Arctic Crossing A Journey Through The Northwest Passage And Inuit Culture:

Arctic Crossing Jonathan Waterman, 2001 The Arctic with its twenty four hour daylight surprisingly curious animals and inexplicable humming noises is a world of constant danger and limitless possibility This unforgiving landscape is home to the Inuit the name they prefer to Eskimos whose complex and little studied society is fascinating in its divergence from as well as its assimilation into Western culture Jonathan Waterman s 2 200 mile journey across the roof of North America took him through Inuit communities in Alaska to Nunavut Canada s new 770 000 square mile self governed territory His story at once illuminating and alarming offers firsthand observations of their life language and beliefs records their reactions to global modernization documents their centuries of unjust treatment at the hands of Kabloona bushy eyed whites and witnesses unemployment teen suicide and such persistent plagues as spousal violence and substance abuse From the perspective of his 1997 1999 voyage as the Inuit stand on the brink of a more hopeful independent future he also looks into a past marked by famous or infamous Arctic explorers government cover ups and environmental destruction This beautifully written work of intrepid reporting and even scholarship also reveals the physical risks and psychological perils of crossing the legendary Northwest Passage Utterly alone for weeks at a time Waterman struggles against freezing conditions the tricks played on him by his own mind and dangers more complex than aggressive bears stormy seas and mosquito blizzards Following the advice of an Inuit shaman who said that those things hidden from others are discovered only far from the dwellings of men through privation and suffering Waterman kayaks skis dogsleds and sails across the Great Solitudes in a thrilling and ultimately successful quest for this true wisdom arriving at a profound understanding of environment and culture

Explorer Travellers and Adventure Tourism Jennifer Laing, Warwick Frost, 2014-08-04 This book examines the nexus between exploring and tourism and argues that exploration travel based heavily on explorer narratives and the promises of personal challenges and change is a major trend in future tourism In particular it analyses how romanticised myths of explorers form a foundation for how modern day tourists view travel and themselves Its scope ranges from the Golden Age of imperial explorers in the 19th and early 20th centuries through the growth of adventure and extreme tourism to possible future trends including space travel The volume should appeal to researchers and students across a variety of disciplines including tourism studies sociology geography and history

[Cultural Ecologies of the Land](#) Patrick J. Dillon, 2025-04-15 *Cultural Ecologies of the Land* is a radical and challenging reassessment of the way we relate to the land and to infrastructure There was a time when the land defined us Now with each passing year we are increasingly detached from it It was once the centre stage of humanity now it is the setting for a technological drama What has happened and why does it matter This book is a multi layered account of people and environment shaping each other through cumulative moment to moment day to day change and a template for thinking about place locality belonging and identity *Cultural Ecologies of the Land* presents the existential crisis that many believe we now face as a systemic problem arising from social

institutions and forms of behaviour that have been marginalised with our dependency on modern infrastructure It explains the part people have played in contributing to the crisis and how regenerating relationships with the land offers a route towards alleviating it This is not only about acknowledging our impact on Earth but also about understanding ourselves in relation to it how we engage with our surroundings make sense of them live and work in them and create narratives that connect and sustain us *Life in the Arctic* Susie Brooks,2003-12-15 Defines the Arctic and indicates how plants animals and humans learn to survive in this extreme environment
