Author and Title Index ,1975 *Teacher Noticing: Bridging and Broadening Perspectives, Contexts, and Frameworks* Edna O. Schack,Molly H. Fisher,Jennifer A. Wilhelm,2017-05-16 This book reflects on the continuing development of teacher noticing through an exploration of the latest research The authors and editors seek to clarify the construct of teacher noticing and its related branches and respond to challenges brought forth in earlier research The authors also investigate teacher noticing in multiple contexts and frameworks including mathematics science international venues and various age groups *Early Algebraization* Jinfa Cai,Eric Knuth,2011-02-24 In this volume the authors address the development of students algebraic thinking in the

elementary and middle school grades from curricular cognitive and instructional perspectives The volume is also international in nature thus promoting a global dialogue on the topic of early Algebraization

Teaching Mathematics in Grades 6 - 12 Randall E. Groth, 2012-08-10 A journey into the vibrant and intriguing world of mathematics education Teaching Mathematics in Grades 6 12 explores how research in mathematics education can inform teaching practice in grades 6 12 The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students mathematical thinking and then connecting this research to practices that enhance students understanding of the material The chapters in Part I introduce secondary teachers to the field of mathematics education with cross cutting issues that apply to teaching and learning in all mathematics content areas The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6 12 classrooms and how students thinking may develop in response to different teaching strategies

Math Education for America? Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest
