Lichtenberg, M.A.

Lieberman, 2013-03-14 What's in a name The original title of our book *Regular and Stochastic Motion* was chosen to emphasize Hamiltonian dynamics and the physical motion of bodies The new edition is more evenhanded with considerably more discussion of dissipative systems and dynamics not involving physical motion To reflect this partial change of emphasis we have substituted the more general terms in our title The common usage of the new terms clarifies the emphasis of the book The main change in the book has been to expand the sections on dissipative dynamics including discussion of renormalization circle maps intermittency crises transient chaos multifractals reconstruction and coupled mapping systems These topics were either mainly in the mathematical literature or essentially unstudied when our first edition was written The volume of work in these areas has surpassed that in Hamiltonian dynamics within the past few years We have also made changes in the Hamiltonian sections adding many new topics such as more general transformation and stability theory connected stochasticity in two dimensional maps converse KAM theory new topics in diffusion theory and an approach to equilibrium in many dimensions Other sections such as mapping models have been revised to take into account new perspectives We have also corrected a number of misprints and clarified various arguments with the help of colleagues and students some of whom we acknowledge below We have again chosen not to treat quantum chaos partly due to our own lack of acquaintance with the subject *Community & Public Health Nursing: Promoting the Public's Health* Judith

feelings sensory awareness internally produced sounds or music unsymbolized thinking and mentalizing thinking about others mental states They may occur automatically during mind wandering daydreaming and resting state episodes and may focus on one's past present or future mental time travel e.g. autonoetic consciousness Inner experiences also may take the form of intrusive or ruminative thoughts The types characteristics frequency content and functions of inner experiences have been studied using a variety of traditional methods among which questionnaires thought listing procedures i.e. open ended self reports thinking aloud techniques and daily dairies Another approach articulatory suppression consists in blocking participants use of verbal thinking while completing a given task deficits indicate that inner speech plays a causal role in normal task completion Various thought sampling approaches have also been developed in an effort to gather more ecologically valid data Previous thought sampling studies have relied on beepers that signal participants to report aspects of their inner experiences at random intervals More recent studies are exploiting smartphone technology to easily and reliably probe randomly occurring inner experiences in large samples of participants These various measures have allowed researchers to learn some fundamental facts about inner experiences To illustrate it is becoming increasingly clear that prospective future oriented thinking greatly depends on access to autobiographical memory past oriented thinking where recollection of past scenes is used as a template to formulate plausible future scenarios The main goal of the present Research Topic was to offer a scientific platform for the dissemination of current high quality research pertaining to inner experiences Although data on all forms of inner experiences were welcome reports on recent advances in inner speech research were particularly encouraged Here are some examples of topics of interest 1 description and validation of new scales inventories questionnaires measuring any form of inner experience 2 novel uses or improvements of existing measures of inner experiences 3 development of new smartphone technology facilitating or broadening the use of cell phones to sample inner experiences 4 frequency content and functions of various inner experience 5 correlations between personality or cognitive variables and any aspects of inner experiences 6 philosophical or theoretical considerations pertaining to inner experiences and 7 inner experience changes with age
