Analytical Sociology and Social Mechanisms Pierre Demeulenaere, 2011-03-24 Mechanisms are very much a part of social life For example we can see that inequality has tended to increase over time and that cities can become segregated But how do such mechanisms work Analytical sociology is an influential approach to sociology which holds that explanations of social phenomena should focus on the social mechanisms that bring them about This book evaluates the major features of this approach focusing on the significance of the notion of mechanism Leading scholars seek to answer a number of questions in order to explore all the relevant dimensions of mechanism based explanations in social sciences How do social mechanisms link together individual actions and social environments What is the role of multi agent modelling in the conceptualization of mechanisms Does the notion of mechanism solve the problem of relevance in social sciences explanations

The Early Origins of the Social Sciences Lynn McDonald, 1996 This study traces the methodological foundations research techniques and basic concepts of the social sciences from their earliest origins to the beginning of 20th century It discusses the French Enlightenment British moral philosophy and includes figures from the 19th century such as Marx

History in the Humanities and Social Sciences Richard Bourke, Quentin Skinner, 2022-12-22 Offers a collaborative exploration of the role of historical understanding in leading disciplines across the humanities and social sciences

Scientific Statesmanship, Governance and the History of Political Philosophy Kyriakos N. Demetriou, Antis Loizides, 2015-02-11 Over the centuries the question of good or effective governance has undergone several transformations and ramifications to fit within certain social cultural and historical contexts What defines political knowledge What is the measure of expert political leadership Various interpretations perspectives and reconceptualizations emerge as one moves from Plato to the present This edited book explores the relationship between political expertise which is defined as scientific statesmanship or governance and political leadership throughout the history of ideas An outstanding group of experts study and analyze the ideas of significant philosophers such as Plato Aristotle Augustine Machiavelli Hobbes Locke Montesquieu Kant Burke Comte and Weber among others The contributors aim to interpret these thinkers approaches to scientific statesmanship deepening our understanding of the idea itself and decoding its theoretical complexities In the face of the ongoing crisis of the traditional party system and the eroding structures within the new cultural financial and political environment in the era of globalization tracing the connection between Plato's idealist statesmanship to twentieth century modernist politics is an important and ever challenging enterprise one that promises to interest scholars of the history of

Kahn, 2019-01-01 An examination of how two fundamental concepts of order influence our ideas about sovereignty citizenship law and history Western accounts of natural and political order have deployed two basic ideas project and system In a project order is produced by the intentional act of a subject in a system order is immanent in the world In the former order is made in the latter discovered Paul W Kahn shows how project and system have long been at work in our theological and philosophical tradition Against this background Kahn explains the development of the modern legal imagination in the nineteenth century as a movement from project to system Americans began the century imagining the constitutional order as their common project a deliberate construction of We the People They ended the century imagining that order is continuous with the common law an immanent development of the principles of civilization This imaginative shift affected ideas of legal text sovereignty citizenship interpretation history and science *World Social Science Report 2010* United Nations Educational, Scientific and Cultural Organization, 2010-01-01 Social science from Western countries continues to have the greatest global influence but the field is expanding rapidly in Asia and Latin America particularly in China and Brazil In sub Saharan Africa social scientists from South Africa Nigeria and Kenya produce 75% of academic publications In South Asia barring some centres of excellence in India social sciences as a whole have low priority These are a few of the findings from World Social Science Report 2010 Knowledge divides Produced by the International Social Science Council ISSC and co published with UNESCO the Report is the first comprehensive overview of the field in over a decade Hundreds of social scientists from around the world contributed their expertise to the publication Gudmund Hernes President of the ISSC Adebayo Olukoshi Director of the United Nations African Institute for Economic Development and Planning IDEP Hebe Vessuri Director Venezuelan Institute for Scientific Research IVIC and Fran ois H ran Director of Research National Institute for Demographic Studies INED France are among the experts who presented the Report during its official launch at UNESCO Headquarters in Paris on 25 June 2010 **The Sustainable Economics of Elinor Ostrom** Derek Wall, 2014-02-24 Elinor Ostrom s Nobel Prize winning work on common pool property rights has implications for some of the most pressing sustainability issues of the twenty first century from tackling climate change to maintaining cyberspace In this book Derek Wall critically examines Ostrom s work while also exploring the following questions is it possible to combine insights rooted in methodological individualism with a theory that stresses collectivist solutions Is Ostrom s emphasis on largely local solutions to climate change relevant to a crisis propelled by global factors This volume situates her ideas in terms of the constitutional analysis of her partner Vincent Ostrom and wider institutional economics It outlines her key concerns including a radical research methodology commitment

to indigenous people and the concept of social ecological systems Ostrom is recognised for producing a body of work which demonstrates how people can construct rules that allow them to exploit the environment in an ecologically sustainable way without the need for governmental regulation and this book argues that in a world where ecological realities increasingly threaten material prosperity such scholarship provides a way of thinking about how humanity can create truly sustainable development Given the inter disciplinary nature of Ostrom s work this book will be relevant to those working in the areas of environmental economics political economy political science and ecology [The Psychology of Inequality](#) Michael Locke McLendon,2018-11-19 In The Psychology of Inequality Michael Locke McLendon looks to Jean Jacques Rousseau s thought for insight into the personal and social pathologies that plague commercial and democratic societies He emphasizes the way Rousseau appropriated and modified the notion of self love or amour propre found in Augustine and various early modern thinkers McLendon traces the concept in Rousseau s work and reveals it to be a form of selfish vanity that mimics aspects of Homeric honor culture and in the modern world shapes the outlook of the wealthy and powerful as well as the underlying assumptions of meritocratic ideals According to McLendon Rousseau s elucidation of amour propre describes a desire for glory and preeminence that can be dangerously antisocial as those who believe themselves superior derive pleasure from dominating and even harming those they consider beneath them Drawing on Rousseau s insights McLendon asserts that certain forms of inequality especially those associated with classical aristocracy and modern day meritocracy can corrupt the mindsets and personalities of people in socially disruptive ways The Psychology of Inequality shows how amour propre can be transformed into the demand for praise whether or not one displays praiseworthy qualities and demonstrates the ways in which this pathology continues to play a leading role in the psychology and politics of modern liberal democracies **A History of the Social Sciences in 101 Books** Cyril Lemieux,Laurent Berger,Marielle Mace,Gildas Salmon,Cecile Vidal,2023-08-01 An intellectual history of the social sciences that offers a library of 101 books that broke new ground for the field What are the social sciences What unifies them This essay collection seeks to answer these and other important questions as it considers how the field has developed over the years from post World War II to the present day throughout the world Edited by Cyril Lemieux Laurent Berger Marielle Mac Gildas Salmon and C ile Vidal A History of the Social Sciences in 101 Books brings together a diverse range of researchers in the social sciences to present short essays on 101 books both renowned and lesser known that have shaped the field from Theodor Adorno and Max Horkheimer s Dialectic of Enlightenment 1947 to Michel Aglietta s Money 5000 Years of Debt and Power 2016 While there have been surveys and intellectual histories of particular disciplines within the social sciences history anthropology sociology until now there has been no intellectual history of the social sciences as a unified whole Far from presenting a fixed and frozen canon A History of the Social Sciences in 101 Books offers instead a moving multiform landscape with no settled questions only an ongoing series of new perspectives and challenges to previously established grounding **Critical Realism, History, and**

Philosophy in the Social Sciences Timothy Rutzou, George Steinmetz, 2018-08-09 This volume examines the relationship between history philosophy and social science and contributors explore questions concerning realism ontology causation explanation and values in order to address the question what does a post positivist social science look like **Reframing the Social** Poe Yu-ze Wan, 2011 Poe Yu ze Wan argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency *The Rise of the Social Sciences and the Formation of Modernity* J. Heilbron, Lars Magnusson, Björn Wittrock, 2013-12-01 This volume offers one of the first systematic analyses of the rise of modern social science Contrary to the standard accounts of various social science disciplines the essays in this volume demonstrate that modern social science actually emerged during the critical period between 1750 and 1850 It is shown that the social sciences were a crucial element in the conceptual and epistemic revolution which paralleled and partly underpinned the political and economic transformations of the modern world From a consistently comparative perspective a group of internationally leading scholars takes up fundamental issues such as the role of the Enlightenment and the French Revolution in the shaping of the social sciences the changing relationships between political theory and moral discourse the profound transformation of philosophy and the constitution of political economy and statistics *Rationality, Democracy, and Justice* Claudio López-Guerra, Julia Maskivker, 2015-02-05 This volume advances the research agenda of one of the most remarkable political thinkers of our time Jon Elster With an impressive list of contributors it features studies in five topics in political and social theory rationality and collective action political and social norms democracy and constitution making transitional justice and the explanation of social behavior Additionally this volume includes chapters on the development of Elster's thinking over the past decades Like Elster's own writings the essays in this collection are problem driven non ideal inquiries of practical relevance This volume closes with lucid comments by Jon Elster *Open the Social Sciences* Gulbenkian Commission on the Restructuring of the Social Sciences, 1996 A distinguished international group of scholars traces the history of the social sciences describes the recent debates surrounding them and discusses in what ways they can be intelligently restructured in light of this history and the debates
