Historische Darstellbarkeit versus Player Experience Ngoc Tram Vu, 2025-01-20
Unterhaltungsspiele die im Zusammenhang mit der Handlung und Folge des Zweiten Weltkriegs stehen sowie eine zeitgenössische Aufarbeitung der Verbrechen des Nationalsozialismus veranschaulichen nutzen häufig narrative und emotionale Elemente zur historischen Inszenierung Die Darstellung und Rekonstruktion nationalsozialistischer Architektur wurde jedoch in der Forschung zu digitalen Spielen bislang kaum beachtet Mit diesem Hintergrund untersucht diese Arbeit die visuelle Adaption der NS Architektur in Gaming Medien aus unterschiedlichen Jahrzehnten Die Architektur in digitalen Spielen bildet eine hybride Form die Fragmente historischer Bauten mit fiktionalen oft deutsch faschistisch wahrgenommenen Formen

kombiniert Bestimmte visuelle Anpassungen werden zudem aus Spielmechanik und Spielerfahrungsgründen neu gestaltet Die große Diskrepanz zwischen historischen Vorbildern und fiktionalen Interpretationen schafft ein eigenes Genre der Bildsprache das neue Forschungsansätze für die Architekturgeschichte bietet aber auch Bedenken bezüglich der möglichen Verharmlosung der NS Geschichte im heutigen digitalen Zeitalter weckt

Relativity and Scientific Computing Friedrich W Hehl,Roland A. Puntigam,Hanns Ruder,2012-12-06 For this set of lectures we assumed that the reader has a reasonable background in physics and some knowledge of general relativity the modern theory of gravity in macrophysics and cosmology Computer methods are presented by leading experts in the three main domains in numerics in computer algebra and in visualization The idea was that each of these subdisciplines is introduced by an extended set of main lectures and that each is conceived as being of comparable importance Therefore we believe that the book represents a good introduction into scientific computing for any student who wants to specialize in relativity gravitation and or astrophysics We took great care to select lecturers who teach in a comprehensible way and who are at the same time at the research front of their respective field In numerics we had the privilege of having a lecturer from the National Center for Supercomputing Applications NCSA Champaign IL USA and some from other leading institutions of the world visualization was taught by a visualization expert from Boeing and in computer algebra we took recourse to practitioners of different computer algebra systems as applied to classical general relativity up to quantum gravity and differential geometry

Spatial Data Modelling for 3D GIS Alias Abdul-Rahman,Morakot Pilouk,2007-09-23 This book covers fundamental aspects of spatial data modelling specifically on the aspect of three dimensional 3D modelling and structuring Realisation of true 3D GIS spatial system needs a lot of effort and the process is taking place in various research centres and universities in some countries The development of spatial data modelling for 3D objects is the focus of this book

Medical Retina Frank G Holz,Richard F. Spaide,2010-03-18 Recent advances in ophthalmic imaging technology have revolutionized fundus examination and contributed significantly in elucidating the pathophysiology of retinal diseases and improving their diagnosis and treatment It is therefore fitting that this detailed full color textbook in the Medical Retina series is devoted to ocular imaging The volume reviews in detail the role of both established and novel forms of imaging and is designed to be of benefit to clinicians and researchers alike All of the chapters have been written by internationally recognized experts at the forefront of their fields The result is a comprehensive state of the art overview of retinal imaging that should prove informative and useful for everyone interested in the retina Topics include Spectral domain optical coherence tomography SD OCT of macular diseases Comparison of OCT equipment Simultaneous SD OCT and confocal SLO imaging Ultra widefield imaging Autofluorescence imaging Near infrared imaging Macular pigment imaging Metabolic mapping Imaging of the choroid Imaging the vitreous and the vitreoretinal interface with SD OCT New developments in OCT technology Molecular imaging The Temple of Ramesses II in Abydos Ogden Goelet,Sameh Iskander,2022-04-12 Of all the enormous monuments throughout Egypt and Nubia that Ramesses II the Great ca 1279 1212 BCE left behind his temple at Abydos built early in his reign stands as one of his most elegant with its simple architectural layout and dramatic and graceful painted relief scenes Though best known for its dramatic reliefs depicting the battle of Kadesh the temple also offers a wealth of information about religious and social life in ancient Egypt It reflects for example the strenuous efforts of the early Ramessides to reestablish the Osiris cult in Egypt and particularly at Abydos in the aftermath of the Amarna period Building on the comprehensive photographic and epigraphic documentation of the temple presented in The Temple of Ramesses II at Abydos volumes 1 Wall Scenes and 2 Pillars Niches and Miscellanea volume 3 Architectural and Inscriptional Features offers a detailed analysis of the overall architectural layout and decorative program of the temple and its symbolism This discussion approaches the religious history of the site through its archaeology its inscriptions both planned and secondary graffiti and its situation in the complex religious landscape of Abydos Of particular interest are the temple s role as a staging point for the great Osiris Festival and its procession among the most important of all ritual events in the Egyptian religious calendar during the Ramesside period the promotion of an active unbound form of Osiris and the evidence for important cult activities that took place on the rooftop of the temple the presence of which is documented today by the staircase that accessed it from Court B **Consumption and the World of Goods** John Brewer,Roy Porter,2013-06-17 The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work

within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women o the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services
