

## 10.1 Cell Growth, Division, and Reproduction

### Lesson Objectives

-  Explain the problems that growth causes for cells.
-  Compare asexual and sexual reproduction.

### Lesson Summary

**Limits to Cell Size** There are two main reasons why cells divide:

- ▶ **Information "overload":** The larger a cell gets, the more demands it places on its DNA. Eventually, the cell's DNA cannot meet the cell's needs.
- ▶ **Exchange of materials:** Cells take in nutrients and eliminate wastes through the cell membrane.
  - The larger a cell's volume, the more materials it needs to function and the more waste it creates.
  - A cell's volume increases at a faster rate than its surface area. As a cell grows, its surface-area-to-volume ratio becomes too small.
  - The larger a cell gets, the harder it is for enough materials to move across its cell membrane.
- ▶ **Cell division** solves the information overload and materials exchange problems.

**Cell Division and Reproduction** Cell division is part of both types of reproduction:

- ▶ **Asexual reproduction:**
  - produces genetically identical organisms.
  - occurs in many single-celled organisms and in some multicellular organisms.
  - allows rapid reproduction of organisms in favorable environments.
- ▶ **Sexual Reproduction:**
  - produces organisms with genetic information from both parents.
  - occurs in most animals and plants and in many single-celled organisms.
  - increases genetic diversity, which aids species survival in changing environments.

### Limits to Cell Size

For Questions 1–4, write *True* if the statement is true. If the statement is false, change the underlined word or words to make the statement true.

| <u>True</u>           | 2. The amount of activity in a cell is related to its <u>volume</u> .                                    |
| <u>larger</u>         | 3. The smaller the cell, the <u>smaller</u> its ratio of surface area to volume.                         |
| <u>True</u>           | 4. The <u>information crisis</u> in a cell is solved by the replication of the DNA before cell division. |
