**Mirror of Health** Zhaofu Fei,Yidi Gu,2007      **Tongue Diagnosis in Chinese Medicine** Giovanni Maciocia,2021-08-31      Modern Tongue Diagnostics in Chinese Medicine Hong Chun Yin,2018-07-15

This book is an introduction to diagnosis and treatment through looking at the tongue Modern tongue diagnostics combines traditional Chinese medical tongue diagnostics with bio holographic theory using the holographic reflections on the tongue to diagnose disease thereby improving the accuracy of the diagnosis in terms of what and where the illness is This book introduces in detail the theory of the tongue midline as well as the positions where various organs are reflected on the tongue as well as the appearances of the tongue corresponding to various pathological changes in these organs This book is the first to publicize the author s many patented tongue diagnosis images such as the panoramic hologram image which for the first time revealed the position and posture of the human body as it appears holographically on the tongue the head and neck gland distribution image the head and facial features map and more The author aided by the experiences of previous scholars discovered the position and posture of the human body as it appears holographically on the tongue The holographic state of the human body as it appears on the tongue is in a prone position that is the head area is reflected at the tip of the tongue with the face facing forward the legs and buttocks are reflected at the back of the tongue and the four limbs are reflected in a bent position on the two sides of the tongue The author has discovered how the glands of the head and neck are mapped on the tongue especially the map of the thyroid gland on the tongue refuting the common belief about how the thyroid gland is reflected on the tongue Contrary to common belief the thyroid gland is not reflected on the two sides of the cervical vertebrae reflection area on the tongue but instead is on the two sides of the upper jiao area the upper third of the tongue The author has determined the areas of the tongue where various organs are reflected as well as the changes in tongue appearance corresponding to the diseases in these organs For example heart disease is often reflected on the tongue as cracks or sunken areas in the heart reflection area of the tongue In many years of clinical experience using tongue diagnostics I have attempted to combine tongue diagnostics with herbal medicine and acupuncture and have attained significant improvements in clinical efficacy and have created a shortcut for accelerating diagnosis and improving efficacy This book will mainly introduce diagnosis and differentiation based on the tongue with some case study
