Nelson, 2010-11-01 *The Land Is Our Community* Roberta L. Millstein, 2024-08-12 A contemporary defense of

conservationist Aldo Leopold's vision for human interaction with the environment. Informed by his experiences as a hunter, forester, wildlife manager, ecologist, conservationist, and professor, Aldo Leopold developed a view he called the land ethic. In a classic essay published posthumously in *A Sand County Almanac*, Leopold advocated for an expansion of our ethical obligations beyond the purely human to include what he variously termed the land community or the biotic community: communities of interdependent humans, nonhuman animals, plants, soils, and waters understood collectively. This philosophy has been extremely influential in environmental ethics as well as conservation biology and related fields. Using an approach grounded in environmental ethics and the history and philosophy of science, Roberta L. Millstein reexamines Leopold's land ethic in light of contemporary ecology. Despite the enormous influence of the land ethic, it has sometimes been dismissed as either empirically out of date or ethically flawed. Millstein argues that these dismissals are based on problematic readings of Leopold's ideas. In this book, she provides new interpretations of the central concepts underlying the land ethic: interdependence, land community, and land health. She also offers a fresh take on his argument for extending our ethics to include land communities as well as Leopold-inspired guidelines for how the land ethic can steer conservation and restoration policy.

[Leopold's Shack and Ricketts's Lab](#) Michael Lannoo, 2010-05-01 Aldo Leopold and Ed Ricketts are giants in the history of environmental awareness. They were born ten years apart and only about 200 miles apart and died within weeks of each other in 1948. Yet they never met and they didn't read each other's work. This illuminating book reveals the full extent of their profound and parallel influence both on science and our perception of the natural world today. In a lively comparison, Michael J. Lannoo shows how deeply these two ecological luminaries influenced the emergence both of environmentalism and conservation biology. In particular, he looks closely at how they each derived their ideas about the possible future of humanity based on their understanding of natural communities. Leopold and Ricketts both believed that humans cannot place themselves above earth's ecosystems and continue to survive. In light of climate change, invasive species, and collapsing ecosystems, their most important shared idea emerges as a powerful key to the future.

Freyfogle, 2017-02-27 Since the birth of the modern environmental movement in the 1970s the United States has witnessed dramatic shifts in social equality ecological viewpoints and environmental policy With these changes has also come an increased popular resistance to environmental reform but as Eric T Freyfogle reveals in this book that resistance has far deeper roots Calling upon key environmental voices from the past and present including Aldo Leopold Wendell Berry David Orr and even Pope Francis in his Encyclical and exploring core concepts like wilderness and the tragedy of the commons A Good That Transcends not only unearths the causes of our embedded culture of resistance but also offers a path forward to true lasting environmental initiatives A lawyer by training with expertise in property rights Freyfogle uses his legal knowledge to demonstrate that bad land use practices are rooted in the way in which we see the natural world value it and understand our place within it While social and economic factors are important components of our current predicament it is our culture he shows that is driving the reform crisis and in the face of accelerating environmental change a change in culture is vital Drawing upon a diverse array of disciplines from history and philosophy to the life sciences economics and literature Freyfogle seeks better ways for humans to live in nature helping us to rethink our relationship with the land and craft a new conservation ethic By confronting our ongoing resistance to reform as well as pointing the way toward a common good A Good That Transcends enables us to see how we might rise above institutional and cultural challenges look at environmental problems appreciate their severity and both support and participate in reform Grassland Walter F.
