Inference in Argumentation

Eddo Rigotti, Sara Greco, 2018-12-10 This book investigates the role of inference in argumentation considering how arguments support standpoints on the basis of different loci. The authors propose and illustrate a model for the analysis of the standpoint argument connection called Argumentum Model of Topics (AMT). A prominent feature of the AMT is that it distinguishes within each and every single argumentation between an inferential/procedural component on which the reasoning process is based and a material/contextual component which anchors the argument in the interlocutors' cultural and factual common ground. The AMT explains how these components differ and how they are intertwined within each single argument. This model is introduced in Part II of the book following a careful reconstruction of the enormously rich tradition of studies on inference in argumentation from antiquity to contemporary authors without neglecting medieval and post-medieval contributions. The AMT is a contemporary model grounded in a dialogue with such tradition whose crucial aspects are illuminated in this book.

Arguments and Arguing Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of *Arguments and Arguing* contains the same balance of theory and practice, breadth of coverage, current and relevant examples, and accessible writing style that made previous editions so popular in hundreds of classrooms. The authors draw from classic and recent argumentation theory and research, contextualized with well-chosen examples to showcase a narrative style of argumentation and the values and attitudes of audiences. Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums from interpersonal interactions to academic debate to politics to business. A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments. The ability to argue is necessary if people are to solve problems, resolve conflicts, and evaluate alternative courses of action. While many are taught that arguing is counterproductive and arguments should be avoided, Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity. Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion.

Examining

Argumentation in Context Frans H. van Eemeren, Frans Hendrik Eemeren, 2009 Examining Argumentation in Context Fifteen studies on strategic maneuvering contains a selection of papers on strategic maneuvering in argumentative discourse Starting point of all of these contributions is that a satisfactory analysis and evaluation of strategic maneuvering is possible only if the argumentative discourse is first situated in the communicative and interactional context in which it occurs While some of the contributions present general views with regard to strategic maneuvering other contributions report on the results of empirical studies examine strategic maneuvering in a particular legal or political context or highlight the presentational design of strategic maneuvering Examining Argumentation in Context therefore provides an insightful view of recent developments in the research on strategic maneuvering which is currently prominent in the study of argumentation
