Sternberg, Rena F. Subotnik, 2006-06-01 The Other Three Rs model began as an American Psychological Association APA initiative sponsored by Robert J. Sternberg IBM Professor of Psychology and Education at Yale University and Past President of the APA For both this initiative and this edited volume Sternberg assembled a diverse team of experts who identified reasoning resilience and responsibility as three learnable skills that when taken together have great potential for increasing academic success The authors of this volume present in detail their evidence based arguments for promoting TOTRs in schools as a way to optimize student success *Early Development and Leadership* Susan E. Murphy, Rebecca Reichard, 2012-03-29 Today we often look to our leaders in business government or the social sector to make effective decisions in a complex world Whether they are asked what steps to take to improve competitiveness in a global economy or to make tough ethical choices well trained leaders are critical to organizational effectiveness Although we know much about leadership development for individuals after they take their first job we know relatively little about their earlier experiences that contributed to their interest in leadership or subsequent effectiveness as leaders This volume brings together researchers who explore leadership at different points before individuals enter the workforce and asks important questions surrounding definitions of leadership behavior necessary leader skills and age related leader tasks factors contributing to development of leader identity and ways to improve the process of leader development With contributions from well known leadership researchers such as Robert Sternberg Howard Gardner Bruce Avolio and Susan Komives the volume shows research evidence for factors such as early childhood and youth experiences on leadership development which have implications for the way we understand and train leadership in today's organizations **Narrowing the Achievement Gap** Susan J. Paik, Herbert J. Walberg, 2007-06-04 The subject of minority children's learning has long been the concern of civic leaders parents scholars and educators The federal legislation No Child Left Behind emphasizes the concern even more It specifically requires assessing the academic achievement of minority students particularly in economically disadvantaged areas and holding schools accountable for their progress Schools that fail to attain Adequate Yearly Progress face the real possibility of being forced to close if they continually fail to perform Unlike the past these are increasingly high stakes consequences for educators parents students and the schools that serve them This book is timely and relevant because it addresses these issues and recommends solutions for Latino Black and Asian students This book also has implications for the problems the nation faces in helping all students to learn well particularly those that lag in academic achievement In considering the broad problems and in recommending solutions the book provides breadth concision and unique organization As the introductory chapter makes clear the book simultaneously considers not only the three most visible minority groups in the U S but draws upon the perspectives of anthropology education ethnic studies psychology and sociology From these several perspectives this book is organized within

three broad sections 1 culturally diverse families and schooling 2 issues of immigration and schooling experiences and 3 socio cultural perspectives on teaching learning and development Within each section the authors marshal research literature regarding each ethnic minority group
