Data, Methods and Theory in the Organizational Sciences Kevin R. Murphy, 2022-02-20 Data Methods and Theory in the Organizational Sciences explores the long term evolution and changing relationships between data methods and theory in the organizational sciences In the last 50 years theory has come to dominate research and scholarship in these fields yet the emergence of big data as well as the increasing use of archival data sets and meta analytic methods to test empirical hypotheses has upset this order This volume examines the evolving relationship between data methods and theory and suggests new ways of thinking about the role of each in the development and presentation of research in organizations This volume utilizes the latest thinking from experts in a wide range of fields on the topics of data methods and theory and uses this knowledge to explore the ways in which behavior in organizations has been studied This volume also argues that the current focus on theory is both unhealthy for the field and unsustainable and it provides more successful ways theory can be used to support and structure research and demonstrates the most effective techniques for analyzing and making sense of data This is an essential resource for researchers professionals and educators who are looking to rethink their current approaches to research and who are interested in creating more useful and more interpretable research in the organizational sciences

Nationalist Passions Stuart J. Kaufman, 2015-11-06 Nationalist and ethnic conflict can take many forms from genocidal violence and civil war to protest movements and peaceful squabbles in democracies *Nationalist Passions* poses a stark challenge to extreme rationalist understandings of political conflict Stuart J Kaufman elaborates a compelling theory of ethnic politics to explain why ethnic violence erupts in some contexts and how peace is maintained in others At the core of Kaufman's theory is an assertion that conflicts are initiated due to popular symbolic predispositions biases of all kinds and perceptions of threat Kaufman puts his theory to the test in a range of conflicts He examines some highly violent episodes among them the Muslim rebellion in the southern Philippines beginning in the 1970s the civil war in southern Sudan that

began in the 1980s and the Rwanda genocide of 1994 Kaufman also analyzes other situations in which leaders attempted to tame the violence that nationalist passions can generate In India Mahatma Gandhi mobilized an overtly nonviolent movement but failed in his efforts to prevent the rise of Muslim Hindu communal violence In South Africa Nelson Mandela and F W de Klerk ended apartheid but not without terrible cost more than fifteen thousand people died while the negotiations were under way In Tanzania however Julius Nyerere led one of the few ethnically diverse countries in the world with almost no ethnic violence Nationalist Passions is essential reading for policymakers international aid workers and all others who seek to find the best possible outcomes for future internal and interstate clashes *Astronomy* Eric Chaisson, Steve

Species of Origins Karl W. Giberson, Donald A. Yerxa, 2002-10-09 In *Species of Origins* Karl W Giberson and Donald A Yerxa examine America's controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions **Subject Guide to Books in Print**, 1997 **Astronomy**
