Homeland another approach Ulici Claudiu-Octavian, In a dialogue by Plato a text that has generated many fantasies and detached from this I identify a large number of elements which are specific to Proto Indo European culture This allows me to formulate the hypothesis that the subject in question was this ancient civilization Based on that assumption I discover a lot of unique information that needs to be studied and especially new data on what we call Homeland as a place of formation of the culture and language of the Proto Indo Europeans Even if the original text is far from the scientific rigor of today the relevant cultural elements point for example to a much earlier discovery 360 BC to the period of formation of that proto civilization its three social functions the theme of the earth of the blessed the divine twins or confirm many other contemporary discoveries The Rise and Fall of Atlantis J S Gordon, 2012-01-01 Could the lost civilization of Atlantis provide the about the subject answer to the origins of human existence In his controversial new study John Gordon examines the evidence and makes some startling discoveries Though many have dismissed Plato's account of the vanished continent and its people as fantasy Gordon argues that not only is the story true but it s a brilliant and complex metaphor for cosmic creation Gordon s research leads him to oppose modern scientific orthodoxy on a range of accepted ideas from the Big Bang theory to Darwinian evolution He questions the concept that humans emerged relatively recently the notion that dinosaurs became extinct due to an asteroid impact and the belief that present day global warming has a human cause It s an eye opening look at our world The Atlantis Legacy Vahag Avetisian, 2025-07-19 In the fourth century BCE within the marble halls of Athens Academy a philosopher named Plato penned what would become one of history s most enduring mysteries Through the dialogues of Timaeus and Critias he introduced the world to Atlantis a magnificent island civilization that had supposedly vanished beneath the waves nine thousand years before his time What Plato could never have imagined was that his philosophical allegory would captivate human imagination for over two millennia spawning countless expeditions theories and cultural interpretations that continue to this day The story as Plato tells it unfolds through the voice of Critias who claims to have heard the tale from his grandfather who in turn learned it from the great Athenian lawgiver Solon According to this narrative chain Solon had visited Egypt and spoke with priests in the temple of Neith at Sais where ancient records supposedly preserved the memory of this lost civilization The priests described Atlantis as an island larger than Libya and Asia combined situated beyond the Pillars of Hercules in what we now know as the Atlantic Ocean Plato's Atlantis was no ordinary civilization He described a society of extraordinary technological and architectural achievement with a capital city arranged in concentric circles of alternating land and water The Atlanteans had mastered engineering on a scale that seemed almost

supernatural creating harbors bridges and tunnels that connected their island s various districts Their palaces were adorned with gold silver and the mysterious metal orichalcum which Plato claimed was more precious than any metal save gold itself

Mythical Geography Jasper Quincy, AI, 2025-05-06 Mythical Geography embarks on a captivating journey to uncover the real world inspirations behind fabled locations It investigates how geographical phenomena historical events and ancient cultures may have given rise to enduring myths like Atlantis El Dorado and the Garden of Eden The book uniquely combines the disciplines of history earth sciences and geography to explore these connections revealing how early civilizations perceived and interpreted their surroundings Did you know for instance that the legend of Atlantis may have roots in actual volcanic eruptions or geological events Or that tales of El Dorado could be linked to early explorations of South America and the perception of its resources The book examines a range of mythical places from well known examples to lesser known tales such as Thule and Agartha drawing on historical accounts archaeological discoveries and geological records It argues that many celebrated mythical geographies are not pure invention but are rooted in or influenced by real world locations By exploring these connections the book offers a fresh perspective on cultural history environmental perception and the interplay between human imagination and the physical world The book progresses by first introducing the core concept then exploring well known mythical locations and finally delving into lesser known examples from various cultures Atlantis, Legions of Overstar D.W. records of Egypt Iran Mexico and Japan they reveal that ancient myths of floods lost island paradises and visits from advanced godlike peoples from all corners of the globe all point to the same worldwide catastrophe that resulted in Atlantis s demise The authors explain how the remaining Atlanteans amid massive earthquakes and epic floods evacuated and spread throughout the world resulting in the birth of the first known civilizations Including rare material from the archives of Charles Hapgood Albert Einstein and Dwight D Eisenhower the Flem Aths explain how an earth crust displacement could happen again in the future perhaps in correspondence with high solar activity With new scientific genetic and linguistic evidence in support of Antarctica as the location of long lost Atlantis this updated edition convincingly shows that Atlantis was not swallowed by the sea but was entombed beneath miles of polar ice Atlantis and the Alien Presence Dr. David Klooz, 2019-11-26 The current world isn t just full of mysteries it is made up of them You could spend your life investigating the murders of the Kennedys the identity of Jack the Ripper or studying UFOs crop circles cattle mutilations ley lines Atlantis or other strange phenomena Each of these mysteries has its authorities and its counter authorities its supporters and its detractors all of whom are full of information and expertise but truly offer nothing more than opinions Realistically these people are myth makers with the object of establishing their own particular myth gaining wide official acceptance for it as authorities and thus for a time making it the TRUTH This has been mankind s biggest fault in this cycle of humankind s experiences on the Earth that is the belief that authority provides the truth rather than the truth provides the authority Even worse it could be this has consistently been humankind s fault during all the previous cycles of humankind s existences on Earth and those have been many In Western society while a very small minority of the current authorities know what or at least part of what the truth is the last thing they want to do is share it with the masses the 99 99% of the human population they consider useless eaters and subjects In general everything we think we know is a lie or a partial lie perpetuated by this very small group of individuals Since the earliest time of civilizations this group has not shared Information with the individuals of the world Since this current cycle of civilization began following the cataclysm of 10 400 BCE and the sinking of Atlantis the most important information and knowledge concerning our true origins and history has been withheld That which rightly belongs to us has been destroyed buried ignored suppressed misrepresented weaponized or purposely confused by disinformation under the auspices of the so called authorities In the West the authorities want to keep us occupied and non thinking with reality television shows televised sports sixty hour work weeks alcohol and drug abuse texting on our iPhones believing in the lies or partial lies they want us to believe in and leave the thinking to them Religious institutions the educational system the justice system the economic system the media and even secret societies have been infiltrated and usurped by these individuals and others with the same philosophy at mankind s expense These individuals have no empathy and no concern for the human condition They seek only one thing and that is power the power to control To them power is more than an addiction but a right Knowledge is the form of their initial power They use that to gain economic power control

and influence and then infiltrate all levels of society until they infect the entire planet Their religion is worshipping the self and their ego that they believe is their divine spark with a motto of Do as thou wilt In my last book Adrift on a Sea of Lies I tried to identify who these individuals were or are and how have they managed to do this over the past 12 000 years Also was there anything we can do that might reverse this during the next 12 000 years to ensure this doesn't happen again during the next cycle of our Earth or will it repeat again and again with only minor changes This book is an examination of the last 150 years primarily focusing on a so called myth that I believe is factual In this case the beginning of the story is about Atlantis and its growing association with part of the Antarctic continent It describes and supports the evidence for Atlantis being located beneath the ice of Antarctica and describes the evidence in detail including the following the location of Atlantis within the world ocean ancient mapping evidence of dispersed civilizations the rise of agriculture and Earth crust displacement It is also about the Nazis UFOs and the US and their involvement with the Antarctic continent I believe this disinformation plot will more than likely culminate in an upcoming US False Flag event unless the truth becomes known Lastly it is about the so called alien presence and the current attempt to keep it hidden and destroy it before the world knows how the Anglo American Zionist Empire created and financed it nearly 100 years ago Maps That Changed The World John O. E. Clark, 2016-02-12 An ancient Chinese proverb suggests They are wise parents who give their children roots and wings and a map Maps That Changed the World features some of the world's most famous maps stretching back to a time when cartography was in its infancy and the edge of the world was a barrier to exploration The book includes details of how the Lewis and Clark Expedition helped map the American West and how the British mapped India and Australia Included are the beautifully engraved Dutch maps of the 16th century the sinister Utopian maps of the Nazis the maps that presaged brilliant military campaigns charted the geology of a nation and the ones that divided a continent up between its European conquerors Organised by theme the book shows the evolution of map making from all corners of the globe from ancient clay maps to cartographic breakthroughs such as Harry Beck s map of the London underground There are also famous fictional maps including the maps of the lost continent of Atlantis and Tolkien's Middle Earth With an introduction written by acclaimed cartographic historian Jeremy Black Atlantean Genesis Riddick Dawson, 2025-10-08 Beneath the waves lies not only a legend but the memory of humanity s forgotten beginning Atlantean Genesis resurrects the lost world behind Plato s immortal tale weaving archaeology myth and science into a single epic of creation and cataclysm From the Egyptian priests of Sais to the Minoan temples of Thera from Sumer's flood tablets to the submerged ruins of the Americas this book traces a single thread through humanity s oldest memories the story of a civilization erased by water yet whose shadow shaped all that came after In this sweeping synthesis ancient texts and modern discoveries converge The Ice Age floods the shifting of continents and the rise of early seafaring empires all whisper of a mother culture that once bound the world together Was Atlantis merely a parable of pride or the echo of a real epoch when gods and mortals shared the same horizon Through

The contributions to this volume discuss the notion of island ness as a device triggering the imagination triggering narratives and representations in different creative fields they explore the interactions between legal socio political and fictional approaches to remoteness and the state of insularity policy responses to both remoteness and boundaries on different scales and the insular legal framing of geographical remoteness.
