Advances in Mucosal Immunology S. Challacombe, P. Bland, C. Stokes, A. Heatley, A. Mowat, 2012-12-06 The immunology of mucosal surfaces is one of the most exciting and relevant areas of medical veterinary and dental research since it applies basic research to tissues involved in everyday defence against microbes and against environmental and food antigens This book is based on the contributions presented at the International Congress of Mucosal Immunology held in London in July 1989 and organised by the Mucosal Immunology Affinity Group of the British Society for Immunology The meeting was attended by over 500 delegates from 27 countries including virtually all of the leading investigators in the field The contents give comprehensive and up to date information on such topics as antigen presentation and processing in the gut mucosal vaccines in man and animals HIV infection in the gut the role of T cells in the gut epithelium recent advances in inflammatory bowel disease and coeliac disease the role of cytokines in the regulation of the IgA response mucosal mast cells and cell migration The contributions reflect the rapid pace of research in mucosal immunology and the great strides which are taking place in the understanding of the immunology molecular biology and biochemistry of host response at mucosal surfaces

Advances in Mucosal Immunology Jiri Mestecky, Michael W. Russell, Susan Jackson, Suzanne M. Michalek, Helena Tlaskalová-Hogenová, Jaroslav Sterzl, 2013-04-17 The Seventh International Congress of Mucosal Immunology held in Prague the beautiful old capital of The Czech Republic 16-20 August 1992 was the first to be sponsored by the Society for Mucosal Immunology and was the largest since their inception 20 years earlier in Birmingham Alabama It was attended by 624 participants who gave 538 presentations more than 10 times the numbers of the first meeting these proceedings contain 354 papers that were submitted for publication The political events in Europe that made it possible to hold this Congress in Prague also allowed for the first time the participation of large numbers of scientists from Eastern Europe as well as from Asia and the organizers were truly gratified by this happy circumstance It is now clear not only that mucosal immunity encompasses the huge area of mucosal surfaces and most physiological organ systems but also that mucosal immunology extends over the whole global surface and all continents The sheer size of the Congress and number of manuscripts unfortunately entailed some unexpected problems in editing and assembling the proceedings partly due to the diversity of linguistic styles not represented at earlier meetings and we apologize to the authors who have patiently awaited the publication of their contributions

Recent Advances in Mucosal Immunology Jiri Mestecky, Jerry R. McGhee, John Bienenstock, Pearay L. Ogra, 2012-12-06 Increasing interest in the immunology of mucosal surfaces is obvious from the number of publications in scientific journals and from the frequency of national and international symposia devoted to this subject Particularly encouraging are the large numbers of young investigators who have chosen to work in this area of theoretical immunology with profound practical implications The two volumes represented here are the result of an International Congress Of Mucosal Immunology held at the Niagara Falls Convention Center and the Niagara Falls Hilton on

June 29 July 3 1986 This satellite meeting of the International Congress of Immunology placed emphasis on all aspects of the Mucosal Immune System This included the regulation of differentiation of mucosal lymphocytes mucosa associated lymphoreticular tissue and lymphocyte homing the immunology of mucosa associated tissues and glands effector functions in mucosal immunity and the effects of environmental antigens on the immune response all of which are included in Volume I The second volume has emphasized studies of the immune response and effector functions IgA biosynthesis and transport IgA proteases and effector functions developmental aspects and immunodeficiency the immunopathology of IgA and mucosal immunoprophylaxis A total of 218 papers are included in these two volumes and a comparison to past meetings held at four to five year intervals indicates the explosive growth of mucosal immunology

Dendritic Cells in Fundamental and Clinical Immunology Jacques Banchereau, Daniel Schmitt, 1995 Dendritic cells are antigen presenting cells and are found in all tissues and organs of the body Papers from the June 1994 symposium are arranged in sections covering dendritic cells origin and differentiation phenotype antigen processing and presentation cell migration follicular dendritic cells
