Arguments and Arguing Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of *Arguments and Arguing* contains the same balance of theory and practice breadth of coverage current and relevant examples and accessible writing style that made previous editions so popular in hundreds of classrooms The authors draw from classic and recent argumentation theory and research contextualized with well chosen examples to showcase a narrative style of argumentation and the values and attitudes of audiences Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums from interpersonal interactions to academic debate to politics to business A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments The ability to argue is necessary if people are to solve problems resolve conflicts and evaluate alternative courses of action While many are taught that arguing is counterproductive and arguments should be avoided Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion

Rhetorical Aspects of Discourses in Present-Day Society Lotte Dam, Lise-Lotte Holmgreen, Jeanne Strunk, 2009-05-27 Since antiquity the notion of rhetoric has been associated with Aristotle Cicero and Quintilian Their theories are central to the understanding that on the one hand rhetoric can be used for persuading and convincing an audience and on the other for becoming an eloquent speaker Based on this understanding the study of rhetoric was for many years regarded by scholars as a meaningless enterprise as it was perceived as a study of linguistic ornamentation However in the beginning of the twentieth century scholars regained an interest in the study of rhetoric in recognition of rhetorical skills being important for communication in modern society Like speakers in public life e.g. politicians who had always acknowledged the role of rhetoric all sorts of communicators mediators and scholars became interested in rhetoric as a practical tool for building up texts meant for the public sphere as well as an analytical tool for the critique of public argumentation This led to the development of new theories from New Rhetoric over Rhetorical Criticism to theories of genre and discourse reflecting the view that rhetoric must be understood and used against the social and cultural framework in which it is embedded The contributions of this book reflect this multi-faceted approach to rhetoric discourse and genre through their focus upon and analysis of different institutionalised discourses Thus within the three sections of political journalistic and organisational discourse the articles discuss various discourse types and their rhetorical features

contributing to the understanding of rhetoric and discourse having significant influence on human action and interaction in society

Fundamentals of Legal Argumentation Eveline T. Feteris, 2017-07-10. This book is an updated and revised edition of *Fundamentals of Legal Argumentation* published in 1999. It discusses new developments that have taken place in the past 15 years in research of legal argumentation, legal justification and legal interpretation as well as the implications of these new developments for the theory of legal argumentation. Almost every chapter has been revised and updated and the chapters include discussions of recent studies, major additions on topical issues, new perspectives and new developments in several theoretical areas. Examples of these additions are discussions of recent developments in such areas as Habermas theory, MacCormick's theory, Alexy's theory, Artificial Intelligence and law and the pragma-dialectical theory of legal argumentation. Furthermore, it provides an extensive and systematic overview of approaches and studies of legal argumentation in the context of legal justification in various legal systems and countries that have been important for the development of research of legal argumentation. The book contains a discussion of influential theories that conceive the law and legal justification as argumentative activity. From different disciplinary and theoretical angles, it addresses such topics as the institutional characteristics of the law and the relation between general standards for moral discussions and legal standards such as the Rule of Law. It discusses patterns of legal justification in the context of different types of problems in the application of the law and it describes rules for rational legal discussions. The combination of the sound basis of the first edition and the discussions of new developments make this new edition an up-to-date and comprehensive survey of the various theoretical influences which have informed the study of legal argumentation. It discusses salient backgrounds to this field as well as major approaches and trends in the contemporary research. It surveys the relevant theoretical factors both from various continental law traditions and common law countries.

Towards Pan-Africanism Stephen M. Magu, 2023-03-11. This book traces the development and impact of regional economic communities (RECs) in Africa and addresses a timely question: do REC members and the REC itself positively influence member states' behaviors towards other members and more broadly regionally and continentally due to REC membership? Changing member states' behaviors is measured across three interconnected fundamental dimensions of societal systems proposed by Marshall and Elzinga: Marshall in CSP's Global Report 2017. These are: i) the persistence of conflict or its counterpoint achieving peace; ii) fostering democratization and better governance; and iii) achieving socio-economic development and as proposed by this research, a fourth dimension: iv) being active participants in multilateralism. Is membership in a REC ultimately beneficial to the member and other countries in the

region While there are no clear and obvious at least discernible traditional benefits such as increase in trade perhaps because Africa s overall trade relative to the world is about 3 percent there are other non trade benefits e g decrease in conflict coercion to take certain actions towards peace and refrain from others coups and wars presenting in REC member states These in actions abilities coercions exclusions and cooperation instances are outlined and discussed in the book
