García-Hípola, Mayka, 2021-05-31 The title of this book pays homage to Vittorio Gregotti's *The Territory of Architecture* but substituting the word territory for the word landscape because the latter is a more personal concept and is related to the perception of the viewer The goal of this book is to show Students and architects how the time devoted to architectural and landscape Design in all the years of our studies and professional life should be deeply related with research The relation between research and teaching and research and practice is present in two complementary disciplines architecture and landscape Therefore the book is organised into three main parts The first is devoted to research and its relation with learning and practicing The second part deals with architecture and its relation with research And the third is about landscape and its relation with the two previous parts The title of each one of them is preceded by the particle which not only means at but also around studying these disciplines not only from its own autonomy but also from other parallel discourses *Atlas of*
