*The Loeb Classical Library. No. 338, James Loeb, 1939      The Last Writings of Thomas S. Kuhn* Thomas S.

Kuhn, 2024-05-08 A must read follow up to *The Structure of Scientific Revolutions* one of the most important books of the twentieth century This book contains the text of Thomas S Kuhn's unfinished book *The Plurality of Worlds* An Evolutionary Theory of Scientific Development which Kuhn himself described as a return to the central claims of *The Structure of Scientific Revolutions* and the problems that it raised but did not resolve *The Plurality of Worlds* is preceded by two related texts that Kuhn publicly delivered but never published in English his paper *Scientific Knowledge as Historical Product* and his *Shearman Memorial Lectures The Presence of Past Science* An introduction by the editor describes the origins and structure of *The Plurality of Worlds* and sheds light on its central philosophical problems Kuhn's aims in his last writings are bold He sets out to develop an empirically grounded theory of meaning that would allow him to make sense of both the possibility of historical understanding and the inevitability of incommensurability between past and present science In his view incommensurability is fully compatible with a robust notion of the real world that science investigates the rationality of scientific change and the idea that scientific development is progressive      *Philosophy of Music* Riccardo

Martinelli, 2019-10-21 Ranging from Antiquity to contemporary analytic philosophy it provides a concise but thorough analysis of the arguments developed by some of the most outstanding philosophers of all times Besides the aesthetics of music proper the volume touches upon metaphysics ethics philosophy of language psychology anthropology and scientific developments that have influenced the philosophical explanations of music Starting from the very origins of philosophy in Western thought Pythagoras Plato Aristotle the book talks about what music is according to Augustine Descartes Leibniz Rousseau Kant Hegel the Romantics Schopenhauer Nietzsche Wittgenstein Susanne Langer Bloch Adorno and many others Recent developments within the analytic tradition are illustrated with particular attention to the ontology of the musical artwork and to the problem of music and emotions A fascinating idea which recurs throughout the book is that philosophers allow for a sort of a secret kinship between music and philosophy as means to reveal complementary aspects of truth

*Apologetic Works 6* Chris Chun, 2024-12-16 This volume examines two major controversies that captured the theological attention of Andrew Fuller In the wake of the Enlightenment traditional Christian doctrine was challenged by various rationalistic and philosophical alternatives A notable example is the thought of William Vidler a former Baptist pastor who initially embraced Universalism and later Unitarianism Vidler's shift was influential enough that Fuller felt compelled to respond through a series of letters later published in 1802 This critical edition along with its introduction provides an overview of Vidler's theological position and Fuller's rebuttal This edition also includes Fuller's debate with fellow Particular Baptist Abraham Booth whom Fuller deeply respected The conversation that developed between them contains some of Fuller's most mature theological reflections on the doctrines of imputation substitution and particular redemption that

impacted the transatlantic Baptist and evangelical world of the nineteenth century and have had ongoing reverberations up to the present day **Harvard Alumni Bulletin** ,1939 **Space, Imagination and the Cosmos from Antiquity to the Early Modern Period** Frederik A. Bakker,Delphine Bellis,Carla Rita Palmerino,2019-02-05 This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century It studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr s groundbreaking work *From the Closed World to the Infinite Universe* 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Suarez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space

*Counterfactualism in the Fine Arts* Elke Reinhuber,2022-10-14 Counterfactual thinking has become an established method to evaluate decisions in a range of disciplines including history psychology and literature Elke Reinhuber argues it also has valuable applications in the fine arts and popular media A fascination with the path not taken is a logical consequence of a world saturated with choices Art which provokes and explores these tendencies can help to recognise and contextualise the impulse to avoid or endlessly revisit individual or collective decisions Reinhuber describes the term in broad strokes through the disciplines to show how counterfactualism finds shape in contemporary art forms especially in photography film and immersive and interactive media art such as 360 content virtual reality and augmented reality She analyses the different stages of counterfactuals with examples where artists experience counterfactual thoughts in the process of art production explore these thoughts in their artwork and where the artwork itself evokes counterfactual thoughts in the audience A fascinating exploration for scholars and students of art media and the humanities and anybody else with an interest in choices the art of decisionmaking and counterfactualism [Making Sense of "God"](#) Norman Solomon,2023-05-04 All over the world people talk about God and argue endlessly about what God said and what if anything we should do about it Do they know what are they talking about Do they ever seriously consider what it might look like or feel like if God actually spoke to you How could you tell if someone said God spoke to them whether they were deluded bluffing or high on drugs The reflections dialogues and arguments in this book address such questions often with humor

sometimes provocatively as when the author suggests the ancient gods have returned to invade the institutions of our great religions or when two spirits William and James viewing the world from afar voice their doubt as to whether the human species will ever attain the pinnacles of cooperation reason beauty and love Ancient texts from the Mayan Popol Vuh through the Bible to the Chinese classics are invoked and the discoveries of modern science from anthropology to zoology are brought into play as the reader is gently led to an appreciation of the role of religious language in modern society     *Qabalah for Wiccans* Jack Chanek,2021-12-08 Explore the Tree of Life from a Pagan Point of View You don t have to shy away from Qabalah anymore this book makes it easy to use ceremonial magic and incorporate its symbolism into your Wiccan rituals and workings Join Jack Chanek on an exploration of Hermetic Qabalah and learn how its concepts can be interwoven with the essential elements of Wicca Featuring an abundance of journal prompts exercises and correspondences Qabalah for Wiccans is the ideal resource for understanding Qabalah as a Pagan practitioner You ll uncover Qabalistic connections to Wiccan theology ascend the Tree of Life through meditation and ritual and explore the Tree s ten Sephiroth using the four elements tarot and more Revealing many similarities between the two practices this remarkable book shows you how Qabalah works and why it matters to your Wiccan path Includes a foreword by Deborah Lipp author of *Magical Power for Beginners*

*Data Journeys in the Sciences* Sabina Leonelli,Niccolò Tempini,2020-06-29 This groundbreaking open access volume analyses and compares data practices across several fields through the analysis of specific cases of data journeys It brings together leading scholars in the philosophy history and social studies of science to achieve two goals tracking the travel of data across different spaces times and domains of research practice and documenting how such journeys affect the use of data as evidence and the knowledge being produced The volume captures the opportunities challenges and concerns involved in making data move from the sites in which they are originally produced to sites where they can be integrated with other data analysed and re used for a variety of purposes The in depth study of data journeys provides the necessary ground to examine disciplinary geographical and historical differences and similarities in data management processing and interpretation thus identifying the key conditions of possibility for the widespread data sharing associated with Big and Open Data The chapters are ordered in sections that broadly correspond to different stages of the journeys of data from their generation to the legitimisation of their use for specific purposes Additionally the preface to the volume provides a variety of alternative roadmaps aimed to serve the different interests and entry points of readers and the introduction provides a substantive overview of what data journeys can teach about the methods and epistemology of research     **Subject Guide to Books in Print** ,1997

*Aesthetic Science* Alexander Wragge-Morley,2020-04-20 The scientists affiliated with the early Royal Society of London have long been regarded as forerunners of modern empiricism rejecting the symbolic and moral goals of Renaissance natural history in favor of plainly representing the world as it really was In *Aesthetic Science* Alexander Wragge Morley challenges this interpretation by arguing that key figures such as John Ray Robert Boyle Nehemiah Grew

Robert Hooke and Thomas Willis saw the study of nature as an aesthetic project To show how early modern naturalists conceived of the interplay between sensory experience and the production of knowledge Aesthetic Science explores natural historical and anatomical works of the Royal Society through the lens of the aesthetic By underscoring the importance of subjective experience to the communication of knowledge about nature Wragge Morley offers a groundbreaking reconsideration of scientific representation in the early modern period and brings to light the hitherto overlooked role of aesthetic experience in the history of the empirical sciences The Publishers Weekly, 1939 Rage and Denials Branko Mitrović, 2015-08-13 In *Rage and Denials* philosopher and architectural historian Branko Mitrović examines in detail the historiography of art and architecture in the twentieth century with a focus on the debate between the understanding of society as a set of individuals and the understanding of individuals as mere manifestations of the collectives to which they belong The conflict between these two views constitutes a core methodological problem of the philosophy of history and was intensely debated by twentieth century art historians one of the few art historical debates with a wide range of implications for the entire field of the humanities Mitrović presents the most significant positions and arguments in this dispute as they were articulated in the art and architectural historical discourse as well as in the wider context of the historiography and philosophy of history of the era He explores the philosophical content of scholarship engaged in these debates examining the authors positions the intricacies and implications of their arguments and the rise and dominance of collectivist art historiography after the 1890s He centers his study on the key art historical figures Erwin Panofsky Ernst Gombrich and Hans Sedlmayr while drawing attention to the writings of the less well known Vasiliy Pavlovich Zubov *Rage and Denials* offers a valuable window onto how key aspects of modern research in the humanities took shape over the course of the twentieth century Books in Print, 1981 **Digressions in Deep Time** Declan Lloyd, Warren Mortimer, 2024-06-18 Deep time is a term which attempts to capture temporal scales far beyond human comprehension These are stretches of time epitomised by geological and cosmic scale processes vast enough to make the entirety of human existence appear as little more than a footnote The past few years have seen a boom in texts dedicated to the study of deep time extending across a broad range of disciplines which fall markedly outside of its geological roots These studies are unified by two ideas in particular that deep time thinking and ecocriticism should be considered in conjunction and that literature and the arts play a vital role in fostering a deep time awareness *Digressions in Deep Time* is the first collection of essays which considers the multifarious representations of deep time across literature and the arts assembling the work of a wide range of prominent scholars whose research frequently engages with temporality and ecocriticism Featured contributions include work by the Pulitzer prize winning author John McPhee who popularised the term deep time in the late seventies as well as chapters by Richard Irvine author of *An Anthropology of Deep Time* Benjamin Morgan author of *The Outward Mind* and Andrew Tate author of *Apocalyptic Fiction* Die Kunst des Streitens Marc Laureys, Roswitha Simons, 2010-03-17 *Streit als ein Mittel zur*

Aushandlung von Interessenskonflikten ist eine Konstante menschlicher Gemeinschaft So verwundert es nicht dass Streit beginnend mit Kain und Abel oder dem Zorn des Achill von den ersten Anfängen an ein fortwährendes Thema der europäischen Kultur ist Jenseits von Krieg und Gewalt enthält Streit auch kreatives Potenzial was sich in den verschiedensten Gattungen fiktionaler und non fiktionaler Literatur offenbart Hier wird bald Streit im intellektuellen Spiel nach allen Regeln der Kunst in Szene gesetzt bald wird die Literatur im Kontext religiöser kultureller und politischer Formierungsprozesse zum Instrument schärfster Auseinandersetzung Dieser Band ist dem Inszenierungscharakter literarischer Streitkultur und seiner Funktionalisierung in gesellschaftlichen Veränderungsprozessen gewidmet aus historischer literatur und sprachwissenschaftlicher Perspektive werden Beispiele von der Antike bis zur Frühen Neuzeit untersucht
