**Social and Economic Benefits of Protected Areas** Marianne Kettunen, Patrick ten Brink, 2013-09-05 Protected areas PAs contain biodiversity and ecosystems of high conservation value In addition these areas provide a range of benefits both direct and indirect to our societies and economies i e so called ecosystem services These services include for example an ecosystem s ability to regulate floods and climate purify water secure the pollination of crops and create opportunities for recreation culture and tourism This book offers a comprehensive introduction to the socio economic benefits of PAs and PA networks and provides step by step practical guidance on identifying assessing and valuing the various ecosystem services and related benefits provided by PAs It also aims to improve the communication of PA benefits to different stakeholders and the general public It is shown that identifying and valuing the socio economic benefits of PAs can be beneficial for several reasons Demonstrating socio economic importance of a protected site can significantly increase political and stakeholder support for the site and resolve conflicts between different interest groups This can lead to positive changes in policies and decision making Insights on PA benefits are also needed to identify a combination of actions and land use practices that best support the sustainable and equitable utilisation of these benefits while retaining a site s conservation goals Finally demonstrating different benefits can help to discover alternative and sustainable sources for financing the management of PAs

**Serengeti IV** Anthony R. E. Sinclair, Kristine L. Metzger, Simon A. R. Mduma, John M. Fryxell, 2015-05-11 The vast savannas and great migrations of the Serengeti conjure impressions of a harmonious and balanced ecosystem But in reality the history of the Serengeti is rife with battles between human and non human nature In the 1890s and several times since the cattle virus rinderpest at last vanquished in 2008 devastated both domesticated and wild ungulate populations as well as the lives of humans and other animals who depended on them In the 1920s tourists armed with the world s most expensive hunting gear filled the grasslands And in recent years violence in Tanzania has threatened one of the most successful long term ecological research centers in history Serengeti IV the latest installment in a long standing series on the region s ecology and biodiversity explores the role of our species as a source of both discord and balance in Serengeti ecosystem dynamics Through chapters charting the complexities of infectious disease transmission across populations agricultural expansion and the many challenges of managing this ecosystem today this book shows how the people and landscapes surrounding crucial protected areas like Serengeti National Park can and must contribute to Serengeti conservation In order to succeed conservation efforts must also focus on the welfare of indigenous peoples allowing them both to sustain their agricultural practices and to benefit from the natural resources provided by protected areas an undertaking that will require the strengthening of government and education systems and as such will present one of the greatest conservation challenges of the next century

**Protected Area Governance and Management** Graeme L. Worboys, Michael Lockwood, Ashish Kothari, Sue Feary, Ian Pulsford, 2015-04-08 Protected Area Governance and Management presents a compendium of original text case studies and examples from across the world by drawing on the literature and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently the effective governance and management of protected areas for which they are responsible now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless protected areas are a socio political phenomenon and the ways that nations understand govern and manage them is always open to contest and debate. The book aims to enlighten educate and above all to challenge readers to think deeply about protected areas their future and their past as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers managers in charge and executive level managers.

**Agrobiodiversity and the Law** Juliana Santilli, 2012-03-15 A wide range of crop genetic resources is vital for future food security. Loss of agricultural biodiversity increases the risk of relying on a limited number of staple food crops. However many laws such as seed laws plant varieties protection and access and benefit sharing laws have direct impacts on agrobiodiversity and their effects have been severely underestimated by policy makers. This is of concern not only to lawyers but also to agronomists biologists and social scientists all of whom need clear guidance as to the relevance of the law to their work. This book analyzes the impact of the legal system on agrobiodiversity or agricultural biodiversity the diversity of agricultural species varieties and ecosystems. Using an interdisciplinary approach it takes up the emerging concept of agrobiodiversity and its relationship with food security nutrition health environmental sustainability and climate change. It assesses the impacts on agrobiodiversity of key legal instruments including seeds laws the International Convention for the Protection of New Varieties of Plants plant breeders rights the Convention on Biological Diversity regarding specifically its impact on agrobiodiversity and the International Treaty on Plant Genetic Resources for Food and Agriculture. It also reviews the options for the implementation of these instruments at the national level in several countries. It discusses the interfaces between the free software movement the commons movement and seeds as well as the legal instruments to protect cultural heritage and their application to safeguard agrobiodiversity rich systems. Finally it analyzes the role of protected areas and the possibility of using geographical indications to enhance the value of agrobiodiversity products and processes.

Understanding Emerging Security Challenges Ashok Swain, 2013 This book offers an overview of emerging security challenges in the global environment in the post Cold War era. After the fall of the Berlin Wall and the subsequent shifting of

international political environment a new broader concept of security began to gain acceptance This concept encompassed socio economic environmental challenges such as resource scarcity and climate change water sharing issues deforestation and forest protection measures food and health security and large population migration The book examines the causes and consequences of these emerging security threats and retains a critical focus on evolving approaches to address these issues The author attempts to develop a framework for sustainable security in a rapidly changing global political landscape which seeks to bring states and societies together in a way that addresses weaknesses of the evolving international system Moreover through a detailed analysis of the emerging security issues and their pathways the book further argues that the evolving processes not only pose critical challenges but also provide remarkable opportunity for cooperation and collaboration among and within various stakeholders This book will be of much interest to students of global security war and conflict studies peace studies and IR in general

*The Economics of Ecosystems and Biodiversity in Local and Regional Policy and Management* Heidi Wittmer, Haripriya Gundimeda, 2012 Human well being is dependent upon ecosystem services provided by nature for free such as water and air purification fisheries timber and nutrient cycling These are predominantly public goods with no markets and no prices so their loss is often not detected by our current economic incentive system and therefore continues unabated A variety of pressures resulting from population growth changing diets urbanisation climate change and many other factors is causing biodiversity to decline and ecosystems to be degraded The world's *Community Participation in Conservation of Great Himalayan National Park, India* Suman Bhanoo, The book has relevance to academics scholars administrators policy experts anthropologists sociologists development scientists environmentalists as well as anyone interested in the welfare of communities residing in the vicinity of a Protected Area It stands out as a work that will stand the test of time and should be an asset that many would like to keep Dr Abhik Ghosh Professor and Chairperson Department of Anthropology Panjab University Chandigarh This book is an excellent compilation of the outcome of the intense research work undertaken in the emerging field of Community Based Ecotourism Management at The UNESCO World Heritage Site The Great Himalayan National Park and it will certainly be useful to provide necessary information future research road map and guidelines for all the stakeholders for effective planning and implementation of sustainable ecotourism Ajay Srivastav Faculty Wildlife Institute of India Dehradun Former Director Great Himalayan National Park

*Environment and Society in Ethiopia* Girma Kebede, 2016-10-04 Ethiopia is facing environmental and poverty challenges and urgently needs effective management of its environmental resources Much of the Ethiopian landscape has been significantly altered and reshaped by centuries of human activities and three quarters of the rural population is living on degraded land Over the past two decades the country has seen rapid economic and population growth and unparalleled land use change This book explores the challenges of sustaining the resource base while fuelling the economy and providing for a growing population that is greatly dependent on natural resources for income and livelihoods Adopting a political ecology

perspective this book comprehensively examines human impacts on the environment in Ethiopia defining the environment both in terms of the quantity and quality of renewable and non renewable natural resources With high levels of economic production and consumption also come unintended side effects waste discharges emissions of pollutants and industrial effluents These pollutants can degrade the quality of water air land and forests as well as harm the health of people animals and other living organisms if untreated or disposed of improperly This book demonstrates how the relationship between society and environment is inherently and delicately interwoven providing an account of Ethiopia s current environment and natural resource base and future considerations for environmentally sustainable development      **Environmental**

**Humanities of Extraction in Africa** James Ogude,Tafadzwa Mushonga,2022-08-17 This book brings together perspectives on resource exploitation to expose the continued environmental and socio political concerns in post colonial Africa The continent is host to a myriad of environmental issues largely resulting from its rich diversity of natural resources that have been historically subjected to exploitation Colonial patterns of resource use and capital accumulation continue unabated making environmental and related socio political problems a dominant feature of African economies The book pursues the manifestation of these problems through four themes environmental justice violent capitalocenes indigenous knowledge and climate change The editors locate the book within the broad fields of political ecology and environmental geopolitics to highlight the intricate geographies of resource exploitation across Africa It uniquely focuses on the socio political and geopolitical dynamics associated with the exploitation of Africa s natural resources and its people The case studies from different parts of Africa tell a compelling story of resource exploitation related issues of environmental degradation in a continent particularly vulnerable to climate change and the continued plundering of its natural resources The book will be of great interest to scholars and students from the interdisciplinary fields of the environmental humanities and environmental studies more broadly as well as those studying political ecology environmental policy and natural resources with a specific focus on Africa      **The Role of Ecosystems in Disaster Risk Reduction** Fabrice G. Renaud,Karen

Sudmeier-Rieux,Marisol Estrella,2013 The uptake of ecosystem based approaches for disaster risk reduction DRR is slow however despite some success stories There are multiple reasons for this reluctance ecosystem management is rarely considered as part of the portfolio of DRR solutions because the environmental and disaster management communities typically work independently from each other its contribution to DRR is highly undervalued compared to engineered solutions and therefore not given appropriate budget allocations and there are poor interactions between policymakers and researchers leading to unclear and sometimes contradictory scientific information on the role of ecosystems for DRR The aim of this book is to provide an overview of knowledge and practice in this multidisciplinary field of ecosystems management and DRR The contributors professionals from the science and disaster management communities around the world represent state of the art knowledge practices and perspectives on the topic      Forest conservation in protected areas of Bangladesh

Mohammad Shaheed Hossain Chowdhury, 2014-07-15 This book dealt with a number of issues under the broad subject matter of protected area focusing on the policy of collaborative management as a means to augment the forest conservation activities and enhance community development in Bangladesh. Studies covered in the book emerged with the success stories of protected area co-management both in terms of community development and biodiversity conservation. Significant level of development was noticed in the socio-economic conditions of the surrounding communities. Empowerment and improved social dignity of women participants signifies the initiation of co-management approach. The principles of participatory governance were found reasonably well reflected in legal and policy frameworks. Based on the lessons from the studies, a general metaphysical model namely Spider web model of protected area co-management has been developed that can be potentially applicable in countries where local communities rely heavily on protected areas. **Authenticity in Nature**

Nigel Dudley, 2012-03-12 This book examines the concept of naturalness in ecosystems, discusses its values, and considers choices about the level of naturalness in conservation efforts. The author argues that all ecosystems have been modified and the idea of places untouched by humans is a myth. But there are large differences in the degree of modification and levels of naturalness which can be identified. Changes are not always irreversible; some apparent wilderness areas are sites of former civilizations. There is no longer any simple distinction possible between natural and cultural systems. In the future, society will to some extent choose the degree of naturalness in land and seascapes. The growth of protected areas is an early sign of this, as are changes in forest management, dam removal, and control of invasive species. To make informed choices about these areas, the author shows that we must understand the characteristics and values of naturally regulating ecosystems, their practical benefits, social values, and management needs. **Authenticity in Nature** uses a rigorous definition of authenticity to help in the understanding and measurement of naturalness. It discusses the choices facing us and some of the information we need to make decisions relating to land and water management. Practical issues of management and numerous terrestrial and aquatic examples from around the world are discussed. It is an optimistic and highly original book aiming to make genuine advances in our understanding and management of natural systems. **Knowing the Salween River: Resource Politics of**

**a Contested Transboundary River** Carl Middleton, Vanessa Lamb, 2019-08-12 This open access book focuses on the Salween River shared by China, Myanmar, and Thailand that is increasingly at the heart of pressing regional development debates. The basin supports the livelihoods of over 10 million people and within it there is great socio-economic, cultural, and political diversity. The basin is witnessing intensifying dynamics of resource extraction alongside large dam construction, conservation, and development intervention that is unfolding within a complex terrain of local, national, and transnational governance. With a focus on the contested politics of water and associated resources in the Salween basin, this book offers a collection of empirical case studies that highlights local knowledge and perspectives. Given the paucity of grounded social science studies in this contested basin, this book provides conceptual insights at the intersection of resource governance.

development and politics of knowledge relevant to researchers policy makers and practitioners at a time when rapid change is underway Fills a significant knowledge gap on a major river in Southeast Asia with empirical and conceptual contributions Inter disciplinary perspective and by a range of writers including academics policy makers and civil society researchers the majority from within Southeast Asia New policy insights on a river at the cross roads of a major political and development transition

**Wildlife Ecotourism in Indonesia** Jatna Supriatna,2025-07-01 Wildlife tourism has long been a significant and popular sector It widespread a substantial contribution to biodiversity conservation First it generates direct income from tourists through entrance fees taxes and other sources Second it provides alternative income for communities surrounding tourism areas Third it offers a basis for environmental activists to advocate for the preservation of Indonesia s biodiversity Fourth it supports both central and regional governments in developing sustainable and continuous areas Fifth it creates economically based activities in conservation regions for the private sector involved in biodiversity conservation Thus nature tourism is often regarded as sustainable development that effectively balances environmental social and economic aspects

*Participatory Mangrove Management in a Changing Climate* Rajarshi DasGupta,Rajib Shaw,2017-01-24 This book outlines the performance and management of mangroves in the changing climatic scenario of the Asia Pacific region and draws examples and lessons from the national and community driven mangrove conservation programs of relevant countries including Pakistan India Bangladesh Sri Lanka Myanmar Thailand Cambodia Indonesia the Philippines and Japan as well as the Pacific islands By highlighting the major drawbacks that hinder effective mangrove conservation the book contributes towards enhancing climate resilience of communities through proposition of corrective methods and ameliorative approaches of mangrove conservation Mangroves play an important role in adapting to climate change and provide a plethora of ecosystem services that are fundamental to human survival Yet these ecosystems are exceptionally prone to extinction due to increased human interventions and changes in environmental boundary conditions Especially in the Asia Pacific region mangroves have dwindled at an exceptional high rate over the past three decades As the threat of climate change hovers over millions of people in this region particularly those who crowd the low lying coastal areas conservation restoration of mangroves through appropriate policies and practices remain highly imperative The primary target readers for this book are students and researchers in the fields of conservation and management of mangroves especially from the developing tropical countries of the Asia Pacific region Other target groups comprise policy planners practitioners and NGO workers who will be able to apply the collective knowledge from this work towards proactive mangrove conservation through effective mediation in local communities

**An Introduction to the Green Economy** Adrian C. Newton,Elena Cantarello,2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of

materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy

**Handbook of Research on Socio-Economic Sustainability in the Post-Pandemic Era** Oleński, Jozef, Sachs, Jeffrey, Susai, Masayuki, Tsekouras, Yannis, Gjonça, Arjan, 2023-08-18 The COVID 19 pandemic intensifies underlying structural obstacles and systemic inefficiencies However it also provokes the accelerated adoption of innovations made possible by the already growing technological development before being accompanied by necessary institutional and systemic adjustments This leads to multidimensional crises while also opening new socio economic challenges and prospects globally The Handbook of Research on Socio Economic Sustainability in the Post Pandemic Era engages global aspects of the crisis by means of standard and innovative economic policies at the national and international level It confronts the challenges facing businesses and reveals models of effective transformations and strategies in the present circumstances The book further investigates individual and collective societal challenges in light of sustaining our constantly upgrading humanitarian values in the 21st century Covering topics such as fiscal adjustment measures sustainable marketing and state society relations this major reference work is a dynamic resource for government officials sociologists economists business leaders human resource managers libraries students and faculty of higher education researchers and academicians
