

## PAROTIDECTOMY

Johan Fagan

The facial nerve is central to parotid surgery for both surgeon and patient. Knowledge of the surgical anatomy and the landmarks to find the facial nerve are the key to preserving facial nerve function.

### Surgical Anatomy

#### *Parotid gland*

The parotid glands are situated anteriorly and inferiorly to the ear. They overlie the vertical mandibular ramus and masseter muscles, behind which they extend into the retromandibular sulci. The glands extend superiorly from the zygomatic arches and inferiorly to below the angles of the mandible where they overlie the posterior bellies of the digastric and the sternocleidomastoid muscles. The parotid duct exits the gland anteriorly, crosses the masseter muscle, curves medially around its anterior margin, pierces the buccinator muscle, and enters the mouth opposite the 2<sup>nd</sup> upper molar tooth.

#### *Superficial Muscular Aponeurotic System and Parotid Fascia*

The **Superficial Muscular Aponeurotic System (SMAS)** is a fibrous network that invests the facial muscles, and connects them with the dermis. It is continuous with the platysma inferiorly; superiorly it attaches to the zygomatic arch. In the lower face, the facial nerve courses deep to the SMAS and the platysma. The parotid glands are contained within two layers of **parotid fascia**, which extend from the zygoma above and continue as cervical fascia below.

*Structures that traverse, or are found within the parotid gland*

- **Facial nerve and branches** (*Figure 1*)

- **External carotid artery:** It gives off the transverse facial artery inside the gland before dividing into the internal maxillary and the superficial temporal arteries (*Figure 2*).

*Figure 1: Main branches of facial nerve*

*Figure 2: Branches of external carotid artery*

- **Veins:** The maxillary and superficial temporal veins merge into the retromandibular vein within the parotid gland, but are not responsible for draining the gland. Venous drainage of the parotid itself is to tributaries of external and internal jugular veins.
- **Lymphatics:** A number of lymph nodes are present within the gland,
