Air Pollution and Health in Rapidly Developing Countries Gordon McGranahan, Frank Murray, 2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company *Air Pollution and Health in Rapidly Developing Countries* Edited By Gordon McGranahan And Frank Murray, 2003 **Air Pollution and Health in Rapidly Developing Countries** Gordon McGranahan, Frank Murray, 2012-05-23 In developing countries the price of rapid growth is all too often noxious airborne pollution which annually contributes to a disturbing number of avoidable deaths In recent decades however there has been considerable progress in the epidemiology of air pollution significant changes in international air pollution guidelines and the emergence of more systematic approaches to air pollution control While many of these advances have originated in affluent countries there have been major developments in other parts of the world In this book a distinguished cast of leading researchers in both the scientific and policy dimensions of air pollution and health have synthesized the recent developments in the field and their relevance for public health in developing countries The authors review studies from a wide range of Asian African and Latin American countries and contrast the findings with those from Europe and North America They also describe various tools and systems for air pollution management and emphasize approaches that can be used when data is scarce With a clear focus on the scientific and technical aspects of air pollution and health this book is essential reading for pollution and health policy makers researchers and others concerned with air pollution and health in developing countries *Air Pollution and the Forests of Developing and Rapidly Industrializing Regions* John L. Innes, Abu Hassan Haron, 2000-06-27 This book examines the importance of air pollution for the forests of rapidly industrialising countries and regions Its geographical coverage includes South and Central America Africa and Asia including Siberia China and Korea The problems presented by air pollution are placed within the more general context of sustainable development within these regions and the historical legacy that they are attempting to deal with Attention is drawn to the very serious problems associated with poor air quality in cities such as Mexico City and Chongqing China Air pollution in these areas is amongst the worst in the world Several chapters examine the importance of forest fires as a source of air pollution with particular reference being made to the Southeast Asian fires in recent years The available information about the effects of this pollution on the surrounding forests is reviewed and recommendations are made for a better understanding of the impacts A final chapter reviews the recent developments in air pollution control policies in the different regions covered by the book **Occupational and Environmental Health** Barry S. Levy, David H. Wegman, Sherry L. Baron, Rosemary K. Sokas, Heather L. McStowe, 2017-12 Resource added for the Resource added for the Wellness and Health Promotion program 105461 *Environment, Health And Sustainable Development* Landon, Megan, 2006-03-01 This book examines the underlying concepts the history of environmental health and the key factors that affect public health including air pollution water contamination industrial hazards and agricultural hazards The increasing impact of global environmental issues is

explored as they affect countries throughout the world

Environmental Problems in an Urbanizing World Jorge E. Hardoy, Diana Mitlin, David Satterthwaite, 2013-11-05 New edition of Environmental Problems in Third World Cities Cities in Africa Asia and Latin America contain some of the world's most life and health threatening human environments Environment related diseases and injuries cause millions of preventable deaths each year In many squatter settlements children are 40 to 50 times more likely to die before the age of five than they would be in Europe or North America and most such deaths are environment related Many cities also cause serious environmental degradation to their surroundings and increasingly contribute to global warming This updated and much expanded edition of the classic Environmental Problems in Third World Cities describes environmental problems and their effect on human health local ecosystems and global cycles It points to the political causes that underpin many of these problems including ineffective unaccountable governments and aid agencies reluctance to work with the urban poor It also highlights innovative solutions such as High quality low cost homes and neighbourhoods developed by urban poor groups working with local non governmental organizations Local Agenda 21s developed by municipal governments in partnership with community organizations In their analysis the authors show that cities can meet sustainable development goals There are practical affordable solutions to their environmental problems but most of these depend on more competent and accountable city governments and on more support for low income households and their organizations The book also outlines the changes needed international aid agencies to support this PRAISE FOR THE FIRST EDITION It's rare to encounter a work as authoritative and accessible as this It is a mine of useful information from cities in every corner of the Third World which does not shy away from the immensity of the problems but says as much about the solutions to them as about the problems themselves Jonathon Porritt Well written and very accessible The Geographical Journal Of value to students teachers practitioners policy makers and aid agencies Third World Planning Review A valuable resource for understanding the underlying problems this book offers practical alternatives Cities International

Disease Control Priorities in Developing Countries Dean T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove, 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions this second edition of Disease Control Priorities in Developing Countries 2nd edition highlights achievable priorities measures progress toward providing efficient equitable care promotes cost effective interventions to targeted populations and encourages integrated efforts to optimize health Nearly 500 experts scientists epidemiologists health economists academicians and public health practitioners from around the world contributed to the data sources and methodologies and identified challenges and priorities resulting in this integrated comprehensive reference volume on the state of health in developing countries

Scaling Urban Environmental Challenges Peter J. Marcotullio, Gordon McGranahan, 2012-06-25 Think globally act locally emphasizes the importance of scale in dealing with environmental challenges but not how to factor it in This major new book focuses on the spatial dimensions of urban

environmental burdens showing how important it is to take these into account when pursuing environmental justice and good governance whether in the context of the sanitary risks of slum living the pollution of uncontrolled industrialization and motorization or the enormous ecological footprints of affluent urban lifestyles Written by leading experts in the fields of urban development and environmental planning the book reviews the urban environmental shifts that have shaped today's challenges and examines conditions and problems in the urban centres of low middle and high income countries Case studies address such economically diverse cities as Accra New Delhi Mexico City and Manchester while thematic chapters explore issues including water sanitation and transportation The book concludes by exploring and analysing different scales of governance The editors argue that we should not rely solely on local governance to address local burdens like poor sanitation nor depend only on global governance for global challenges such as greenhouse gas emissions but that scale is crucial in both understanding the problems and devising successful responses Published with UNU IAS and IIED

Getting Development Right E. Paus, 2013-09-19 The celebratory tone about the emergence of the BRICs and the improved growth in Sub Saharan Africa and Latin America during the 2000s obscures the reality that for large parts of the developing world the development challenges are more acute than ever before After three decades of Washington Consensus policies deepening globalization and China's and India's increasing competitiveness in ever more goods and services many developing countries are now facing three critical challenges how to engender a transformation of the production structure that creates many more productive jobs how to make growth more inclusive and how to stimulate a growth process compatible with environmental sustainability This book brings together development scholars and practitioners from multiple academic disciplines and policy perspectives to analyze important facets of this triple challenge to explore interconnections among them and suggest strategies for overcoming the challenges in the current age of globalization Three features distinguish this book from other current works in the field First this book looks beyond the current global crisis and short term growth opportunities and analyzes the challenges to development from a long term perspective Second books on the barriers to development tend to concentrate on one of the three challenges e.g. Barbier 2010 A Global Green New Deal on environmental sustainability Cimoli Dosi Stiglitz 2009 Industrial Policy and Development on structural transformation and Milanovic 2011 The Have and the Have Nots on exclusion This book in contrast brings the three challenges together to emphasize that they challenges are interlinked and that strategies and policies must begin to recognize these interconnections to address different aspects of the challenges concomitantly Finally the contributors to the book include some of the most renowned development thinkers of our time
