Human Tumor Cells in Vitro Jorgen Fogh, 2013-06-29 The study of cultured human tumor cells is a most obvious approach in experimental human cancer research For many techniques in virology immunology biochemistry and biophysics for example large amounts of cells may be required and such quantities are usually provided only when the cultures develop into established cell lines when this happens thorough characterization also becomes possible The development of cell lines therefore is of prime importance Recent major advances in research with animal cell systems seem to be a prologue for present and future efforts directed toward work with human tumor cells in culture Conceivably the most significant results in cancer research may develop from work with such cells and so the time seemed right to define the present state of our knowledge This is the first book dedicated exclusively to the subject human tumor cells in vitro Although some of the fundamental aspects in the cultivation of human tumor cells and the extent to which they represent human cancer in vivo are still unclear I asked a number of the leading investigators in this area of research to collect and evaluate previous and present contributions and to offer their thoughts on the questions to which answers are not yet available Many of the chapters are concerned with techniques of cultivation Cultures from some types of tumors have grown well in many cases they have given rise to established cell lines **Morphogenesis of Thyroid Follicles in Vitro** P. Cau, M. Michel-Bechet, G. Fayet, 2012-12-06 The thyroid gland first appears in the phylogenetic scale in the Lamprey larva *Ammocoetes* at the time of metamorphosis see review by Constantinescu 1972 In higher Vertebrates the adult thyroid gland consists of vesicles i.e. thyroid follicles containing colloid and lined with a cubic or prismatic epithelium Since the end of the 19th century many authors have studied the morphogenesis of the follicles during the embryonic and fetal development of the gland in Man and other species principally Chick Rat and Rabbit The development of techniques for culturing organs of higher animals in particular the thyroid by Carrel and Burrows 1910 and Champy 1914 1915 allowed the study of the survival in vivo or in vitro

of grafts or explants of thyroid gland obtained from adult or fetal animals In addition to organotypic cultures techniques for culturing cell suspensions obtained by enzymatic dissociation have recently been refined Moreover histological examination of pathological human glands and adult thyroids experimentally stimulated by thyrotropin hormone TSH has provided additional data for the understanding of thyroid follicle morphogenesis The Biology of Animal Viruses Frank J. Fenner, B. R. McAuslan, C. A. Mims, 2013-09-17 The Biology of Animal Viruses Second Edition deals with animal viruses focusing on molecular biology and tumor virology The book reviews the nature chemical composition structure and classification of animal viruses The text also describes the methods of isolating animal viruses how these are grown in the laboratory assayed purified and used in biochemical experiments The book also describes the structure and chemistry of many known viruses such as the papovaviridae herpes virus poxvirus coronavirus or the Bunyamwera supergroup The book then explains the structure and function of the animal cell including the cytoplasmic organelles the nucleus inhibitors of cell function and viral multiplication Other papers discuss in detail the multiplication of the DNA and RNA viruses whose mechanisms of multiplication differ from those of other viruses Other papers discuss the known prevention and treatment methods of viral diseases as well as the epidemiology and evolution of viral diseases resulting from human s disturbance of the biosphere and from medical and experimental innovations The text can prove useful for immunologists veterinarians virologists molecular researchers students and academicians in the field of cellular microbiology and virology Mammalian Cell Membranes G. A. Jamieson, D. M. Robinson, 2014-05-20 Mammalian Cell Membranes Volume 1 General Concepts is a collection of papers that deals on the physical and chemical studies focusing on membrane structure and function This collection reviews the interpretation of the anatomy of the mammalian cell including its separation and cultivation The different methods of isolation of its surface membrane are then evaluated to bring some understanding of the subject More descriptions of the various physical techniques adopted to membrane constituents and to cell membrane research such as nuclear magnetic resonance electron spin resonance fluorescence and flash photolysis spectroscopy are given Discoveries of mitochondrial DNA and other techniques have increased investigation of the synthesis and components of functional mitochondria leading to different perspectives on models of membrane structure This book can serve the needs of biochemists and microbiologists in advancing their work research and understanding of mammalian cell membranes **Animal Cell Culture Methods**, 1998-07-03 This volume provides complete and thorough coverage of the classical and state of the art methods used in cell culture It also includes basic principles used in the selection of cells for specific scientific study as well as analytical and procedural techniques Key Features Reviews basic principles of cell culture Gives options and techniques on how to look at cells Uses and Standardization of Vertebrate Cell Cultures Elliot M. Levine, 1984 **U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973** United States. Environmental Protection Agency. Library Systems Branch, 1974 **Invertebrate Tissue Culture Methods** Jun Mitsuhashi, 2012-12-06 I started insect cell culture

work in 1962 when T D C Grace reported the first establishment of invertebrate continuous cell lines He obtained growing cells from pupal ovaries of the emperor gum moth *Antheraea euclatypti* At that time I was trying to obtain growing cells from leafhoppers Grace's method could not be applied directly to my culture because of the differences in species the size of the insects and the tissue to be cultured The vertebrate tissue culture methods gave me some ideas for preparing cultures from leafhoppers but those could not be used directly either There were no textbooks and no manuals for invertebrate tissue culture so I had to develop a method by myself First I considered what type and what size of vessels are suitable for insect tissue culture Also I had to look for suitable materials to construct the culture vessels Second I had to examine various culture media especially growth promoting substances such as sera Then I had to improve culture media by trial and error The procedure to set up a primary culture was also a problem How could I sterilize materials How could I remove tissues from a tiny insect How many tissues should I pool in order to set up one culture I had to find out the answers Naturally it took a lot of time *Research Grants Index* National Institutes of Health (U.S.). Division of Research Grants,1970

Research Awards Index ,1977 Principles of Animal Cell Technology: A Practical Approach (Volume: 1) Mr. Veeresh Nandikolmath,2023-04-20 This book provides more extensive information on many intrinsic concepts and practical aspects of working with animal cells which are not accessible Book will serve as a ready reference practical guide The contents of the book are elaborate and span twenty five chapters It has a section covering conceptual background and detailed information on the essentials of animal cell culture and analytical and evaluative techniques involving animal cells The later section of the book is dedicated exclusively to understanding stem cell biology and stem cell culture techniques The unique and special aspect of this book is that the nuances of techniques and personal practical experience of the authors while handling cell lines is explicitly and generously brought out Care has been taken by the authors to provide important and minutest details in every chapter The authors have carefully structured the content to provide details for many topics not well covered elsewhere **The Publishers' Trade List Annual** ,1978 *The Publishers Weekly* ,1893 Cumulative Subject Index ,1997-12-10 International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal Articles address structure and control of gene expression nucleocytoplasmic interactions control of cell development and differentiation and cell transformation and growth Authored by some of the foremost scientists in the field each volume provides up to date information and directions for future research *National Library Service Cumulative Book Review Index, 1905-1974: Authors. [A-Z* National Library Service Corporation,1975 *Arthropod Cell Cultures and Their Application to the Study of Viruses* Emilio Weiss,2012-12-06 To lose is human to win is fortune but to try is our destiny EARL C SUTOR JR The idea of a Symposium on Arthropod Cell Cultures started in July of 1969 shortly after the untimely death of our colleague EARL C SUTOR JR at the age of 38 At first we thought an afternoon or evening session would be sufficient but we were soon convinced that the scope of the Symposium should be greatly enlarged Interest in this topic was increasing at

an astonishing rate Since EARL SUITOR had made a distinct imprint in this new field many scientists who knew him well or just casually wished to honor him in this manner EARL SUITOR was born and raised in New England and received a B S degree in bacteriology from the University of Massachusetts in 1952 As a spirited young man he enlisted in the U S Navy to see the world Instead he was assigned for most of his four year hitch to the Naval Medical Research Institute I met him there in 1954 an enthusiastic and imaginative young fellow with many interests an avid reader of the classics an occasional writer of poetry who blended his interest in scientific literature with that of Science Fiction In 1956 EARL left the Navy to attend George Washington University where he earned an M S degree in 1958 and a Ph D degree in 1963
