

History of Environmental Literature and Criticism

Environmental literature and criticism have evolved significantly over time, reflecting changing perspectives on the relationship between humans and the natural world. This section explores the historical context and key figures in the field.

The roots of environmental literature can be traced back to ancient times, where nature was often personified or used as a metaphor. In the modern era, the Romantic movement emphasized the beauty and power of the natural world, influencing writers like William Wordsworth and John Keats. The 19th-century American Transcendentalists, such as Henry David Thoreau, further developed these ideas, advocating for a deeper connection with nature. The 20th century saw the rise of environmentalism as a social movement, which in turn shaped environmental literature and criticism. Key figures like Rachel Carson, Aldo Leopold, and Gary Snyder played pivotal roles in this evolution.
