The Idea of the Avant Garde Marc James Léger, 2019-10-15 The concept of the avant garde is highly contested whether one consigns it to history or claims it for present day or future uses The first volume of The Idea of the Avant Garde And What It Means Today provided a lively forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism This second volume presents the work of another 50 artists and writers exploring the diverse ways that avant gardism develops reflexive and experimental combinations of aesthetic and political praxis The manifest strategies temporalities and genealogies of avant garde art and politics are expressed through an international intergenerational and interdisciplinary convocation of ideas that covers the fields of film video architecture visual art art activism literature poetry theatre performance intermedia and music **The Oxford Handbook of Postcolonial Biblical Criticism** R. S. Sugirtharajah, 2023 The Oxford Handbook of Postcolonial Biblical Criticism is a comprehensive treatment of a relatively new form of scholarship Generally speaking postcolonialism

Rereading Marx in the Age of Digital Capitalism Christian Fuchs,2019-10-20 The end of history has not taken place Ideological and economic crisis and the status quo of neoliberal capitalism since 2008 demand a renewed engagement with Marx But if we are to effectively resist capitalism we must truly understand Marx Marxism today must theorise how communication technologies media representation and digitalisation have come to define contemporary capitalism There is an urgent need for critical Marxian inspired knowledge as a foundation for changing the world and the way we communicate from digital capitalism towards communicative socialism and digital communism Rereading Marx in the Age of Digital Capitalism does exactly this Delving into Marx s most influential works such as Capital The Grundrisse Economic and Philosophic Manuscripts The German Ideology and The Communist Manifesto Christian Fuchs draws out Marx s concepts of machinery technology communication and ideology all of which anticipate major themes of the digital age A concise and coherent work of Marxist media and communication theory the book ultimately demonstrates the relevance of Marx to an age of digital and communicative capitalism

The Falling Rate of Learning and the Neoliberal Endgame David Blacker,2013-12-13 The current neoliberal mutation of capitalism has evolved beyond the days when the wholesale exploitation of labor underwrote the world system s expansion While normal business profits plummet and theft by finance rises capitalism now shifts into a mode of elimination that targets most of us along with our environment as waste products awaiting managed disposal The education system is caught in the throes of this eliminationism across a number of fronts crushing student debt impatience with student expression the looting of vestigial public institutions and finally as coup de gr ce an abandonment of the historic ideal of universal education Education reform is powerless against eliminationism and is at best a mirage that diverts oppositional energies The very idea of education activism becomes a comforting fiction Educational institutions are strapped into the eliminationist project the neoliberal endgame in a way that admits no escape even despite the heroic gestures of a few The school systems that capitalism has built and directed over the last two centuries are fated to go down with the ship It is rational therefore for educators to cultivate a certain pessimism Should we despair Why yes we should but cheerfully as confronting elimination mortality is after all our common fate There is nothing and everything to do in order to prepare

Housing the Environmental Imagination Peter Quigley,2011-10-18 The last few decades have seen an explosion of interest in literature and the sense of place Many essays books and presentations have explored the aesthetics politics and urgency of understanding and appreciating the unique qualities of coasts mountains deserts bioregions and more Little attention

however has been given to the process of establishing residence in these special places and what it means to make a life there. Housing the Environmental Imagination focuses directly on this omission by examining the writing houses and lives of Thoreau, Robinson, Jeffers, Gary, Snyder, Wendell Berry, Scott Russell Sanders, Arne Naess, Mary Austin, Jack London, and many others. In addition to addressing the lack of study on this theme of living in place, Quigley adds a crucial additional element: living and writing in place. The unique aspect of this study is the selection of those writers whose writing project is inseparable from the living project. In other words, without the cabin at the pond, there would be no Walden. The same can be said of Snyder's Kitkitdizze and Jeffers' Tor House and Hawk Tower. Therefore, it's Quigley's intention to throw open the issue of the meaning of houses and to explore the role houses play in the lives of some of the more well-known nature writers. Thoreau is cited by Quigley as a good point of departure for examining the meaning and role of houses. Most men appear never to have considered what a house is. In this way, Quigley claims to have identified a new genre of writing and in the process pushes back against postmodern approaches. This writing, connected inseparably to house and region, depends on and is anchored in experience and to a world of natural processes and values. An interesting aspect of the book is the way Quigley takes this basic formula: place, house, writing, and examines how lifestyle and ritual are associated with place, house, and writing. In addition, this triad also is seen to work its way forward in different historical times and pressures. Quigley examines the different political, social, and architectural pressures felt by these writers in the 19th and early and late 20th centuries. The conclusion of this study points forward, however, as the title of the last chapter suggests: Alternative Futures. Quigley takes as his guiding theme throughout two polar thoughts from Thoreau that govern the writers under examination as well as Quigley's approach. Thoreau championed the heroic virtue of the imagination in practical terms by urging folks to move confidently in the direction of one's dreams. By doing so, if one endeavors to live the life he has imagined, he will meet with a success unexpected in common hours. Again, the practical and the imaginative are brought together with Thoreau's other claim that it is vain to sit down to write when you have not stood up to live. Nature, war, individualism, love, family, stone, wood, glass, ocean, mountains, farming, community, and more come together in this broad-ranging discussion. This is a book about writers in place, but it also is about rethinking how we might live the best lives we can every day. Essentially, this book addresses the long-standing question: And how shall we live? <http://housesinthepoeticwild.org> Radical Ecopsychology, Second Edition Andy Fisher, 2013-01-01. Expanded new edition of a classic examination of the psychological roots of our ecological crisis. **Marx's Ethical Vision** Vanessa Christina Wills, 2024. A central debate among scholars of Marx concerns whether Marxism has a moral content or is totally amoral, perhaps either because it embraces a strict economic determinism or because it nihilistically sides with the proletariat without offering any objective justification for that stance. Philosopher Vanessa Christina Wills argues that Marx does articulate an ethical perspective that is present throughout his writings, both the more obviously humanistic and philosophical early writings and his later economic and more empirically grounded

studies such as Capital The purposiveness of labor gives rise to a normativity already inherent in the present state of things one that can guide us in knowing what sort of world we should build and that further prepares us to build it **Desire, Faith, and the Darkness of God** Eric Bugyis, David Newheiser, 2015-11-15 In the face of religious and cultural diversity some doubt whether Christian faith remains possible today Critics claim that religion is irrational and violent and the loudest defenders of Christianity are equally strident In response *Desire Faith and the Darkness of God* Essays in Honor of Denys Turner explores the uncertainty essential to Christian commitment it suggests that faith is moved by a desire for that which cannot be known This approach is inspired by the tradition of Christian apophatic theology which argues that language cannot capture divine transcendence From this perspective contemporary debates over God's existence represent a dead end if God is not simply another object in the world then faith begins not in abstract certainty but in a love that exceeds the limits of knowledge The essays engage classic Christian thought alongside literary and philosophical sources ranging from Pseudo Dionysius and Dante to Karl Marx and Jacques Derrida Building on the work of Denys Turner they indicate that the boundary between atheism and Christian thought is productively blurry Instead of settling the stale dispute over whether religion is rationally justified their work suggests instead that Christian life is an ethical and political practice impassioned by a God who transcends understanding **The Ellen Meiksins Wood Reader** Ellen Meiksins Wood, 2012-10-12 Ellen Meiksins Wood is a leading contemporary political theorist who has elaborated an innovative approach to the history of political thought the social history of political theory She has been described as the founder together with the historian Robert Brenner of Political Marxism a distinct version of historical materialism which has inspired a research program that spans a number of academic disciplines Organized thematically this Reader brings together selections from Wood's groundbreaking scholarship published over three decades providing an overview of her original interpretations of capitalism precapitalist societies the state political theory democracy citizenship liberalism civil society the Enlightenment globalization imperialism and socialism **Radically Open** Robert F. Shedinger, 2012-11-09 America stands in the throes of an anxiety epidemic yet Americans live in one of the most religious countries in the world Shouldn't people with deep spiritual roots be less vulnerable to emotional suffering Such an enigma stands at the center of this book but the enigma turns out to be more apparent than real The overt religiosity so characteristic of modern American society ironically serves to foster the anxiety epidemic by locking people into a disenchanted secular mindset leaving them cut off from the deep spiritual resources they so desperately need in the face of mounting anxiety Based on the author's own journey through the darkness of anxiety in conversation with the psychology of Carl Jung this book argues that transcending religious identity and submitting to the greater wisdom of the cosmic story holds a powerful key to resolving anxiety and creating a more just and sustainable world Surprisingly the Islamic tradition may provide one of the best models for how to accomplish this *The Song of Ascents* Tom Hiney, 2022-06-01 The Truth is bigger than we are and if it comes for us everything might break open It falls from

heaven writes Tom Hiney It can fall at four in the morning when you are cold with insomnia and it can refuse to fall when advertised It has a life of its own and sometimes appears with a special intensity God calls whether we are ready or not The Song of Ascents tells the stories of lives laid bare by love stories that over the years gradually spurred acclaimed English biographer Tom Hiney up the ragged mountain of his own conversion to Roman Catholicism These stories he says are about people turning to God in horrible moments with faltering human hearts like mine and finding Him to be faithful Written in lean vigorous prose the book is a visceral study of faith in which the holiness of other men and women leads the writer to realize that despite everything anything is possible with God even joy A medieval king awaiting a Viking invasion King Alfred a Jesuit evangelist at the court of Akbar Father Monserrate a West African prince in 1890s Indiana Samuel Morris and a composer in Communist Poland Henryk G recki as well as a trapped Arctic whaling vessel the Diana a lost explorer David Livingstone a disobedient general Charles Gordon and an aging war hero the author s own father all these become unlikely companions in Hiney s messy fumbling journey to Christ The Song of Ascents is about coming to faith through stories including the humanly incredible storytelling of the Church s unique heavenly and inevitable destiny Critical Practice from Voltaire to Foucault, Eagleton and Beyond John E. O'Brien,2013-11-15 Using the historical materialist method to unravel the promise and limits of critical practice since the Revolutionary Age John E O'Brien investigates the problems and prospects of cultural criticism for the 21st century through absorbing studies of the contested perspectives of Voltaire Friedrich Schiller Jean Baudrillard Michel Foucault Terry Eagleton and Hayden White In spite of recurrent crises due to a flawed Western political economy why is there so much critical intellectual activity with so little effect Framing his study with the early work by Max Horkheimer Luc Boltanski and Teresa Ebert O'Brien s investigation of resistance in America and Europe challenges the bourgeois philosophy of history pointing to the urgency of critique as mode of analysis and intervention **Marx in the Age of Digital Capitalism** ,2015-09-29 More than 130 years after Karl Marx s death and 150 years after the publication of his opus magnum Capital Critique of Political Economy capitalism keeps being haunted by period crises The most recent capitalist crisis has brought back attention to Marx s works This volume presents 16 contributions that show how Marx s analyses of capitalism the commodity class labour work exploitation surplus value dialectics crises ideology class struggles and communism help us to understand the Internet and social media in 21st century digital capitalism Marx is back This book is a key resource on the foundations of Marxist Internet and Digital Media Studies **The Coming Jesus and the Anthropocene** Ryan LaMothe,2024-02-22 Melting glaciers and icecaps massive forest fires enormous storms extensive and prolonged flooding and desertification of large tracts of land are realities we currently face and will continue to struggle with as a result of climate change Our climate crisis invites if not demands a critical evaluation of our political religious economic and cultural narratives and rituals that give rise to our ways of relating to one another to other species and to planet Earth This book argues that the climate emergency exposes deep problematic roots of Western

religious and political paradigms and apparatuses that undergird ideas of and methods for human flourishing In particular Western religious and political philosophies have produced and maintained a radical rift between human beings and other species as well as beliefs about human dominion over other species and the earth These ideas and practices are responsible for the colonization of Nature and for climate change Understanding these sources invites a radical reimaging of our religious ideas and practices Specifically this book proposes a coming Jesus a form of life that traverses the rift while denying human and divine dominion for the sake of recognizing and respecting the singularities and flourishing of all species
