

AMERICANS & THEIR FORESTS

A historical perspective

MICHAEL WILLIAMS

Americans And Their Forests A Historical Geography Studies In Environment And History

Nancy J. Jacobs

Americans And Their Forests A Historical Geography Studies In Environment And History:

Americans and Their Forests Michael Williams,1992-06-26 Dr Williams begins by exploring the role of the forest in American culture the symbols themes and concepts for example pioneer woodsman lumberjack wilderness generated by contact with the vast land of trees He considers the Indian use of the forest describing the ways in which native tribes altered it primarily through fire to promote a subsistence economy Environment and History William Beinart,Peter Coates,2002-01-08 The influence of human economies and cultures on ecosystems is particularly striking in the new worlds into which Europeans have expanded over the past five hundred years Using a comparative and multidisciplinary approach Beinart and Coates examine this neglected aspect of the history of settler incursion and dominance in two frontier nations the USA and South Africa They also seek to explain change in indigenous ideas and practices towards the environment and discuss the rise of popular environmentalism up to the present day **Empire Forestry and the Origins of Environmentalism** Gregory Allen Barton,2002-10-17 What we now know of as environmentalism began with the establishment of the first empire forest in 1855 in British India and during the second half of the nineteenth century over ten per cent of the land surface of the earth became protected as a public trust Sprawling forest reservations many of them larger than modern nations became revenue producing forests that protected the whole household of nature and Rudyard Kipling and Theodore Roosevelt were among those who celebrated a new class of government foresters as public heroes Imperial foresters warned of impending catastrophe desertification and global climate change if the reverse process of deforestation continued The empire forestry movement spread through India Africa Australia New Zealand Canada and then the United States to other parts of the globe and Gregory Barton s study looks at the origins of environmentalism in a global perspective *A Companion to Global Environmental History* J. R. McNeill,Erin Stewart Mauldin,2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China Nature and the English Diaspora Thomas R. Dunlap,1999-09-28 First published in 1999 this book is a comparative history of the development of ideas about nature particularly of the importance of native nature as a part of the culture in the Anglo settler countries of the United States Canada Australia and New Zealand It examines the development of natural history in the great nineteenth century expansion of settlement It explores settlers adaptations to the end of expansion and scientists shift from natural history to ecology Finally it analyzes the diffusion of ecology through the Anglo world and to the general population as well as the rise

of environmentalism Addressing not only scientific knowledge but also popular issues such as hunting common names for plants and animals landscape painting and nature stories this book explores the ways in which English speaking settlers looked at nature in their new lands and at the place they gave it in their societies **This Delta, this Land** Mikko Saikku,2011-03-15 This environmental history of the Yazoo Mississippi Delta places the Delta s economic and cultural history in an environmental context It reveals the human aspects of the region s natural history including land reclamation slave and sharecropper economies ethnic and racial perceptions of land ownership and stewardship and even blues music

Encountering the Past in Nature Timo Myllyntaus,Mikko Saikku,2001 Annotation Six essays by Finnish scholars which accounts for some of the notes being in Finnish discuss the new science of environmental history issues and case studies of change over time in forested Northern Hemisphere zones due to natural and human forces and Western conceptions of wilderness The editors are with the U of Helsinki whose press first published the book in 1999 Annotation copyrighted by Book News Inc Portland OR [An Environmental History of Russia](#) Paul Josephson,2013-04-30 This environmental history of the former Soviet Union explores the impact that state economic development programs had on the environment

[American Environmental History](#) Carolyn Merchant,2007 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity s unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis American Environmental History addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to conduct their research The volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites

Environment, Power, and Injustice Nancy J. Jacobs,2003-06-26 Sample Text *The Mountains of the Mediterranean World* J. R. McNeill,2003-12-18 An environmental history of the mountain areas of Turkey Greece Italy Spain and Morocco

The Relations of History and Geography Henry Clifford Darby,2002 This set of twelve previously unpublished essays on historical geography written by Darby in the 1960s explains the basis of his ideas The essays are divided into three quartets of studies relating to England France and the United States *The Matter of History* Timothy J. LeCain,2017-09-11

The Matter of History links the history of people with the history of things through a bold new materialist theory of the past

Biographical Memoirs of Fellows, X Ron Johnston, 2011-12-15 Seventeen obituaries of recently deceased Fellows of the British Academy The Green and the Brown Frank Uekötter, 2006-08-14 This study provides the first comprehensive discussion of conservation in Nazi Germany Looking at Germany in an international context it analyses the roots of conservation in the late 19th century the gradual adaptation of racist and nationalist thinking among conservationists in the 1920s and their indifference to the Weimar Republic It describes how the German conservation movement came to cooperate with the Nazi regime and discusses the ideological and institutional lines between the conservation movement and the Nazis Uekoetter further examines how the conservation movement struggled to do away with a troublesome past after World War II making the environmentalists one of the last groups in German society to face up to its Nazi burden It is a story of ideological convergence of tactical alliances of careerism of implication in crimes against humanity and of deceit and denial after 1945 It is also a story that offers valuable lessons for today's environmental movement **American Environmental**

History Louis S. Warren, 2021-08-03 Explore how the peoples of America understood and changed their natural environments remaking their politics culture and societies In this newly revised Second Edition of American Environmental History celebrated environmental historian and author Louis S Warren provides readers with insightful examination of how different American peoples created and reacted to environmental change and threats from the era before Columbus to the COVID 19 pandemic You'll find concise editorial introductions to each chapter and interpretive interventions throughout this meticulous collection of essays and historical documents This book covers topics as varied as Native American relations with nature colonial invasions American slavery market expansion and species destruction urbanization Progressive and New Deal conservation national parks the environmental impact of consumer appetites environmentalism and the backlash against it environmental justice and climate change This new edition includes twice as many primary documents as the First Edition along with findings from related fields such as Native American history African American history geography and environmental justice Ideal for students and researchers studying American environmental history and for those seeking historical perspectives on contemporary environmental challenges this book will earn a place in the libraries of anyone with an interest in American history and the impact of American peoples on the environment and the world around them Louis S Warren is the W Turrentine Jackson Professor of Western U S History at the University of California Davis He is a two time winner of the Caughey Western History Association Prize a Guggenheim Fellow and recipient of the Albert Beveridge Award of the American Historical Association and the Bancroft Prize in American History *Planting Nature* Shaul E.

Cohen, 2004-05-11 Trees hold a powerful place in American constructions of what is good in nature and the environment As we attempt to cope with environmental crises trees are increasingly enlisted with great fervor as agents of our stewardship over nature In this innovative and impassioned book Shaul E Cohen exposes the way that environmental stewardship is

undermined through the manipulation of trees and the people who plant them by a partnership of big business the government and tree planting groups He reveals how positive associations and symbols that have been invested in trees are exploited by an interlocking network of government agencies private timber companies and nongovernmental organizations to subvert the power of people who think that they are building a better world Planting Nature details the history of tree planting in the United States and the rise of popular sentiment around trees including the development of the Arbor Day holiday and tree planting groups such as the National Arbor Day Foundation and American Forests Drawing from internal papers government publications advertisements and archival documents Cohen illustrates how organizations promote tree planting as a way of shifting attention away from the causes of environmental problems to their symptoms masking business as usual agendas Ultimately Planting Nature challenges the relationships between a green public the organizations that promote their causes and the powers that be providing a cautionary tale of cooperation and deception that cuts across the political spectrum

Environmental Infrastructure in African History Emmanuel Kreike, 2013-05-13 Environmental Infrastructure in African History offers a new approach for analyzing and narrating environmental change Environmental change conventionally is understood as occurring in a linear fashion moving from a state of more nature to a state of less nature and more culture In this model non Western and premodern societies live off natural resources whereas more modern societies rely on artifact or nature that is transformed and domesticated through science and technology into culture In contrast Emmanuel Kreike argues that both non Western and premodern societies inhabit a dynamic middle ground between nature and culture He asserts that humans in collaboration with plants animals and other animate and inanimate forces create environmental infrastructure that constantly is remade and reimagined in the face of ongoing processes of change

Climate Change and the Course of Global History John L. Brooke, 2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity

Geography and History Alan R. H. Baker, 2003-11-06 Table of contents
