designers typically see their profession as creating value for users and society. Countless opportunities to address pressing ethical, social, and environmental concerns die in the gap between the two, as managers and designers misconstrue each other's intent and misunderstand each other's needs. How can both do better? The answer lies in *Redesigning Value*. Drawing from real-world examples and insights from over one hundred designers, design experts, leaders of design labs, and design skeptics at leading organizations including Google, CNN, Citi Bank, Fidelity Insurance, the Mayo Clinic, and Shopify, the book provides a road map from leaders who have been there and a practical manifesto to inspire the sort of action our world so sorely needs.
