Mitchell,Karen Bennett-Haron,Arash Daneshzadeh,2016-12-06 This volume examines the school to prison pipeline a concept that has received growing attention over the past 10 15 years in the United States The pipeline refers to a number of interrelated concepts and activities that most often include the criminalization of students and student behavior

the police like state found in many schools throughout the country and the introduction of youth into the criminal justice system at an early age The school to prison pipeline negatively and disproportionately affects communities of color throughout the United States particularly in urban areas Given the demographic composition of public schools in the United States the nature of student performance in schools over the past 50 years the manifestation of school to prison pipeline approaches pervasive throughout the country and the world and the growing incarceration rates for youth this volume explores this issue from the sociological criminological and educational perspectives Understanding Dismantling and Disrupting the Prison to School Pipeline has contributions from scholars and practitioners who work in the fields of sociology counseling criminal justice and who are working to dismantle the pipeline While the academic conversation has consistently called the pipeline school to prison including the framing of many chapters in this book the economic and market forces driving the prison industrial complex urge us to consider reframing the pipeline as one working from prison to school This volume points toward the tensions between efforts to articulate values of democratic education and schooling against practices that criminalize youth and engage students in reductionist and legalistic manners **Education Diverse Pop Perspectives**
