An Introduction to Computational Risk Management of Equity-Linked Insurance Runhuan Feng,2018-06-13 The
quantitative modeling of complex systems of interacting risks is a fairly recent development in the financial and insurance
industries Over the past decades there has been tremendous innovation and development in the actuarial field In addition to
undertaking mortality and longevity risks in traditional life and annuity products insurers face unprecedented financial risks
since the introduction of equity linking insurance in 1960s As the industry moves into the new territory of managing many
intertwined financial and insurance risks non traditional problems and challenges arise presenting great opportunities for
technology development Today s computational power and technology make it possible for the life insurance industry to
develop highly sophisticated models which were impossible just a decade ago Nonetheless as more industrial practices and
regulations move towards dependence on stochastic models the demand for computational power continues to grow While
the industry continues to rely heavily on hardware innovations trying to make brute force methods faster and more palatable
we are approaching a crossroads about how to proceed An Introduction to Computational Risk Management of Equity Linked
Insurance provides a resource for students and entry level professionals to understand the fundamentals of industrial
modeling practice but also to give a glimpse of software methodologies for modeling and computational efficiency Features
Provides a comprehensive and self contained introduction to quantitative risk management of equity linked insurance with
exercises and programming samples Includes a collection of mathematical formulations of risk management problems
presenting opportunities and challenges to applied mathematicians Summarizes state of arts computational techniques for
risk management professionals Bridges the gap between the latest developments in finance and actuarial literature and the
practice of risk management for investment combined life insurance Gives a comprehensive review of both Monte Carlo
simulation methods and non simulation numerical methods Runhuan Feng is an Associate Professor of Mathematics and the
Director of Actuarial Science at the University of Illinois at Urbana Champaign He is a Fellow of the Society of Actuaries and
a Chartered Enterprise Risk Analyst He is a Helen Corley Petit Professorial Scholar and the State Farm Companies
Foundation Scholar in Actuarial Science Runhuan received a Ph D degree in Actuarial Science from the University of
Waterloo Canada Prior to joining Illinois he held a tenure track position at the University of Wisconsin Milwaukee where he
was named a Research Fellow Runhuan received numerous grants and research contracts from the Actuarial Foundation and
the Society of Actuaries in the past He has published a series of papers on top tier actuarial and applied probability journals
on stochastic analytic approaches in risk theory and quantitative risk management of equity linked insurance Over the recent

years he has dedicated his efforts to developing computational methods for managing market innovations in areas of investment combined insurance and retirement planning The Writers Directory ,2013 **"Code of Massachusetts regulations, 2014"** ,2014 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 **Group Insurance** William F.
