arrest **Science Education Research and Practice in Asia** Mei-Hung Chiu,2016-06-10 This book discusses the scope of science education research and practice in Asia It is divided into five sections the first consists of nine chapters providing overviews of science education in Asia China Lebanon Macau Malaysia Mongolia Oman Singapore Taiwan and Thailand The second section offers chapters on content analysis of research articles while the third includes three chapters on assessment and curriculum The fourth section includes four chapters on innovative technology in science education and the fifth section consists of four chapters on professional development and informal learning Each section also has additional chapters providing specific comments on the content This collection of works provides readers with a starting point to better understand the current state of science education in Asia *Textbook of Adult Emergency Medicine E-Book* Peter Cameron,Mark Little,Biswadev Mitra,Conor Deasy,2019-05-23 Since the first edition of Textbook of Adult Emergency Medicine was published twenty years ago there has been enormous change in the way emergency care is delivered This has occurred both in countries where emergency medicine was originally developed and in those where its application was limited because of cost Emergency medicine is now perceived as the cornerstone of response to acute illness regardless of resources This fully revised Fifth Edition provides clear and consistent coverage of this constantly evolving specialty Building on the success of previous editions it covers all the major topics relevant to the practice of emergency medicine The book will prove invaluable to professionals working in this setting including nurse specialists and paramedics who require concise highly practical guidance incorporating the latest best practice and evidence based guidelines This edition comes with an enhanced electronic version with video and self assessment content providing a richer learning experience and making rapid reference easier than ever before anytime anywhere A comprehensive textbook of adult emergency medicine for trainee doctors covers all the problems likely to present to a trainee in the emergency department Chapters are highly readable and concise boxes summarise chapter key points and highlight controversial areas of treatment The content is highly practical clinically orientated and thoroughly updated in all the core subjects There have been major updates in topics such as airway shock and sepsis where guidelines have changed rapidly The imaging chapters have also evolved with changing practice and improved technology to be concordant with evidence on the importance of image interpretation by emergency clinicians There are major sections on other skills and issues of key importance to today s advanced emergency medicine practitioner such as staffing overcrowding triage patient safety and quality measures In addition difficult topics such as death and dying the challenging patient ethics giving evidence and domestic violence are covered Governance training research and organisational subjects such as disaster planning and response humanitarian emergencies and refugee medicine are included to give the reader a framework to understand the complexity of managing major emergency systems of care The Acute Management of Surgical Disease Martin D. Zielinski,Oscar Guillamondegui,2022-09-15 Emergency General Surgery has become a cornerstone of Acute Care Surgery over the past decade Once the scope of community general surgeons the

growing complexity of patients with acute surgical diseases has increasingly driven their care to tertiary referral centers The aging population confounds this problem further as these patients present with more complex comorbidities life threatening physiology and progressively severe anatomic disease severity To ensure better outcomes the practice has evolved to focus on evidence based practice management guidelines in order to standardize care and optimize outcomes The purpose of this text is to be a comprehensive volume for patients with acute surgical diseases There will be three sections each comprised of multiple chapters The first section will be a comprehensive analysis of the background of Emergency General Surgery The goal of this section will be to provide the reader background into the acute surgical practice and to introduce the reader to the important concepts discussed in the remainder of the textbook The second section will be the largest and will discuss specific acute surgical diseases Individual chapters will outline the diagnostic approach current treatment standards operative approaches and expected outcomes with an emphasis on practice management guideline implementation into practice As acute surgical diseases and surgical critical care are integral to each other the last section will be Critical Care for the Acute Care Surgeon These topics will focus on the critical care concepts essential to surgeons who care for acute diseases This comprehensive text is targeted to any surgeon who takes emergency call for any of the listed diseases including community and referral general and vascular surgeons In addition this would be an excellent resource for all general surgery residents Lastly this would also serve as a resource to intensivists who care for acute surgical patients
