*Environmental Awareness in Preschool Children's Drawings* Mohamed Mliless, Mohammed Larouz, Diego Luis Forte, Huda Fadhil Halawachy, Handoko Handoko, Clara D.S. Vande-Guma, 2024-05-28 This edited volume investigates multiple perspectives of environmental meaning making among children by evaluating preschool children's drawings on the environment. It critically traces the formation of early attitudes towards the environment before children's exposure to formal environmental education. Similarities and differences are explored among preschool children's drawings across diverse cultural and geographic backgrounds. Over five sections covering Morocco, Indonesia, Nigeria, Iraq, and Argentina, each one examines the factors affecting children's environmental drawings such as age, gender, and geography. Using different theoretical frameworks, the chapters are written by researchers of environmental discourse and ecolinguistics with a background knowledge in environmental studies from a social science perspective. This book is of interest to researchers interested in ecolinguistics and socio-semiotics fields of study. This seminal book also paves the way for further research on preschool environmental education.

Early Childhood Curriculum for All Learners Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12 *Early Childhood Curriculum for All Learners: Integrating Play and Literacy Activities* is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills. The authors link solid play-based research to specific developmentally appropriate practices. By combining these two areas, the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play. In addition, the text focuses on socio-dramatic play, a recently acknowledged essential aspect of child-initiated play interactions. It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades. Implementation of the information presented in this book will enable children to experience a richer transition into primary education classrooms.
