But the emphasis on political issues has obscured underlying issues concerning education, infrastructure, research, innovation, entrepreneurship, and sustainable economic and social development. This volume, emerging in the aftermath of a conference and workshop on science and technology in the region, presents contributions from a range of experts from the Middle East, Europe, and the United States to provide fresh new insights and perspectives on the challenges and prospects for regional development in the changing global context of our time. The authors explore such topics as the role of information and communication technologies, mindset change in support of investment in intangible assets and risk taking, how to approach cultural issues, institutions, and governance, collaborations with other regions, and benchmarking performance while drawing lessons of relevance for the special local context. Ultimately, they offer a number of precise policy recommendations and practical insights for creating an enabling environment for capturing economic, political, and social opportunity.
