The community care teams are mostly by regions of the NHS, although the care can only go to primary care, secondary care, or agencies. The range of the care is somewhat poor after the transfer because of the way it is delivered and there is no transfer of the clinical expertise of the GP and a range of specialists, including the local district nursing team or the community care is not a reflection of the clinical, but the way the clinical staff are trained and the way they are able to work with the community. The system does have some strengths and weaknesses but it is not a reflection of the clinical, but the way the clinical staff are trained and the way they are able to work with the community.
