Solar By Ian Mcewan

Alice Robinson

Solar By Ian McEwan:

Solar Ian McEwan, 2010 Michael Beard is a Nobel prize winning physicist whose best work is behind him Trading on his reputation he speaks for enormous fees lends his name to the letterheads of renowned scientific institutions and half heartedly heads a government backed initiative tackling global warming A compulsive womaniser Beard finds his fifth marriage floundering But this time it is different she is having the affair and he is still in love with her When Beard s professional and personal worlds collide in a freak accident an opportunity presents itself for Beard to extricate himself from his marital mess reinvigorate his career and save the world from environmental disaster Ranging from the Arctic Circle to the deserts of New Mexico Solar is a serious and darkly satirical novel showing human frailty struggling with the most pressing and complex problem of our time A story of one man s greed and self deception it is a profound and stylish new work from one of the world s great writers Book jacket

Solar by Ian McEwan Alice Robinson, 2010 *The Cambridge Companion to Ian McEwan* Dominic Head, 2019-07-04 Provides a thorough overview of Ian McEwan s fiction articulating his place in the canon of contemporary fiction Ian McEwan Irena Księżopolska, 2024-04-30 This book offers a discussion of seven canonical novels by Ian McEwan The Cement Garden The Comfort of Strangers The Child in Time The Innocent Black Dogs Atonement On Chesil Beach introducing radical new readings which are offered not as ultimate and conclusive solutions of the textual puzzles but as possibilities to engage with the text creatively to enrich the critical consensus and restore interpretative freedom to the readers This project formulates a strategy of inclusive reading an approach to the text that does not seek to reduce it to a single interpretation and yet is comprehensively informed through the analysis of the primary text critical discussion authorial comments and the context of the composition Each reading demonstrates the metafictional structure of the texts indicating that McEwan s works may be treated as invitations to roam within their worlds examining the multiple frames of their structure and the meanings generated thereby All the chapters attend to submerged repressed or deliberately masked voices The Cement Garden is seen as a multi layered dream with a shifting hierarchy of dreamers The Comfort of Strangers is viewed as an inverted metafiction with insubstantial characters corrupting more complex heroes The Child in Time is read as Stephen s book written for his dead daughter The Innocent as a memory narrative of Leonard who refuses to notice Maria s role as a spy In Black Dogs the over exposure of unreliability is studied as a screen for personal trauma in the analysis of Atonement Briony s claim to authorship is questioned and Cecilia is suggested as an alternative narrative agent Finally examining On Chesil Beach both characters voices are reconstructed in search of the superior narrative power which in the end is seen to be elusive as the text seeks to undermine the hierarchy of voices

Ian McEwan Sebastian Groes, 2013-09-12 With a new chapter on Solar this is an up to date guide to critical writing on Ian McEwan including an interview with the author **Solar (Biblioteca McEwan)** Ian McEwan, 2020-01-30 Michael Beard es un físico ganador del premio Nobel cuyo mejor trabajo está detrás de él Al comerciar con su reputación habla por honorarios

enormes presta su nombre a los membrales de instituciones científicas de renombre y sin entusiasmo dirige una iniciativa respaldada por el gobierno que aborda el calentamiento global. Un matrimonio compulsivo Beard encuentra su quinto matrimonio tambaleándose. Pero esta vez es diferente: ella está teniendo la aventura y él todavía está enamorado de ella. Cuando los mundos profesionales y personales de Beard chocan en un extraño accidente, se presenta una oportunidad para que Beard se libere de su desastre matrimonial, revitalice su carrera y salve al mundo del desastre ambiental. Desde el Círculo Polar Ártico hasta los desiertos de Nuevo México, *Solar* es una novela seria y oscuramente satírica que muestra la fragilidad humana luchando con el problema más acuciante y complejo de nuestro tiempo. Una historia de la avaricia y el autoengaño de un hombre es una nueva obra profunda y elegante de uno de los mejores escritores del mundo. Contemporary Fiction and Science from Amis to McEwan Rachel Holland, 2019-04-26. This book identifies in contemporary fiction a new type of novel at the interface of science and the humanities, working from the premise that a shift has taken place in the relations between the two cultures in the last two or three decades. As popular science comes to assume an ever greater cultural significance, contemporary authors are engaging in new ways with ideas that it disseminates. A new literary phenomenon is emerging in which the focus on language-based theories of the self and the world that has been predominant in the latter half of the previous century is making way for a renewed commitment to the material facts both of human existence and the universe beyond subjectivity. The book analyses the work of Martin Amis, William Boyd, David Lodge, Richard Powers, Michel Houellebecq, Jonathan Franzen, Margaret Atwood, and Ian McEwan, revealing the ways in which these third culture novels negotiate the relationship between literature and science. *Green Matters*, 2019-11-26. *Green Matters* offers a fascinating insight into the regenerative function of literature with regard to environmental concerns. Based on recent developments in ecocriticism, the book demonstrates how the aesthetic dimension of literary texts makes them a vital force in the struggle for sustainable futures. Applying this understanding to individual works from a number of different thematic fields, cultural contexts, and literary genres, *Green Matters* presents novel approaches to the manifold ways in which literature can make a difference. While the first sections of the book highlight the transnational focus on Canada, the last section allows a more specific exploration of how themes, genres, and literary forms develop their own manifestations within a national context. Through its unifying ecocultural focus and its variegated approaches, the volume is an essential contribution to contemporary environmental humanities. **Post-Millennial Cultures of Fear in Literature** Mustafa Kirca, Adelheid Rundholz, 2024-04-19. The words fear, risk, and safety have come to define our contemporary age and have been construed as a dynamic background in the human sciences against which most risk narratives, imaginative or otherwise, can be read. This volume brings together original articles to investigate cultures of fear in post-millennial works and covers a wide variety of topics ranging from post-millennial political fictions, post-humanist and postcolonial rewritings, to trauma narratives, risk narratives, literary disaster discourses, and apocalyptic scenarios. Featuring theoretical and analytical approaches with

insights borrowed from multiple disciplines this book will be of interest for scholars and researchers working in the fields of literary and cultural studies as well as the general reader Family and Relationships in Ian McEwan's Fiction Tomasz Dobrogoszcz,2018-02-23 The book provides a lucid analysis of all Ian McEwan fiction published to date from his 1975 debut short stories up to the 2016 novel *Nutshell* spanning forty years of his literary career Apart from a general discussion of McEwan's works the study offers a uniform focal point it concentrates on one of the key issues taken up by the writer the aspect of relationships between partners and between family members As the book demonstrates the novelist employs interpersonal relations to establish a pertinent context in which he can dramatically portray the process of identity formation in his characters Throughout his fiction McEwan consistently uses references to psychoanalysis either veiled or direct The proposed book investigates the novelist's oeuvre through the lens of the psychoanalytic theory developed by Jacques Lacan The approach used makes the book useful both for readers well familiar with this apparatus and for those who need introduction to Lacanian psychoanalysis and such of his concepts as desire fantasy the symbolic order or the Name of the Father Theological Reflection and the Pursuit of Ideals Dale Wright,Maria Antonaccio,2016-02-17 Contemporary thought is marked by heated debates about the character purpose and form of religious thinking and its relation to a range of ideals spiritual moral aesthetic political and ecological to name the obvious This book addresses the interrelation between theological thinking and the complex and diverse realms of human ideals What are the ideals appropriate to our moment in human history and how do these ideals derive from or relate to theological reflection in our time In *Theological Reflection and the Pursuit of Ideals* internationally renowned scholars from a range of disciplines physics art literary studies ethics comparative religion history of ideas and theology engage with these crucial questions with the intention of articulating a new and historically appropriate vision of theological reflection and the pursuit of ideals for our global times *Solar* Ian McEwan,Emili Olcina,2012-05-08 Literature in Society Regina Rudaitytė,2012-12-05 The essays in this volume focus on the text world dichotomy that has been a pivotal problem since Plato implicating notions of mimesis and representation and raising a series of debatable issues Do literary texts relate only to the fictional world and not to the real one Do they not only describe but also perform and thus create and transform reality Is literature a mere reflection expression of society a field and a tool of political manipulations a playground to exercise ideological and social power Herbert Grabes seminal essay *Literature in Society* *Society and Its Literature* which opens this volume perfectly captures the essential functions of literature in society whether it be Derridean belief in a revolutionary potential of literature the power of literature to say everything or Hillis Miller's view of literature having the potential to create or reveal alternative realities or according to Grabes the ability of literature to offer to society a possibility of self reflection by way of presenting a double of what is held to be reality and last but not least the ability of literature to considerably contribute to the joy of life by enabling a particular kind of pleasure the pleasure of reading literature The subsequent essays collected in this volume deal with complex

relations between Literature and Society approaching this issue from different angles and in various historical epochs They are on diverse thematics and written from diverse theoretical perspectives differing in scope and methodology

Apocalyptic Visions in the Anthropocene and the Rise of Climate Fiction Kübra Baysal, 2021-08-10 With the increasing interest of pop culture and academia towards environmental issues which has simultaneously given rise to fiction and artworks dealing with interdisciplinary issues climate change is an undeniable reality of our time In accordance with the severe environmental degradation and health crises today including the COVID 19 pandemic human beings are awakening to this reality through climate fiction cli fi which depicts ways to deal with the anthropogenic transformations on Earth through apocalyptic worlds as displayed in works of literature media and art Appealing to a wide range of readers from NGOs to students this book fills a gap in the fields of literature media and art and sheds light on the inevitable interconnection of humankind with the nonhuman environment through effective descriptions of associable conditions in the works of climate fiction

Tales of Research Misconduct Hub Zwart, 2017-09-14 This monograph contributes to the scientific misconduct debate from an oblique perspective by analysing seven novels devoted to this issue namely Arrowsmith by Sinclair Lewis 1925 The affair by C P Snow 1960 Cantor s Dilemma by Carl Djerassi 1989 Perlmann s Silence by Pascal Mercier 1995 Intuition by Allegra Goodman 2006 Solar by Ian McEwan 2010 and Derailment by Diederik Stapel 2012 Scientific misconduct i e fabrication falsification plagiarism but also other questionable research practices have become a focus of concern for academic communities worldwide but also for managers funders and publishers of research The aforementioned novels offer intriguing windows into integrity challenges emerging in contemporary research practices They are analysed from a continental philosophical perspective providing a stage where various voices positions and modes of discourse are mutually exposed to one another so that they critically address and question one another They force us to start from the admission that we do not really know what misconduct is Subsequently by providing case histories of misconduct they address integrity challenges not only in terms of individual deviance but also in terms of systemic crisis due to current transformations in the ways in which knowledge is produced Rather than functioning as moral vignettes the author argues that misconduct novels challenge us to reconsider some of the basic conceptual building blocks of integrity discourse Except where otherwise noted this book is licensed under a Creative Commons Attribution 4 0 International License To view a copy of this license visit <http://creativecommons.org/licenses/by/4.0/>

Nature and Narrative Markku Lehtimäki, 2025-05-23 The book explores environmental issues in twenty first century Anglophone fiction and how those issues are dealt with by specific literary means It proposes a reciprocal relationship between nature and narrative the idea according to which nature both informs and inspires artistic creations while literary designs and rhetoric also shape our ideas and perceptions of the natural environment It is argued that in order to address design and rhetoric in environmental texts we need a close analysis of those world shaping functions of literary narratives that unite ecocritical and narratological interests The author presents readings

of contemporary novels and their varying ways of seeing nature through narrative devices and fictional minds The novels discussed in the book are Hilary Mantel's *Wolf Hall* Toni Morrison's *A Mercy* Ian McGuire's *The North Water* Barbara Kingsolver's *The Lacuna* Paul Harding's *Tinkers* and Enon J M Coetzee's *Elizabeth Costello* Ian McEwan's *Solar* and Jenny Offill's *Weather*

Literary Animal Studies and the Climate Crisis Sune Borkfelt, Matthias Stephan, 2022-11-22 *Literary Animal Studies and the Climate Crisis* connects insights from the field of literary animal studies with the urgent issues of climate change and environmental degradation and features considerations of new interventions by literature in relation to these pressing questions and debates This volume informs academic debates in terms of how nonhuman animals figure in our cultural imagination of topics such as climate change extinction animal otherness the posthuman and environmental crises Using a diverse set of methodologies each chapter presents relevant cases which discuss the various aspects of these interstices This volume is an intersection between literary animal studies and climate fiction intended as an interdisciplinary intervention that speaks to the global climate debate and is thus relevant across the environmental humanities

Narrative and Cognition in Literature and Science Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and narrative shape one another Narrative is a principle of cognition and cognition is fundamental to narrative This duality enables a deeper mapping of the feedback between story and the natural sciences Science as a culturally organized and systematic mode of knowing the world may seem opposed to narrative thinking Yet they are deeply interwoven Scientists tell many kinds of stories across genres and media In thought experiments lab experiments written arguments and histories and philosophies of fields they recount and interpret unfoldings of events at often uncanny scales from particle collisions to the evolution of life to cosmic expansion Science stories go beyond science Early science is entwined with myth religion and magic We still mythologize beneficent or evil geniuses the promises and perils of technology Teachers journalists politicians and lawyers all tell science stories for their own purposes Literary artists use scientific ideas and forms reimagining physical forces causality and time in storyworlds themes and figures This is the first cognition focused multi disciplinary analysis of these narrative science relations

Solarities Cymene Howe, Jeff Diamanti, Amelia Moore, 2023 *Solarities* *Elemental Encounters and Refractions* is a transdisciplinary essay collection that explores the physical conceptual and political possibilities materialized by solararity a form of relation to the sun and its elemental force upon planetary life The authors propose that a different set of questions becomes possible when the material specificities of solar become the compass for thought prompting us to uncover our relationship to the sun How does solararity materialize in the bodies and lives of humans and non humans now and in the future What can we learn if we no longer take the sun for granted How do we continue to persist on a planet that is so intimately bound up in a state of love fear and dependence on this primary source of all living energy Each of the essays in *Solarities* take solar radiation as an interpretive lens that takes multiple forms often transforming as it does so *Solarities* draws inspiration from Black ecologies Indigenous

philosophy feminist science technology studies and more than human discussions in the human sciences recognizing the phenomenological and ontological openings they make available The authors understand solarly as an energy source channeled through photovoltaic cells for example but the essays gathered here focus on the lives that solarly creates or impedes The experimental task is to find how solarities work their way into materials and processes across our work seeking out the particular influences of solarly in making being s These relations are core to thinking the elemental conditions of solarly since it is through particular forms of focalizing the sun that life is sustained or made to wither across the planet In these ways the elemental condition of solarly is at once hyper particular and also shared across organic and inorganic bodies conditioned by physical form and material composition Throughout the collection the authors explore how solarly appears or recedes from view when we concentrate our attentions on it surfacing the existential omnipresence of the sun to open new thought possibilities inspire new actions and refract new dimensions of socionatural encounter

The Rise of Nuclear Fear
Spencer R. Weart, 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant triggering a meltdown protesters around the world challenged the use of nuclear power Germany announced it would close its plants by 2022 Although the ills of fossil fuels are better understood than ever the threat of climate change has never aroused the same visceral dread or swift action Spencer Weart dissects this paradox demonstrating that a powerful web of images surrounding nuclear energy holds us captive allowing fear rather than facts to drive our thinking and public policy Building on his classic *Nuclear Fear* Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction Long before nuclear fission was discovered fantasies of the destroyed planet the transforming ray and the white city of the future took root in the popular imagination At the turn of the twentieth century when limited facts about radioactivity became known they produced a blurred picture upon which scientists and the public projected their hopes and fears These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined they appeared on the evening news Weart examines nuclear anxiety in sources as diverse as Alain Resnais's film *Hiroshima Mon Amour* Cormac McCarthy's novel *The Road* and the television show *The Simpsons* Recognizing how much we remain in thrall to these setpieces of the imagination Weart hopes will help us resist manipulation from both sides of the nuclear debate
