Towards a Neutral Formulary Apportionment System in Regional Integration Shu-Chien Chen, 2023-03-09 International tax regimes and practices are heavily criticized for failing to fairly levy corporate tax on giant multinational taxpayers in the current globalized and digitalized world This important and far seeing book demonstrates how formulary apportionment FA an approach by which a multinational corporation pays each jurisdiction's corporate tax based on the share of its worldwide income allocated to that jurisdiction can achieve the much sought goal of aligning value creation and taxation The author through an intensive analysis of the European Union's EU's Common Consolidated Corporate Tax Base CCCTB Directive Proposal's and comparison to the United States US's formulary apportionment experience shows how the perceived problems with an FA system can be overcome and lays out the necessary elements for its feasibility With detailed attention to the debates around formulary apportionment and its theoretical foundations the book provides a blueprint for rebuilding the normative framework for the EU's tax reform by clearly analysing the implications of the following and more theorising public benefits to be represented by taxation reorganising different economic theories about tax neutrality and tax justice advancing the comparative legal research methodology to analyse law reform by combining the functional approach and the problem solving approach designing the logical formulary apportionment system for digital economy ensuring the removal of the incentive for multinationals to shift reported income to low tax locations reducing the tax system's complexity and the

administrative burden it imposes on firms eliminating transfer pricing complexity for intra firm transactions achieving equal weighting of the sales factor the labour factor and the asset factor in the formula application of destination based rule for attributing the sales factor and replacing the traditional permanent establishment nexus with a factor presence nexus The presentation incorporates extensive comparison between the EU s formulary apportionment tax reform option and FA systems existing in the United States US at state level including reference to relevant US case law and legislation As a possible option to address the problem of base erosion and profit shifting BEPS formulary apportionment is gaining increasing acceptance and attention This book will prove invaluable to taxation authorities tax practitioners and scholars in its deeply informed and systematic guidance on good practices and prevention of problematic experiences in establishing and implementing an effective and market neutral FA system

Introduction to European Tax Law on Direct Taxation Lukasz Adamczyk, Valentin

Bendlinger, Kristof Boel, Matthias Hofstätter, Daniela Hohenwarter-Mayr, Dimitar Hristov, Ivan Lazarov, Alicja

Law This concise handbook has become a traditional instrument for gaining basic knowledge of European tax law with

emphasis on direct taxes It is directed at students experienced international tax specialists with little knowledge of European

law European law specialists and non Europeans who deal with Europe for business or academic reasons and need to

understand the foundations of European tax law Moreover this book can be useful to academics without a legal background

in approaching technical issues raised by European Union tax law as well as give inspiration to the most experienced

European direct tax law experts The eighth edition adds new updates on the most essential changes and new case law of the

CJEU in the field of European direct taxation Furthermore due to its particular importance the EU Global Minimum Tax

Justice, Equality and Tax Law Nevja Čičin-Šain, Mario Riedl, 2022-10-05

An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both

old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be

immutable What changes of course is the perception of the content of those demands International taxation post BEPS has

been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the

unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is

created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of

taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in

profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries. It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT/GST. Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT/GST collection was unable to respond to challenges posed by the digital economy. Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced. Finally new technologies such as blockchain paved new avenues in enhancing tax compliance. In this context this volume entitled *Justice, Equality and Tax Law* contains not only a selection of the best master's theses of the full time LL.M. programme in 2021/2022 but also represents an in depth analysis of various aspects of this evergreen topic.

A Guide to the Anti-Tax Avoidance Directive Werner Haslehner, Katerina Pantazatou, Georg Kofler, Alexander Rust, 2020-06-26. This book provides a concise practical guide to the European Union's Anti Tax Avoidance Directive (ATAD). Presenting unique insights into the ATAD's five specific anti avoidance rules, its chapters explain the background of those rules, the directive's interactions with relevant jurisprudence and the challenges posed to the ATAD's interpretation and implementation in domestic law.

Multilateral Cooperation in Tax Law Martin Klokár, Katharina Moldaschl, 2023-10-03. An in depth analysis of various aspects of multilateral cooperation in tax law. Tax evasion and aggressive tax planning causing base erosion and profit shifting (BEPS) has been a widely discussed topic among academics and tax policy makers over the past decades. Increasing globalization and digitalization have contributed to the intensification of this issue in recent years. At the same time states continue to largely insist on their sovereignty in the area of tax law. However due to their cross border nature issues related to BEPS are shared problems among the states and can typically not be solved by a single nation. Therefore multilateral cooperation represents an option to build a bridge between the states' demand for sovereignty and the problems caused by BEPS. In this regard the OECD, the UN and the EU play an important role in introducing international tax standards in an attempt to effectively address tax evasion and aggressive tax planning in many ways. The interaction and cooperation between different international, supranational, EU and regional organizations is an ongoing process. In this context the topic *Multilateral Cooperation in Tax Law* was selected as the general topic for the master's theses of the part time 2021/23 class of the postgraduate LL.M. programme in International Tax Law at WU Vienna University of Economics and Business. This volume aims to develop academic insights, provide practical guidance and enable an in depth analysis of various aspects of this topic. The book is divided into four parts. The first part deals with a general overview of the understanding of multilateral cooperation, the background that led to the need for multilateral cooperation and the different stakeholders that play a relevant role in it. While the chapters included in the second part focus on the most

important developments on an international level OECD and UN the chapters encompassed in the third part analyse the multilateral cooperation initiatives of the EU Finally the chapters included in part four deal with selected issues related to multilateral cooperation in tax law including mutual assistance and exchange of information dispute resolution mechanisms and measures in digitalized businesses Research Handbook on European Union Taxation Law Christiana HJI

Panayi,Werner Haslehner,Edoardo Traversa,2020-01-31 Offering a comprehensive exploration of EU taxation law this engaging Research Handbook investigates the associated legal principles in the context of both direct and indirect taxation The important issues and debates arising from these general principles are expertly unpicked with leading scholars examining the status quo as well as setting out a clear agenda for future research **Advanced Topics in Revenue Law**
