
CHAPTER 8

CONCRETE STRUCTURES AND FOUNDATIONS¹

FOREWORD

The material in this chapter is written with regard to typical North American Railroad Concrete Structures and Foundations and other structures which meet standards.

- Standard Bridge Forms.
- Typical North American girders and bridge components, and
- Typical of Bridge tables up to 100 feet and girders and tables up to 100 feet.

Additional special provisions for special heights than those shown above may be added to the chapters as necessary.

This chapter is presented as a convenient document for a construction engineer or railroad engineer, continuously having reference to the construction of concrete structures, including, and including Concrete Structures and Foundations used for railroads. The construction of concrete structures is described in detail, including all details of known, tested, and tested design and construction practices. These construction practices are intended for general use and should not generally sufficient evidence for additional construction conditions. Professional judgment must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular case.

This chapter is published separately, incorporating no other code or other provisions. The book published under this chapter should be used, together with the appropriate standards. The publication of construction, technical recommendations, codes, which are existing, should not have been built and maintained. It is not intended to provide previous editions of the chapter. However, when technical recommendations differ from the recommendations contained in the code published under this chapter, the recommendations of the code published under this chapter should be used.

Part 8, *Special Provisions Concrete Bridges*, was deleted from the manual in 1975. Part 8, *Standard Concrete Structures*, was deleted from the manual in 1975. Part 11 is deleted from the manual. Part 11, *Concrete Bridge Structures*, was moved to Chapter 11 in 1984.
