Unbecoming Scott Baron, James Wise, Jr., 2016-03-18 Men and women who serve in the armed forces are subject to a different legal code than those they protect Throughout American history some have through action or failure to act or by circumstances found themselves facing prosecution by the United States military One measure of a nation s sense of justice is how it treats those who surrender some of their rights to defend the rights of fellow citizens Beginning with the first court martial predating the nation itself and continuing to the recent wars in Iraq and Afghanistan and the War on Terror this book examines the proceedings of 15 courts martial that raised such important legal questions as When does advocacy become treason Who bears ultimate responsibility when troops act illegally What are the limits in protesting injustice The defendants include such familiar names as Paul Revere and William Calley The authors examine such overlooked cases as the Somers Mutiny the trial of the San Patricios and the Port Chicago Mutiny These trials demonstrate that guaranteeing military justice especially in the midst of armed conflict is both a challenge and a necessity in a free society *Valor of Many Stripes* Scott Baron, 2019-01-16 The award of a military decoration does not define valor it only recognizes it Many acts of notable courage

and self sacrifice occur on the battlefield but are often obscured in the fog of battle or lost to history unrecognized and unheralded The largely overlooked men and women in this volume did incredible things in dire circumstances Although in some cases decorations were awarded including several Medals of Honor their stories remain unknown **US Cold War Aircraft Carriers** Brad Elward, 2014-03-20 An in depth look at the first US super carriers from the design and development of the Forrestal Kitty Hawk and Enterprise classes to their operational history during the Cold War and beyond The Forrestal class Forrestal Saratoga Ranger and Independence was the first completed class of US Navy supercarriers so named for their 25 percent size increase over the World War II era carriers such as the Midway class Design wise the Forrestals were a huge improvement over their predecessors being more stable and comfortable while maintaining advancements such as the armored flight decks that had been introduced with the Midway Brad Elward examines the history of this class of carrier and its successors The Kitty Hawk class was an improvement on the Forrestal class designs and four were built in the 1960s Kitty Hawk Constellation America and John F Kennedy These were even longer than the Forrestals and fitted with advanced defensive weapons systems and an improved elevator layout Featuring special illustrations this is a history of nine iconic carriers that hold a much respected place in US naval history Carrier Air Group Commanders Robert L. Lawson, 2000 The study of the U S Navys air group and air wing commanders is a study of carrier aviation itself This detailed volume presents a history of the establishment of the carrier air group commander billet and the attendant formal air groups The book is divided into four sections Section One A Historical Overview presents an overview of naval aviation history from 1898 to 1922 when the U S Navy commissioned its first aircraft carrier USS Langley CV 1 with its wood and fabric biplanes The pages next describe carrier aviation from Langley to the 90 000 ton supercarriers of today with their supersonic jets This section also contains air group organization charts showing their development over the years Section Two Evolving the System discusses the genesis and evolution of the air group wing commander billet as well as the development of the organizations they commanded It contains biographical sketches of the first CAGs and their wing commander predecessors Section Three The Men profiles more than forty of the Navys more notable CAGs by use of their personal reminiscences and anecdotes Their stories give the reader a feel for the responsibilities joys and sorrows that accompany the assumption of the title CAG Additionally the profiles give an insiders view of the U S Navys combat operation tactics from World War II to Desert Storm The books final section The Machines contains a chronological selection of photographs and some profile drawings of the aircraft flown by wing commanders from 1931 to the present Heavy emphasis has been given to provide as many high quality color photographs as were possible to locate This section should have great appeal to both historian and enthusiast in its coverage as it not only graphically presents the aircraft flown but also covers the evolution of carrier aviation itself An appendix listing every known CAG and dates of his command concludes the book lation of this data to exist Carrier Air Group Commanders The Men and Their Machines is an important historical document that will serve both as a
