Literature      **Black and Brown Planets** Isiah Lavender III, 2014-09-25 *Black and Brown Planets* embarks on a timely exploration of the American obsession with color in its look at the sometimes contrary intersections of politics and race in science fiction. The contributors, including De Witt D. Kilgore, Edward James, Lisa Yaszek, and Marleen S. Barr among others, explore science fiction worlds of possibility, literature, television, and film, lifting blacks, Latin Americans, and indigenous peoples out from the background of this historically white genre. This collection considers the role of race and ethnicity in our visions of the future. The first section emphasizes the political elements of black identity portrayed in science fiction, from black America to the vast reaches of interstellar space framed by racial history. In the next section, analysis of indigenous science fiction addresses the effects of colonization, helps discard the emotional and psychological baggage carried from its impact, and recovers ancestral traditions in order to adapt in a post-Native apocalyptic world. Likewise, this section explores the affinity between science fiction and subjectivity in Latin American cultures, from the role of science and industrialization to the effects of being in and moving between two cultures. By infusing more color in this otherwise monochrome genre, *Black and Brown Planets* imagines alternate racial galaxies with viable political futures in which people of color determine human destiny.

*Life Writing in the Posthuman Anthropocene* Ina Batzke, Lea Espinoza Garrido, Linda M. Hess, 2022-01-01 *Life Writing in the Posthuman Anthropocene* is a timely collection of insightful contributions that negotiate how the genre of life writing, traditionally tied to the human perspective and thus anthropocentric, can provide adequate perspectives for an age of ecological disasters and global climate change. The volume's eight chapters illustrate the aptness of life writing and life writing studies to critically reevaluate the role of the human vis-à-vis non-human others while remaining mindful of persisting inequalities between humans regarding who causes and who suffers damage in the Anthropocene age. The authors in this collection not only expand the toolbox of life writing studies by engaging with critical insights from the fields of posthumanism and ecocriticism but in turn also enrich those fields by offering unique approaches to contemplate the responsibility of humans for as well as their relational existence in the posthuman Anthropocene.

**Imagining Outer Space** Alexander C.T. Geppert, 2018-04-25 *Imagining Outer Space* makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination. How was outer space conceived and communicated? What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth-century modernity? In what way has West European astroculture been affected by the continuous exploration of outer space? Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own, the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought. Bringing together state-of-the-art work in this emerging field of historical research, the volume breaks new ground in the historicization of the Space Age.

**Afrofuturism** Kendra R. Parker, Gale Researcher Guide for Octavia Butler and Afrofuturism is selected from Gale s academic platform Gale Researcher These study guides provide peer reviewed articles that allow students early success in finding scholarly materials and to gain the confidence and vocabulary needed to pursue deeper research      **Lady Astronauts, Lady Engineers, and Naked Ladies** Karin Hilck,2019-07-08 The book Lady Astronauts Lady Engineers and Naked Ladies is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly

mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century
