just in terms of the variety of authors writing in German today but also in relation to theme form technique and style However common themes emerge the Nazi past transnationalism globalisation migration religion and ethnicity gender and sexuality and identity This book presents the novel in German since 1990 through a set of close readings both of international bestsellers including Daniel Kehlmann's *Measuring the World* and W G Sebald's *Austerlitz* and of less familiar but important texts such as Yad Kara's *Selam Berlin* Each novel discussed in the volume has been chosen on account of its aesthetic quality its impact and its representativeness the authors featured among them Nobel Prize winners G nter Grass Elfriede Jelinek and Herta and Paul Amirian demonstrate the energy and quality of contemporary writing in German *Imperial Fictions* Todd Kontje, 2018-04-25 Rethinks German literature by challenging the notion that national literature is the narrative of a spiritually united people

Transnationalism and German-Language Literature in the Twenty-First Century Stuart Taberner, 2017-03-01 This book examines how German language authors have intervened in contemporary debates on the obligation to extend hospitality to asylum seekers refugees and migrants the terrorist threat post 9 11 globalisation and neo liberalism the opportunities and anxieties of intensified mobility across borders and whether transnationalism necessarily implies the end of the nation state and the dawn of a new cosmopolitanism The book proceeds through a series of close readings of key texts of the last twenty years with an emphasis on the most recent works Authors include Ter zia Mora Richard Wagner Olga Grjasnowa Marlene Streeruwitz Vladimir Vertlib Navid Kermani Felicitas Hoppe Daniel Kehlmann Ilija Trojanow Christian Kracht and Christa Wolf representing the diversity of contemporary German language writing Through a careful process of juxtaposition and differentiation the individual chapters demonstrate that writers of both minority and nonminority backgrounds address transnationalism in ways that certainly vary but which also often overlap in surprising ways

Translation Review , 2007

Germany - A Nation in a Dilemma - Essays Hermann Selchow, 101-01-01 Germany A Nation in a Dilemma Almost a Declaration of Love Germans seem to love their defeats like other nations love their victories Why This nation which licks its history like a wound and takes pleasure in doing so is the subject of a book that dissects the dilemma of an entire culture Germany A Nation in a Dilemma Almost a Declaration of Love Germany a country that has turned failure into an art form The author of this provocative work Hermann Selchow dissects the German soul with the precision of a pathologist and the tenderness of a lover The result a literary X ray of a nation sometimes exaggerated but always close to the truth The famous German thoroughness reveals itself as systematic self dismantling the drive for perfection as paralysis through analysis Coming to terms with the past becomes a denial of the present A people that wears its neuroses like medals and forgets how to live But this book is no cheap voyeurism of German defects It is a diagnosis with heart a criticism without contempt The author himself a member of this people not only exposes the mechanisms of German self sabotage but also demonstrates its productive power For those who destroy themselves so virtuously also master the art of renewal German readers will feel caught out and perhaps for the first time be able to smile at their own abysses Foreigners will gain insight into the psychic landscape of a people who guard their traumas like relics Sociologists and psychologists may find material for years of analysis The book is written in the style of a loving postmortem perceptive without coldness ironic without cynicism A rare balance between science and humanity The question for the future remains Can the Germans overcome their self destruction Or is it perhaps their most precious asset The author offers no easy answers but the right questions Germany A Nation in a Dilemma is therapy as literature

social criticism as an act of love A book for all who want to understand Germany and for Germans who finally want to tolerate themselves
